1971 CENSUS

Programme of Census Reports

1. A Preliminary Report on the 1971 Census was published in October, 1971, and contained a brief statistical commentary and provisional figures of the population, private dwellings and private households for all local authority areas (counties, county boroughs, municipal boroughs, urban and rural districts) and population figures for small towns and villages with 50 or more houses but having no defined boundaries.

2. County Reports

Reports were published for each of the Counties of Fermanagh, Tyrone, Londonderry (including Londonderry County Borough), Armagh, Down, Antrim and the County Borough of Belfast. The tables gave figures for counties, local authority areas, wards, district electoral divisions and towns and villages with 50 or more houses. The subjects covered were population and area (hectares); sex, age and marital condition; birthplace; religion; private dwellings, households, tenure and amenities; private motor cars and garaging; economically active persons and their sex and occupational status.

3. Summary Tables

Summary tables gave summaries of the information contained in the County Reports for Northern Ireland. Additionally, this report gave statistics covering the same subjects included in the County Reports for the new local authority areas which became functional on 1st October, 1973.

4. Housing and Household Composition Tables

The Housing Tables contained tabulations, not covered by the County Reports, on dwellings, households, tenure, household amenities, cars and garaging. Most tables referred to Northern Ireland but some tables included figures for local authority areas. The Household Composition Tables provided information on the composition and social and economic characteristics of households.

5. Economic Activity Tables

The Economic Activity Tables will give statistics of the occupied population based on their personal occupation and the employed population classified according to the branches of industry in which they are employed with reference to age, marital condition, employment status, socio-economic group, etc. Most tables will refer to Northern Ireland but some tables will cover local authority areas.

6. Workplace and Transport to Work Tables

These tables contained details of the resident population and the population employed in each area, the main workplace movements from one area to another and the main means of transport to work used for such movements.

7. Migration Tables

These tables gave statistics of the numbers and characteristics of people who changed their usual residence in the year or in the five years before Census day with details of their age, sex, marital condition, area of previous residence; and of the number and characteristics of migrant households.

8. Religion Tables

The Religion Tables gave, by the main religious denominations, details of the people by sex, age, marital condition, occupation, industry and socio-economic group; and the numbers and characteristics of households.

9. Education Tables

These tables give details of the age, sex, occupation and industry of those people who had obtained any academic or vocational qualification and details of the type, level and subject of the qualification held.

10. Fertility Tables

The Fertility Tables will give statistics derived from information supplied for married women under 60 years of age at Census about the date of marriage and the number and spacing of children born alive to them in marriage.

EDUCATION TABLES

General Explanatory Notes

The educational information collected at the Census was in respect of persons who obtained any academic or vocational qualification since reaching the age of 18 years. Information was also sought from persons over 15 as to whether they had obtained a General Certificate of Education at 'A' level or an equivalent attainment. Retired persons aged 70 years and over were not required to answer the education questions.

The tabulations give details of the age, sex, occupation and industry of those people who had obtained any academic or vocational qualifications and details of the type, level and subject of the qualifications held.

Census Population

The 1971 Census population comprises all persons irrespective of their usual address or nationality, who spent census night in the area of enumeration. Members of the Armed Forces (including those of Commonwealth and foreign countries except personnel aboard foreign naval vessels) are included. Persons travelling on census night were enumerated with the population of the district in which they arrived the next day unless they had already been enumerated elsewhere. People on night work were regarded as present in their own homes. Persons on vessels at moorings or anchorages in Northern Ireland waters or on board ships on coastwise voyages to Northern Ireland ports were counted as part of the population of the district containing the mooring, anchorage or arrival port. (The enumerated population excludes persons who, although usually resident in the area, spent census night elsewhere).

Population covered in this Report

The statistics in this report refer to the population who were stated to be resident in Northern Ireland; persons who usually live outside Northern Ireland are excluded. Members of the armed forces enumerated in Service establishments in Northern Ireland are included.

Qualifications	Major Subject or Subjects	Awarding Institution

Classification of Qualifications

Throughout this report qualifications have been divided into 5 levels — 'a', 'b', 'c', 'd' and 'e'. Levels at 'a', 'b' and 'c' refer to "qualified persons", viz, persons who held qualifications not normally obtained at school but gained at age 18 or over after a period of study, above that required for G.C.E. 'A' level, at a university or at an establishment for further education. Levels 'd' and 'e' deal with "unqualified persons". Level 'd' refers to persons with G.C.E. 'A' level or an equivalent qualification. Level 'e' covers all other persons who had either qualifications below G.C.E. 'A' level or were without qualifications. In cases where more than one qualification was stated, the highest qualification was chosen for tabulating purposes. The following gives a brief list of the qualifications grouped under the various levels:—

- Level 'a' Doctorates at universities
 - Doctorates and Masters degrees of the Council for National Academic Awards
 - Certain masters and bachelor degrees and members of the College of Technologists
- Level 'b' First degrees at universities
 - Degrees awarded by the Council for National Academic Awards, and diplomas of technology
 - Certain memberships, fellowships, associateships, licentiates, graduates of professional institutions

Level 'c'	Higher National Certificates and Higher National Diplomas Certain teaching qualifications Certain nursing qualifications Certain associateships, diplomas, certificates, licentiates and fellowships of universities, further education colleges and professional institutions
Level 'd'	G.C.E. 'A' level, Northern Ireland Senior Certificate, Higher grade of Scottish Certificate of Education, Higher grade of Scottish Leaving Certificate, Ordinary National Certificate, Ordinary National Diploma
Level 'e'	Without qualifications

Subject Classification

The subject classification used in this report was that evolved by the Department of Education and Science in consultation with the Scottish Education Department, the Northern Ireland Department of Education and other bodies with education interests. It has been devised as a general purpose tool for coherent analyses of all education and related statistics for which a subject analysis is appropriate.

The classification consists of 76 subject divisions (primary subjects), condensing into 10 subject groups. A full description of the subject classification is published in the "Education Statistics for the United Kingdom 1967" (H.M.S.O. 1970).

Economic Activity

The economically active persons were those who were in either of the following categories:—

- (a) In employment during the week ended 24th April 1971. This includes own-account workers, part-time workers, casual or temporary workers and persons working in a family business. Persons temporarily away from work during the week because of holidays, sickness or injury, strikes or industrial disputes and temporary laid-off are counted as in employment if their jobs are awaiting them when they are in a position to resume work.
- (b) Out of employment throughout the week ended 24th April 1971. This includes persons actively seeking work, persons prevented from seeking work by temporary sickness or injury and people who although not in employment had found a job but were to start work after census day.

The remaining persons are classified as economically inactive in one of the following categories:—

- (a) **Retired** — Formerly occupied persons who have ceased working and are no longer seeking further employment. Housewives and persons engaged in home duties are not classified as "retired".
- (b) **Students** — Persons in full-time attendance at an educational establishment irrespective of whether or not they have part-time or seasonal employment.
- (c) **Others economically inactive** — Those persons never in employment and not seeking it. Included are persons of independent means, housewives and others engaged on unpaid domestic duties, the permanently sick or disabled, residents of chronic sick and psychiatric hospitals and prisoners who were serving a sentence of six months or more. Trainees in Government training centres were by convention included in this group.

Employment Status

The classification of employment status divides the employee from the self-employed as follows:—

Self-employed — includes persons working on their own account with or without employees, members of partnerships, parochial clergy and medical practitioners who are principals in the National Health Service and in private practice.

Employees are persons who have not been classified as self-employed.

Managers — includes all employees coded to occupation groups 173-180 (Administrators and Managers), all employees not being self-employed coded to groups 002 (Farmers, farm managers, market gardeners), 115 (Deck, engineering officers and pilots, ship), 138 (Office managers), 143 (Proprietors and managers, sales), 149 (Finance, insurance brokers, financial agents), 154 (Publicans, innkeepers), 156 (Proprietors and managers boarding houses and hotels), 159 (Restaurateurs) and 171 (Proprietors and managers, service, sport and recreations); persons occupied as managers, persons returned as managers and other persons of equivalent rank whose occupation code is preceded by an 'N' in the occupation index and all persons returned as directors of companies. Professional workers coded to occupation groups 181, 182, 184, 186, 195-198, 200-205, 209-214 and 217 are excluded.

Foremen and Supervisors. This group includes all persons described on the census form as foreman, supervisor, boss, chargehand, gaffer, headman, overlooker, overseer, overman, and all persons whose occupation code is preceded by a letter F in the index of occupations.

Professional Employees. This group consists of employees with occupation codes 181, 182, 184, 186, 195-198, 200-205, 209-214 and 217.

Other employees. This status is given to all employed persons not elsewhere classified.

Classification of Occupations

The occupation of a person is the kind of work he or she performs, due regard being paid to the conditions under which it is performed; this alone determines the particular group in an occupational classification to which the person is assigned. The nature of the factory, business, or service in which the person is employed has no bearing upon the classification of his occupation, except to the extent that it enables the nature of his duties to be more clearly defined. This will perhaps be made clearer by an example. A crane driver may be employed in a shipyard, an engineering works or in building and construction, but this has no bearing on his occupation and all crane drivers should be classified to the same occupational group. A full description of the occupation classification used in the census is given in the "Classification of Occupations 1970" (H.M.S.O. 1970).

Social Class

The unit groups of the Occupational Classification are arranged into broad categories to form the Social Classes as follows:—

- I Professional, etc., occupations
- II Intermediate occupations
- III Skilled occupations — non-manual
manual
- IV Partly skilled occupations
- V Unskilled occupations

The unit groups included in each of these categories have been selected so as to ensure that, so far as is possible, each category is homogeneous in relation to the basic criterion of the general standing within the community of the occupations concerned. The criterion is naturally correlated with other factors such as education and economic environment, but it has no direct relationship to the average level of remuneration of particular occupations. Each occupational unit group has been assigned as a whole to a Social Class, and it is not a specific assignment of individuals based on the merits of a particular case.

The Social Class appropriate to any given combination of occupation and employment status (i.e. whether self-employed, manager, foreman or other employee) is derived as follows:—

- (a) each occupation is given a basic Social Class
- (b) Persons of foreman status whose Social Class is IV or V are allocated to Social Class III
- (c) persons of manager status are allocated either to Social Class II or III, the latter applying if the basic class is IV or V, except those in occupational unit groups 003, 004 and 006 who are allocated to Social Class II.

Classification of Industries

Persons are classified by the industry in which they are employed at the time of the Census. The basis of this classification is the revised "Standard Industrial Classification" (H.M.S.O. 1968).

The classification is based on industries and not on occupations. All persons (including administrative, technical, clerical and ancillary staffs) employed in a "unit" of industry are included, irrespective of their occupations, in the figures of employment for the industry to which the "unit" is classified. The classification is also based on industries without regard to who owns or operates them. Thus the manufacturing "units" owned or operated by the Central Government are classified in the same way as those in private hands and are not included under "National Government Service". Similarly, the transport services operated by local authorities are included under 'Transport' and not under 'Local Government Service'.

Presentation Conventions

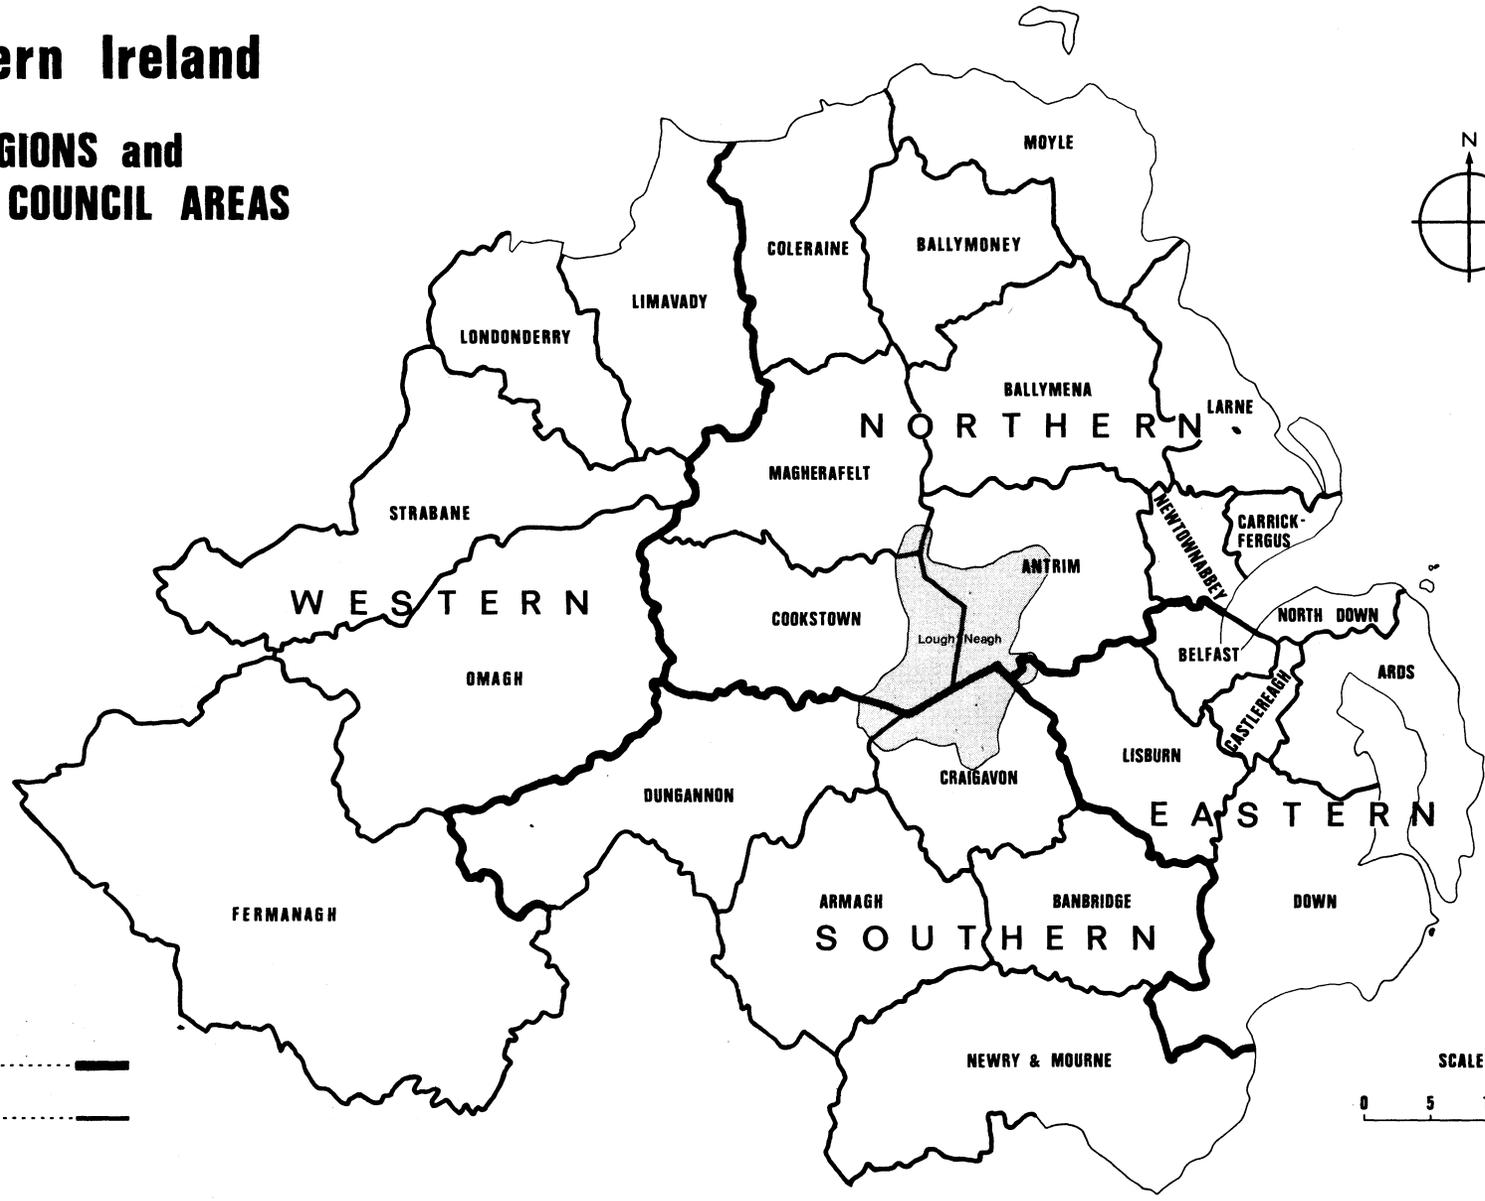

A dash (—) indicates the entry is zero.

A blank indicates that a particular combination of line and column is impossible.

In the presentation of rates, a rate shown as 0 indicates that the actual rate is less than one half of a unit but is not zero.

B13 Employer's name and business

Describe the business fully and try to avoid abbreviations or initials.

General terms such as 'Manufacturer', 'Merchant', 'Agent', 'Broker', 'Dealer', 'Engineering', 'Shopkeeper', are not enough by themselves and further details should be given about the articles manufactured or dealt in.

Woodwork machinist, Civil engineer, Toolroom foreman, etc.

For civil servants, local government officials and other public officials give their rank or grade.

'Self-employed, employing others', means having one or more employees other than 'Family workers'. A 'Family worker' is one who lives in the same household as the employer and is related to him.

B16 Apprentices, etc.

Answer this question only for a person who is undergoing training for a period fixed in advance and leading to recognition as a skilled worker or technician or to a recognised technical, commercial or professional qualification or managerial post.
