

The Registrar General's Quarterly Report

9.30am – Wednesday 30 June 2010

Births/Stillbirths: January to March 2010

- The number of births registered in the quarter under review was 6,444 (3,269 males and 3,175 females). The annualised rate was 14.4 births per 1,000 of the estimated population, which is 0.3 above the rate for the corresponding quarter of 2009.
- Live births outside marriage numbered 2,620, which represented 40.7 per cent of the total live births registered.
- The number of stillbirths registered was 30 and the rate was 4.6 stillbirths per 1,000 births.

Deaths: January to March 2010

- Deaths registered during the quarter numbered 4,114 (2,062 males and 2,052 females). The annualised rate was 9.2 deaths per 1,000 of the estimated population, which was 0.1 below that for the corresponding quarter of 2009.
- Deaths registered of children aged under one year numbered 39, representing an infant mortality rate of 6.0 infant deaths per 1,000 live births registered, in the corresponding quarter of 2009 there were 42 infant deaths registered.
- The number of deaths from cancer totalled 1,013, comprising of 545 males and 468 females. Cancer deaths accounted for 24.6 per cent of the total deaths in this quarter. The number of deaths from ischaemic heart disease totalled 681 comprising of 405 males and 276 females deaths. These accounted for 16.6 per cent of the total deaths in the quarter.

Marriages and Civil Partnerships: January to March 2010

- Marriages registered during the first quarter of 2010 numbered 862, which was 11 less than that registered in the corresponding quarter of 2009.
- In the first quarter of 2010, 19 civil partnerships were registered. In the corresponding quarter of 2009, 14 civil partnerships were registered.

GENERAL NOTES

The figures in this report are provisional. Final figures are published in the relevant Registrar General's Annual Report.

Births, stillbirths, deaths, marriages and civil partnerships

Figures relate to those registered during the quarter under review. A birth or stillbirth is assigned to the usual place of residence of the mother and figures exclude births and stillbirths to non-Northern Ireland residents. Deaths are assigned to the usual residence of the deceased, if such residence is within Northern Ireland; otherwise to the place of occurrence. Non-resident deaths are included in the figures. Marriages and Civil Partnerships are assigned to the place of ceremony.

Registration and Occurrence

Vital events included in this report relate to those registered during the quarterly period. Some events may have occurred prior to this registration quarter; this is especially the case with events such as infant death or suicide, which are likely to be referred to the coroner and thus take some time to be registered. Events such as Christmas and Easter may have an affect on the timeliness of vital events registrations.

Birth, stillbirth and death rates

Rates for 2009 and 2010 data are calculated on the estimated home population as at 30th June 2009, the 2010 mid-year estimate will be published in Summer 2011. All quarterly rates have been annualised by multiplying the rates by 4.

Stillbirth

Refers to a child which has been issued from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life.

Infant mortality

Refers to all deaths in the first year of life.

Cancer

Refers to all malignant neoplasms of the lymphatic and haematopoietic tissues, including Hodgkin's disease, leukaemia and aleukaemia.

Cause of death coding

Each death registered in Northern Ireland is attributed to a single cause and coded in accordance with the International Statistical Classification of Diseases, Injuries and Causes of Death (ICD). The General Register Office in Northern Ireland changed from the ninth (ICD9) to the tenth (ICD10) edition from January 2001. The ICD10 codes used for the causes of death in Tables 1b and 3 are as follows: Cancer (C00-C97); Ischaemic Heart Disease (I20-I25); Respiratory Disease (J00-J99).

Healthcare Associated Infections

It is not possible to identify directly from the ICD codes all deaths where MRSA or Clostridium difficile contributed to the death. However the data in Table 1b are collated by looking for all mentions of either MRSA or Clostridium difficile on the death certificate.

Suicide, Self-Inflicted Injury and Events of undetermined intent

In the UK, in considering suicide events it is conventional to include cases where the cause of death is classified as either 'Suicide and self-inflicted injury' or 'Undetermined injury'. The ICD10 codes used for 'Suicide and self-inflicted injury' are X60-X84 and Y87.0, and the ICD10 codes used for 'Undetermined injury' are Y10-Y34 and Y87.2. (Also see section above on Registration and Occurrence).

Seasonality

This short report presents selected information that illustrates seasonal variations in birth, deaths and marriages in Northern Ireland. More detailed analyses of seasonality in marriages are presented in the Marriages, Divorces and Civil Partnerships Press Release 2009.
