OR THROUGH ANY BOOKSELLER.

Price 5s. 0d. net.

THE QUEEN'S UNIVERSITY OF BELFAST.

PREFACE.

This volume has been prepared in accordance with the provisions of Section 6 (1) of the Census Act (Northern Ireland), 1925. The 1926 Census statistics which it contains were compiled from the returns made as at midnight of the 18-19th April, 1926: they supersede those in the Preliminary Report published in August, 1926, and may be regarded as final.

The Census publications will consist of:—

- 1. Seven County Volumes, each similar in design and scope to the present publication.
- 2. A GENERAL REPORT relating to Northern Ireland as a whole, covering in more detail the statistics shown in the County Volumes, and containing in addition tables showing
 - (i.) the occupational distribution of persons engaged in each of 51 groups of industries;
 - (ii.) the distribution of the foreign born population by nationality, age, marital condition, and occupation;
 - (iii.) the distribution of families of dependent children under 16 years of age, by age, sex, marital condition, and occupation of parent;
 - (iv.) the occupational distribution of persons suffering from infirmities.
- 3. A TOPOGRAPHICAL INDEX, dealing in separate alphabetical sections with each type of area for which statistics are published in the County series. The particulars given for each territorial unit include references to the 6" Ordnance Survey maps and to Tables 3, 4, or 5 of the relative County Volume.

The net prices for the above publications will be 5s. 0d. for each County Volume and 10s. 0d. each for the General Report and the Topographical Index. A complete set of these volumes may be obtained directly from the Superintendent, H.M. Stationery Office, 15, Donegall Square West, Belfast, at the special inclusive price of £2 2s. 0d. strictly net.

The Registrar-General is empowered by Section 6 (2) of the Census Act (Northern Ireland), 1925, to prepare and supply from the Census returns, statistics other than those published in the Census Reports at the request and cost of any local authority or person. Any special demands for statistics more detailed than those published (either as regards subject matter or area) can thus, as far as office records permit, be satisfied. Requests for special compilation of Census statistics should be addressed to the Registrar-General, who will be pleased to advise and furnish an estimate of cost.

GENERAL REGISTER OFFICE.

MURRAY STREET,

BELFAST.

FEBRUARY, 1928.

PART I. DEFINITIONS AND EXPLANATIONS OF TERMS USED IN THIS VOLUME.

AREA.

The acreages given are as measured by the Ordnance Survey of 1899-1907 (fore-shore being excluded), and relate to the several areas as constituted at the date of the 1926 Census. The acreage covered by tidal water, which is not shown in the body of Tables 3 and 4, appears in footnotes thereto.

POPULATION.

The population comprises all persons, including Forces of the Crown, enumerated as at midnight of Sunday the 18th-19th April, 1926, together with those who, not having been enumerated elsewhere, arrived in port or were received into any dwelling on the morning of the 19th April before the Census returns were collected.

The population assigned to each area is that actually present (as defined above) within it, whether as permanent residents or temporary visitors, persons in port but on ship board being classified to the adjacent area.

In general these definitions apply to the population as enumerated at previous censuses, and shown in Table 2.

ADMINISTRATIVE DIVISIONS.

The County Borough is divided into fifteen wards, each of which is coterminous with the district electoral division of the same name (see Table 3).

The County Borough covers only a part of the Poor Law Union of Belfast, the remaining parts consisting of the Rural Districts of Belfast and Castlereagh and the Urban District of Holywood. The part of the Poor Law Union within the County Borough is divided into sixteen medical dispensary districts (see Table 4). Poor law unions and medical dispensary districts are, respectively, superintendent registrars' and registrars' districts for the registration of marriages, births, and deaths.

The County Borough forms a single regional education area (see Table 12).

The only changes which have taken place in the boundaries of administrative divisions since 1911 are the creation in 1920 of Dispensary District No. 16 out of parts of Districts Nos. 11 and 12, and the transfer at the same time of portions of District No. 13 to Districts Nos. 11 and 12.

PARLIAMENTARY CONSTITUENCIES.

The present parliamentary constituencies were created by the Government of Ireland Act, 1920, by grouping the then existing parliamentary divisions. The wards contained in each constituency are shown in a footnote to Table III.

HOUSES.

- 1. The term "House" denotes
- (a) each structure (except institutions) which stands alone or is separated from another by a vertical party wall; and which is used or intended partly or wholly for habitation;
 - (b) each institution (viz., hospital, sanatorium, nursing home, infirmary, workhouse, asylum, religious or charitable community, residential school or college, barracks or other premises under Naval, Military, Air Force, or Police discipline, prison or other place of detention), regardless of the number of buildings within its precincts;
 - (c) each vessel, caravan, tent, or other movable dwelling.

The 1911 figures for "Houses" do not include vessels, and each separate building within the precincts of an institution was at that Census regarded as a separate "House."

- 2. The terms "Boarding-House" and "Lodging-House" denote, in addition to habitations so described, any private house containing three or more boarders or lodgers.
 - 3. The term "Private House" denotes all habitations other than
 - (a) dwellings within the precincts of an institution;
 - (b) hotels, boarding houses, and other such communal dwellings;
 - (c) premises in which three or more boarders, lodgers, or trade assistants reside;
 - (d) residences occupied by virtue of the tenant's employment, (except rectories and manses, and dwellings belonging to but detached from domestic establishments);
 - (e) premises occupied by caretakers;
 - (f) ships, caravans, tents, and other movable dwellings;
 - (g) barns, stables, and out-houses occupied on Census night.

The term includes dwellings over shops except when these are occupied by a business manager (see (d) above).

4. The term "Inhabited" denotes actual residence of a person or persons, on Census night. "Uninhabited" houses, therefore, include those temporarily vacant through the absence of the usual occupiers as well as those without tenants.

ROOMS.

- 1. The rooms enumerated are the usual living rooms, including bedrooms and kitchens, but excluding sculleries (i.e., rooms used *only* for washing, cleaning, or cooking), pantries, cloakrooms, landings, closets or bathrooms, or any warehouse, office or shop rooms.
- 2. For the purpose of classifying families by rooms occupied (Table 8), shared-room occupations—i.e., those in which two or more families have rooms in common,—have been rounded up to the next integral number of rooms. Thus, three families occupying $1\frac{1}{3}$, $2\frac{1}{3}$, and $2\frac{1}{3}$ rooms in a 6-roomed house would be shown as occupying 2, 3, and 3 rooms respectively. The extent of the rounding-up process may be ascertained in a general way by reference to Table 7, in which the actual number of rooms is given. Generally, in cases of 1 room occupations, all persons living therein, whether related or not, have been enumerated as one Census family.

FAMILIES.

The term "Family" denotes

- (a) The inhabitants of each institution (see 1 (b) of "Houses" definition), hotel, boarding-house, lodging-house, or ship.
- (b) Each person or group of persons occupying separately the whole, or part of, any dwelling other than as described at (a).

"Private Families" mean all families enumerated in "Private Houses" (see 3 of "Houses" definition); and from the population and family totals of this class is calculated the number of persons per family in 1926 (See Table VI.).

In 1911 the inhabitants of premises described at (a) above were in certain cases enumerated as two or more families. The number of persons per family was obtained by dividing the number of Census families into the entire population less the "special inmates" (i.e., patients, prisoners, soldiers, etc.) of institutions.

RATEABLE VALUATION.

The figures shown are those for service of the year ended 31st March, 1927, and have been supplied by the Commissioner of Valuation. Rateable hereditaments include lands, buildings, tolls, railways, tram-roads, canals, fisheries, turbaries, mines, quarries, waterworks, telegraphs, and telephones. The figures for individual wards shown in Table 3 exclude the valuation of electric, gas, and water mains, tramways, telegraphs, and telephones, it not being practicable to allocate valuations of this type between the different wards.

EDUCATION.

The classification under educational establishments (which was assisted by reference to lists supplied for Census purposes by the Ministry of Education) is as follows:—

- 1. Public Elementary Schools. Day and evening pupils are grouped together in this class, the question on the Census schedule not requiring a separation as between day and evening in respect of pupils attending public elementary schools.
- 2. Secondary Schools, including preparatory departments and preparatory schools. This heading relates to day pupils only, and the schools are limited to those recognised by the Ministry of Education.
- 3. Technical Schools. The day pupils shown in this group comprise those stated to be attending junior technical schools, day commercial classes, and day classes for domestic economy and manual instruction which were being held at certain centres in April, 1926. The evening pupils comprise those stated to be attending technical schools or classes in the evening.
- 4. Other Educational Establishments (Day and Evening). These include secondary schools not recognised by the Ministry of Education, universities, training colleges for teachers, agricultural schools, commercial schools, home or private tuition, etc.

OCCUPATIONS.

The occupational classification is based on that used in the Reports on the Census of England and Wales, 1921.*

It will be seen that there are thirty-two orders. Each of these covers the same occupational ground as the England and Wales orders. Eleven of the orders are divided into thirty-two sub-orders, each of which is comparable with the corresponding England and Wales sub-order, with the following exceptions:—

Nr	nern Ireland		orresponding
	ib-orders.	Eng	gland and Wales Sub-orders.
III.	2.	III.	2-4.
IV.	1.	IV.	1 and 2 .
VII.	2.	VII.	2 and 3 .
VII.	3-7.	VII.	4-8 respectively.
XIX.	1.	XIX.	1-3.
XX.	1 and 2 .	XX.	2 and 3 respectively.
XX.	3.	XX.	l and 4.
XXIII.	1.	XXIII.	1 and 2.

Within the sub-orders are 341 occupational headings, evolved by processes both of grouping and expansion from the England and Wales headings, which number 611.

^{*} Full details of the English system of classification are published in the "Classification of Occupations, Census, 1921," to be purchased directly from H.M.S.O., or through any Bookseller.

INDUSTRIES.

The industrial classification is based on that used in the Reports on the Census of England and Wales, 1921.*

It will be seen that there are twenty-two orders. Each of these covers the same industrial ground as the England and Wales orders. Nine of the orders are divided into thirty-eight sub-orders, each of which is comparable with the corresponding England and Wales sub-order, with the following exceptions:—

	hern Ireland ub-orders.	Corresponding England and Wa Sub-orders.				
XVI.	5.	XVI.	5-7.			
XVIII.	1.	XVIII.	1 and 2 .			
XVIII.	2.	XVIII.	3.			

Within the sub-orders are 226 industrial headings, evolved by processes both of grouping and expansion from the England and Wales headings, which number 477.

BIRTHPLACES.

Persons stated to have been born in Ireland—the County name or "Irish Free State" not being inserted—are assumed to have been born in the Irish Free State. Where nationality is given but birthplace is not, it has been assumed that the person was born in the country of which he or she is a national. All persons of British nationality and unstated birthplace have been regarded as born in the County of enumeration.

RELIGIOUS PROFESSIONS.

The religious professions, other than Roman Catholic, Presbyterian, Church of Ireland, and Methodist, have been classified under the headings set out at foot of Table 18, separate mention being made of all professions containing 10 or more adherents. The heading "Presbyterian" includes those who call themselves by this name without qualification, together with those returned as members of the Established Church of Scotland. Other Presbyterian denominations are shown at the foot of the table. Members of the Church of England and the Episcopal Church of Scotland have not been included under Church of Ireland except where stated. The latter group includes all persons returned as "Church" or "Episcopalian."

ORPHANHOOD.

In compiling statistics under this head, step-parents, foster-parents, and adoptive parents, so stated, have been treated in the same manner as natural parents. Where the information as to one parent is stated as "not known," that parent has been assumed to be dead and the case dealt with accordingly. Where information as to neither parent is given, the case has been placed in the "No Statement" group.

INFIRMITIES.

1. Deaf and Dumb, Dumb, Blind. The figures given are in respect of persons so returned, except where the answers indicate only partial infirmity as "nearly blind."

^{*} Full details of the English system of classification are published in the "Classification of Industries, Census, 1921," to be purchased directly from H.M.S.O., or through any Bookseller.

- 2. CRIPPLED. In addition to those persons specifically described as "Crippled," the figures given include all cases in which it is clearly indicated that the person
 - (a) has suffered a total permanent loss of the use of arm, hand, leg, or foot;
 - (b) is permanently crippled in such a degree as to prevent the free pursuit of most ordinary occupations.

The following cases, treated as "Crippled," indicate the variety of the terms used in answering the question on the Census schedule:—

- Arm—deformed, disabled; hand—deformed; hip joint disease; knee—decayed, tubercular arthritis in; leg—disabled, diseased bone in, infirm, short; on crutch; paralysis—infantile, nervous, of arms and side, of legs and back, of spine; rheumatoid arthritis; spinal caries; unable to walk.
- 3. Mentally Afflicted. All cases returned, whatever the degree of affliction, are included in the tables. The following terms were used in the returns:—

Afflicted; feeble minded; imbecile; melancholia; mental debility; simple; weak intellect.

4. Persons suffering from more than one infirmity have been classified to that which appears most likely to constitute the greater, or greatest, disability, infirmities being graded for this purpose from greatest to least, thus:—

Mentally afflicted; blind; crippled; deaf and dumb; dumb.

CONVENTION AS TO DOTS (.) AND DASHES (--).

Throughout this volume dots (.) are used in tabular matter to indicate nil (0), and dashes (—) are used to indicate that information cannot or is not intended to be given.

CORRECTION OF CENSUS DATA.

Every effort has been made to eliminate, as far as practicable, errors and inaccuracies from the Census data. The process of correction began with the Enumerators, who received full instructions as to the action to be taken in cases of error or omission; it was continued by a system of check applied at each stage of the office work; and was completed by an intensive scrutiny and intercomparison of the tabulation sheets. This scrutiny and comparison revealed a certain number of incongruities, which, when material, were investigated and corrected in the light of the facts disclosed. Errors of a minor nature (i.e., such as could not affect the statistical value of the Census tables) were adjusted more or less arbitrarily.

PART II.

STATISTICAL NOTES.

The definitions, etc. contained in Part I of this volume apply with equal force to the contents of these notes and to the tables contained in Part III. Roman numerals are used in this volume for the tables in Part II., and Arabic numerals for the tables in Part III.

AREA.

The area of the Borough of Belfast, which in 1851 was roughly $2\frac{1}{2}$ square miles, now comprises (as a result of the boundary extensions in 1853 and 1896) some 23 square miles, exclusive of tidal water. It will be noted from Table I that within the Borough boundary there are almost $11\frac{1}{2}$ square miles of land under crops and pasture, as against $10\frac{1}{2}$ square miles covered by buildings and roads.

POPULATION.

The population numbers 415,151 persons, having doubled in the past 45 years and being nearly six times as great as that enumerated in 1841. The increase over the past 15 years however, only amounts to 7.3 per cent., which is the smallest percentage increase yet recorded. The actual increase is 28,204 persons, which is smaller than any decennial increase recorded since 1851. (Figures for the earlier periods are shown in Table 2.)

Net move-Intercensal Population Excess of Intercensal ment out-Births Deaths Births over wards from Period at beginning variation in of Period. Registered. Registered. Deaths. Population. the Co. Boro. (a)Col. (5)-Col. (6). (2)(3)(4)(5)(6)(7)(1)112,072 74,036 38.036 + 37,767 1901-1911 349.180 269 386,947 158,671 102,094 56,577 + 28,204(b) 28,373 1911—1926

TABLE I.

While comparable figures of natural increase due to the excess of births over deaths are not available for periods prior to 1901 (see footnote (a) to Table I), it is evident that the rapid increase in the population from 1821 to 1901 was in part due to considerable gains from net movements into the City. This augmentation of natural increase was arrested over the period 1901 to 1911, when the outward movement of population almost exactly balanced the influx, and in the last intercensal period we find the net movement converted into such a substantial outward one as materially to offset the increase in population which would other-

⁽a) Owing to the extension of the Borough boundary in 1896, and the fact that registration areas did not coincide with the area of the Borough prior to 1899, it is not practicable to show figures in this table for periods prior to 1901.

⁽b) Including the deaths of non-civilians of Belfast County Borough which occurred outside Northern Ireland. It has not been found possible to estimate the number of these deaths at all closely, but from the War mortality lists of soldiers from Ireland, which were compiled by the War Office from regimental records, it appears that for the whole of Northern Ireland the non-civilian deaths which occurred outside the country numbered about 10,000 during the last intercensal period, exclusive of the deaths of regular soldiers stationed outside the country at the date of the 1911 Census.

wise have been experienced from the excess of births over deaths. In this connection account should be taken of the increasing tendency of City workers to live in the country or at the seaside. Evidence of this tendency is apparent from the present trend of population in those urban and rural districts within easy reach of Belfast.

^{*} Exclusive of 1,723 acres tidal water.

From Table II it is seen that fourteen out of the fifteen wards of the County Borough show increases of population during the past 15 years, but the average rate of increase per annum is considerably less in all the wards, except Court, Dock, and Smithfield, than during the preceding intercensal period of ten years. It is interesting to note that, according to the persons per acre rates, these three are amongst the four most thickly populated wards in the County Borough. Such density rates, however, should only be used with reserve in measuring the degree of "overcrowding" in urban areas, since the acreages of these areas may include widely differing proportions of waste land, land under pasture, etc. The greatest actual increase in population during the past 15 years was in Ormeau Ward, and the greatest percentage increase was in Falls Ward. In St. George's Ward there was a small decrease.

Tables 3 and 4 provide more detailed information regarding the population in the various sub-divisions of the County Borough and for convenience Table 3 incorporates figures of rateable valuation. The rateable valuation has increased from £1,527,932 to £1,793,563 over the past fifteen years, an increase of 17 per cent. as compared with the 7 per cent. increase of population recorded for the County Borough.

Note.—The present Parliamentary Divisions were created by the Government of Ireland Act, 1920, and are constituted as follows :-

EAST BELFAST. -Dock, Pottinger, and Victoria Wards

NORTH BELFAST. - Clifton, Duncairn, and Shankill Wards.
SOUTH BELFAST. Cromac, Ormeau, and Windsor Wards.
WEST BELFAST. - Court, Falls, St. Anne's, St. George's, Smithfield, and Woodvale Wards.

Parliamentary Constituencies.—In considering the percentages shown in Table III, regard should be given to the qualifications entitling a person to be registered as an elector. In general, a man is qualified if 21 years of age or upwards, with the requisite residence or business premises qualification: a woman, if 30 years of age or upwards, and if (1) entitled to be registered as a local government elector in respect of the occupation of land or premises (not being a dwellinghouse) of a yearly value of not less than £5, or of a dwelling-house; or (2) the wife of a husband entitled to be so registered.

It may be noted that a person may be registered as a parliamentary elector in a constituency although not resident therein.

The question of the comparison of the number of parliamentary electors with population will be dealt with more fully in the General Report.

BUILDINGS, ROOMS, AND FAMILIES.

Houses.—While there are differences in the definitions of the term "House" as used in 1911 and 1926, they do not affect to any appreciable extent the comparisons shown in the following table. The houses dealt with in this table embrace all types of buildings, etc. Tables 6 and 9 deal separately with private houses and each of the other types of inhabited buildings, etc.

Year of Enumera- tion.	Total Population less Inmates of Institutions.	Total.	Hou Inhabited.	Unin- habited.	Building.	Average Number of Persons per Inhabited House.	Number of Families in occupation of all Inhabited Houses.	Average Number of Persons per Family.

1926	411,057	84,667	82,638	1,714	315	4.97	89,724	4.58

TABLE IV. *

The total number of houses in the County Borough increased by 5.5 per cent. since 1911, as compared with the increase in population of 7.3 per cent. There has, however, been a considerable reduction in the number of uninhabited houses, the 1926 figure for which is the smallest recorded since 1861. The resulting position is that the number of inhabited houses has increased since 1911 by practically 10 per cent., i.e., a figure appreciably in excess of the population increase.

The number of houses under construction was more than twice as many as in 1911, but appreciably less than in 1881, 1891, and 1901.

Persons per Inhabited House and Persons per Family.—The average number of persons per inhabited house, which showed a steady decrease from 1851 to 1911, has again shown a decrease from 1911 to 1926. The average number of persons per family, which was practically constant for the period 1881—1911 has also shown a marked fall. In this connection it should be remembered that the Census family (defined on page vii) is not to be confused with the natural family of parents and children.

The figures of the number of families per 100 inhabited houses at earlier census enumerations commencing with 1871 are as follows, 131, 119, 110, 104 and 103 in 1911, whilst for 1926 the figure is 109. In this respect therefore there has

^{*} The figures given are for the Borough as constituted at the date of each Census. The boundary of the Borough was extended in 1853 and again in 1896.

apparently been a slight retrograde movement since 1911—a result to be expected from the fact that the proportion of families to population has increased at a greater rate than that of inhabited houses to population.

Housing in Wards.—Table V shows that in ten of the wards there has been an increase in the total number of houses and in five a decrease. Comparison of this table with Table II also shows that the changes in houses, as compared with population, reveal the greatest divergencies in the Smithfield and Court Wards. In these cases, while the population increased by 5.7 per cent. and 6.5 per cent. respectively, the numbers of houses decreased by 10.5 per cent. and 8.6 per cent.

The extent of sub-letting in the various wards is best indicated by the factor "number of private families per inhabited private house." This factor is readily obtainable from the figures of house accommodation contained in Table 7, and it is seen that the number of families per 100 private houses is 109 for the County Borough, and that this rate varies between 125 for the Smithfield Ward and 105 for the Ormeau and Windsor Wards. Sub-letting is thus most prevalent in the Smithfield Ward where 22 per cent, or, roughly, 1 in 5, of the houses sub-let or take in lodgers who do not board with the family.

Of all the inhabited private houses in the County Borough 92 per cent. are occupied by single families and 63 per cent, contain 4 to 5 rooms.

⁽a) Families.—For 1926, Census families residing in private houses only were taken, but for 1901 and 1911 all Census families were included, it being impracticable to segregate the figures for private families.
(b) Persons.—For 1926 the population in private houses only was taken, and for 1901 and 1911 that taken was the total population less the inmates of institutions.

Accommodation of Families and Persons.—The slight difference in treatment necessarily employed in dealing with the 1901 and 1911 families and persons figures in Table VI has but a small effect upon comparisons between the three Census years, the 4.45 persons per family in 1926 becoming 4.58 if adjusted to agree with the figures for the previous years. A comparison of the 1926 with the 1911 figures of accommodation of private families reveals a decided movement towards smaller sized units of occupation, 52 per cent. now consisting of 3 and 4 rooms as against 29 per cent. in 1911. The percentage of persons in occupation of 3 and 4 roomed units shows an even greater increase, i.e., from 27 per cent. in 1911 to 54 per cent. in 1926.

With regard to the size of families in relation to units of occupation, we find that whilst on the average the 1926 census family is smaller than that in 1901

and 1911, the sizes of families occupying less than 4 rooms are greater than the corresponding families in those years. It will also be seen that the average size of families occupying 5 or more rooms is appreciably less than in 1901 and 1911 and is indeed smaller than that of families occupying 4 rooms in 1926.

The occupied room accommodation in Belfast County Borough approximates to one room per person, but certain of the wards exhibit marked variations from this average. The lowest amount of accommodation per person is in the Smithfield Ward where there is an average of roughly 3 rooms for every 4 persons. The next in the scale is the Falls Ward where the low figure for rooms per person is coupled with the largest number of persons per family. The Windsor Ward gives the highest accommodation figure of rooms per person in conjunction with the lowest number of persons per family. A detailed analysis of the room accommodation, coupled with the size of family, etc., appears in Table 8. Over 40 per cent. of the families in the County Borough are seen to occupy 4 rooms each—the family of 3 occurs most frequently,—the most common combination consists of families of 4, each family occupying 4 rooms,—there are 120 cases comprising 794 persons where 6 or more persons are occupying a single room, 5 cases comprising 62 persons at a similar density of occupation in two roomed dwellings, etc.

TABLE VII.

Table VII, in conjunction with Table 8, will enable comparisons to be made between the density of occupation in each ward. In these tables the density of 2 persons and less per room has not been sub-divided, but this is not intended to imply any judgment as to what in fact constitutes adequate accommodation, since this matter obviously could not be determined without a knowledge of other factors, such as size of rooms, sanitary and water provision, etc. Sub-divisions other than those set out in summary form can readily be calculated from the details given in the first nine columns of Table 8.

In the County Borough it is seen that 14 per cent. of the private family population occupy premises at a density of more than 2 persons per room. The greatest density of occupation is found in the Smithfield Ward where more than 31 per cent. of the private family population occupy premises at a density of more than 2 persons per room.

Comparison of Units of Occupation with Inhabited Private Houses.—Another comparison which may usefully be made is that shown in Table VIII, the figures for which have been extracted from Tables 7 and 8. Similar comparisons can be made for each ward.

TABLE VIII.

Number of Rooms.	Units of Occup by Privat	oation Inhabited e Families.	Inhabited Private Houses.		
Number of Rooms.	No.	Per cent.	No.	Per cent.	
1-3 4-5 6 and over	21,086 47,286 18,934	24.2 54.1 21.7	9,884 50,343 19,993	12.3 62.8 24.9	
Totals	87,306	100.0	80,220	100.0	

It is seen that the separate families (some including boarders) living in 1 to 3 rooms are more than twice as numerous as the number of inhabited private houses containing a similar amount of accommodation. Conversely, in the case of accommodation of 4 rooms and over the number of inhabited private houses exceeds the number of units of occupation. These comparisons alone furnish no indication of housing shortage, since, for example, the 1 to 3 roomed units of occupation are to be found in houses of all sizes. Still, it is clear that more than one *half of the families living in 1 to 3 rooms only occupy a portion of a house each, and if this suggests the need for more structurally separate premises for the use of these families in order to secure for them a greater degree of family privacy, it should be remembered that if such new premises contained no more room accommodation than the units of occupation under consideration, much of the overcrowding, which at present undoubtedly exists in some quarters, would continue. In this connection special attention is drawn to the varying sizes of families in 1 to 3 room accommodation as set out in Table 8. The average density of occupation of families living in 1 to 3 rooms is 1.6 persons per room, as against 0.9 persons per room in the case of families living in 4 or more rooms.

Housing in Textile and Shipbuilding Industries.—Table IX was prepared with a view to ascertaining the housing conditions of persons engaged in the main occupations of the textile and shipbuilding industries. In considering this table it should be remembered that the significance of the figures lies perhaps in the fact that they reflect the housing conditions of the families with which persons in certain occupations are associated rather than the housing conditions incident to particular occupations. The tabulation, which was confined to persons living under ordinary domestic conditions (i.e., excluding those in institutions and large lodging houses), deals directly with nearly 40,000 occupied persons, and thus brings under review the accommodation of about one-third of the population of the County Borough.

The families of the carpenters appear to be enjoying the most accommodation, nearly one half of these occupying one room or more per person. The next group is that including the more skilled grades of metal workers. Following closely in turn we find the winders, weavers, shipyard labourers, rivetters, general labourers, and last of all the spinners and piecers.

As between the workers in the shipbuilding and other industries, the former appear to be slightly the better accommodated, both as regards each group of occupations shown and all of such groups taken together.

In general the table suggests that any differences between the housing standards obtaining in the textile, shipbuilding, and other industries are small, and that there is no serious divergence, even in the spinner and piecer, and unskilled labourer groups, from the housing standards obtaining in the County Borough as a whole.

INSTITUTIONS, ETC.

The population in each of the types of inhabited buildings, etc., other than private houses, is shown in Tables 9 and 10, together with the number of inmates in respect of institutions. The institutions are not individually identified as in 1911, but the number of institutions in each category is given. The inmates of the Poor Law Institution number 2,611 as against 3,207 at the date of the 1911 Census. Persons on shipboard number 416 as against 594 in 1911. "Other premises" include police and military barracks, residential schools, premises occupied by caretakers, etc.

SEXES, AGES, AND MARITAL CONDITIONS.

Table 11 shows the distribution of the population of the County Borough by sex, age, and marital condition. The following tables summarise the position in 1926 and the changes in the last intercensal period.

^{*} Including Divorced.

Excess of Females over Males.—Table 2 shows that the number of females per 1,000 males has steadily decreased from 1,194 in 1881 to 1,123 in 1926. Many more boys are born than girls, but, as Table 11 shows, the excess of males over females gradually decreases with increase in age until from about age 15 onwards the females are the more numerous.

Distribution according to Age.—As compared with the position in 1911 it may be remarked that the increase of 7.3 per cent. in the total population is shared by all quinquennial age groups except groups 5-9, 10-14, 35-39, and 70-74. The low birth rates experienced in the years 1916 to 1919 and the high infant mortality rates of the years 1917 to 1920 are reflected in the number of survivors of children born in those years, who now appear among the population aged 5 to 14. In the 35-44 age group, however, the loss which is confined to males is, probably, only in part due to the war deaths, the fact that the number of females does not show an increase commensurate with the general increase in population suggesting that there are also other causes contributing to the relatively low number of both males and females at these ages. As a result of these changes in age distribution it is found that the average age of the population has increased from approximately 26.7 years in 1911 to 28.5 years at the present time.

Distribution by Marital Condition.—The 7.3 per cent. increase in total population since 1911 is distributed over the males and females of the several marital conditions. Table XII. shows the percentage increases in the males and females of each marital condition since 1911.

14.	iaiitai	Cond	itioii.		Males.	Females.
Single Married Widowed				•••	1.5 20.3 12.7	0.8 18.8 9.1

To some extent the larger increases in the married and widowed groups are a natural corollary of the increase in age of the population as a whole.

EDUCATION.

From Table 12 it will be seen that of the total population in Belfast County Borough 20.0 per cent. of the males and 17.1 per cent. of the females are attending educational establishments.

Of the children aged 6 to 13 inclusive, 2.1 per cent. of boys and 2.4 per cent. of girls are not stated to be attending school.

At ages 15 to 19 inclusive, the persons still attending various kinds of educational establishments represent 13.7 per cent. of the males and 10.1 per cent. of the females.

In endeavouring to draw conclusions from this table it will be necessary to treat the Census figures relating to persons attending technical schools with considerable reserve, pending further investigation, since a marked difference has been found to exist between them and figures of pupils enrolled in technical schools as published by the Ministry of Education. Further reference to this matter will be made in the General Report on the Census relating to Northern Ireland as a whole.

OCCUPATIONS.

Proportion occupied.—From Table XIII. it will be seen that the changes in the percentages of persons occupied (i.e. persons whose normal occupation was stated) are in the same direction for males as for females in all the age groups. It should be remembered that both employed and out of work persons are included under the term "occupied." In age groups 12-19 and 65 and over the percentages

occupied are lower than in 1911, while at the intermediate ages of 20-64 the percentages have increased, the percentage of women occupied at these ages being appreciably higher than in 1911.

TABLE XIII.

			Males		1		Females.					
Age last Birthday.	Total.		Occupied.		Percentage of Occupied to total.		Total.		Occupied.		Percentage of Occupied to total.	
	1911.	1926.	1911.	1926.	1911.	1926.	1911.	1926.	1911.	1926.	1911.	1926.
12—19 20—24 25—44 45—64 65 & over	30,440 16,393 52,919 23,954 6,771	31,082 18,319 54,150 34,677 8,413	17,574 15,489 51,450 22,383 4,684	17,094 17,730 52,972 33,151 5,056	57.7 94.5 97.2 93.4 69.2	55.0 96.8 97.8 95.6 60.1	31,823 20,794 62,601 29,298 10,980	33,125 21,542 64,864 39,089 13,063	17,591 14,196 22,874 7,580 1,673	18,067 16,607 28,640 11,762 1,825	55.3 68.3 36.5 25.9 15.2	54.5 77.1 44.2 30.1 14.0
Total 12 and over.	130,477	146,641	111,580	126,003	85.5	85.9	155,496	171,683	63,914	76,901	41.1	44.8

Table XIV. brings into account children under 12 years of age, and shows that both for males and females the percentage of the total population occupied is higher than in 1911. In 1926, 48.9 per cent. of the population of both sexes and all ages were occupied and thus normally were wage earners. At ages under 20 the occupied as a percentage of the total population has fallen. This is partly due to the age constitution of the population now being higher than in 1911, and is possibly due in part to a smaller proportion of children of ages under 15 now being occupied.

The persons occupied or stated to be following an occupation in 1926 number 27,410 (14,423 males and 12,987 females) more than in 1911.

Numerically important Occupations.—When considering the grouping of occupations into orders and sub-orders it should be remembered that this grouping disregards the industries in which the persons may be engaged. For example, the occupational order XXII. (Transport Workers) includes all porters, messengers, carmen, etc., irrespective of industry, but excludes clerks, carpenters, navvies, etc., employed in the transport service. The latter occupations are included under occupational orders XXVIII., XV., XVII., etc., respectively.

^{*} Only orders or sub-orders showing proportions of 5 or more per 1,000 occupied males or females are included, and the Single or Grouped Occupations have been limited to those showing proportions of 10 or more per 1,000.

From Table XV, it is seen that some 40 per cent. of the occupied males are to be found under the three main groups or orders: VII., Metal Workers; XXII., Transport Workers; and XXIII., Persons engaged in Commerce, Finance, and Insurance. The occupations of most numerical importance among the males are: General Labourers; Clerks; Proprietors of Dealing Businesses; Salesmen and Shop Assistants; Builders, Bricklayers, Plasterers, Masons and their Labourers; Cabinet Makers and Carpenters; and Fitters and Millwrights. and their Labourers.

Of the occupied females 72 per cent. are included under the orders: XII., Textile Workers; XIII., Makers of Textile Goods and Articles of Dress; and

XXVII., Personal Service, the most important occupations numerically being Sewers and Stitchers; Domestic Servants; Weavers; Clerks and Typists; Spinners and Piecers; and Shop Assistants.

Table 13 shows the numbers of each sex included under each heading of the full occupational classification.

Occupational Status and National Health Insurance.—From the following table, which has been compiled from Table 14, it is seen that of the occupied males 1 in 11 are either employers or workers on own account, the proportion for occupied females being 1 in 17. Of the employees, apprentices and out of work taken together, those who were returned as out of work at the date of the Census represent 23 per cent. in the case of males and 14 per cent. in the case of females.

TABLE XVI.

	Occupational Status										
Occupational Status.	Males.	Females.									
Employers		2.4	0.4								
Workers on own account		5.2	2.2								
Employees		55.1	34.8								
Apprentices and Learners		5.3	1.4								
Out of Work		17.9	6.0								
Unoccupied, including Retired		14.1	55.2								
Total occupied and unoccupied aged 12 years and over	•••	100.0	100.0								
Entitled to benefits under N.H.I. Acts	***	59.3	35.9								

Of all the occupied population 68.3 per cent. of the males and 75.4 per cent. of the females are returned as being entitled to benefits under the National Health Insurance Acts. The corresponding percentages of the occupied population at the insurance benefit ages of 16 to 70 years are 71.3 for males and 80.2 for females. For employers and workers on own account of all ages, taken together, the percentages are 4.9 per cent. of the males and 4.0 per cent. of the females, and for employees, apprentices and out of work, taken together, they are 74.5 per cent. of the males and 79.8 per cent. of the females.

Of the unoccupied, including retired, 4.7 per cent. of the males and 3.8 per cent. of the females are returned as entitled to benefits.

Occupational Distribution by Marital Condition and Age.—Table 15 shows this distribution for each order and sub-order. Of the occupied males 42.6 per cent. are single, 52.7 per cent. are married, and 4.7 per cent. are widowed. Of the occupied females 73.4 per cent. are single, 19.5 per cent. are married, and 7.1 per cent. are widowed. The highest proportion both of boy and girl labour is founds among Transport and Communication workers, who include all messengers, without regard to their employers' industries.

INDUSTRIES.

Industrial Distribution of Occupied Population.—The distribution for certain main industrial groupings is shown in the following table.

TABLE XVII.

Order		Pers	sons.	Ma	iles.	Fen	nales.
or Sub-Order No.	Industry.	Number.	Proportion per 1,000 occupied.	Number.	Proportion per 1,000 occupied.	Number.	Proportion per 1,000 occupied.
I, II. III. (1) III. (2)	Fishing and Agriculture Mining and Quarrying Manufacturing Industries	818 79 117,779	4 581	779 76 66,791	6 1 530	39 3 50,988	$\frac{1}{663}$
—XIV. 5 XV. XVI.	(including Building) Gas, Water, Electricity Transport and Communication	1,833 10,847	9 53	1,802	14 84	31 227	3
XVII. XVIII.	Commerce and Finance Public Administration and Defence	00.010	162 63	23,487 11,257	187 89	9,432 1,429	123 19
XIX. XX. XXI.	Professions Entertainments and Sport Personal Service	7,364 1,349 14,860	36 7 73	3,569 986 4,607	28 8 37	3,795 363 10,253	49 5 133
XXII.	Other Industries or Industry not stated.	2,370	12	2,029	16	341	4
	Total	202,904	1,000	126,003	1,000	76,901	1,000

The Manufacturing Industries (using that term in a wide sense) directly provide a livelihood for 58 per cent. of the occupied population; Commerce and Finance (which includes the wholesale and retail distributive trades, banking, and insurance) provides for 16 per cent.; and Personal Service (which includes service in hotels, restaurants, etc.) for 7 per cent. The two main manufacturing industries are the Metal Trades (including vehicle and ship building) and the Manufacture of Textiles. These provide for 14 per cent. and 25 per cent. of the occupied population respectively.

The males outnumber the females in all the groups, except the Professions, where the females are slightly in excess, and Personal Service, where the females are more than twice as numerous as the males.

Table 16 shows the industrial distribution of the occupied population in greater detail, separate figures being given for each industrial order and sub-order.

BIRTHPLACES.

Table 17 shows, by sex, the numbers of persons born in each of the counties of Northern Ireland, other countries in the British Isles, and overseas dominions, in foreign countries, and at sea. Of the total population of Belfast, 64 per cent were born in the County Borough, 16 per cent. in the adjacent counties of Antrim and Down, and 8 per cent. in the other four counties of Northern Ireland. Only 0.74 per cent. were born outside the British Isles, and nearly one half of these were born in the British Dominions and Colonies. Persons born in foreign countries numbered only 1,754 and 48 persons were born at sea.

TABLE XVIII.

⁽a) Including Birthplace not stated. In 1926 these numbered 205.

From Table XVIII. it will be seen that the proportions of the population born in the several parts of the British Isles and abroad have varied little from census to census since 1881. The proportion per cent. born in Northern Ireland has increased by 1.17 since 1911, while the proportions for the other parts of the British Isles and abroad each show a decrease. This is the first occasion recorded of an actual decrease in the number of persons in the County Borough born in England and Wales, Scotland, and abroad.

RELIGIOUS PROFESSIONS.

It will be seen from Table XIX. that, whilst an increase in the numbers under each heading of the table has been recorded since 1911, it is only amongst Protestant Episcopalians and Other and not stated Denominations that any increased proportions of the population are shown. The increase amongst Protestant Episcopalians is both absolutely and relatively the highest. The number of Protestant Episcopalians now closely approaches that of Presbyterians.

⁽b) Persons born in the Isle of Man and the Channel Islands have been included under this heading. In 1926 they numbered 92 persons born in the Isle of Man and 54 in the Channel Islands.

⁽c) All figures relate to the Borough as constituted at the date of each census. The Borough boundary was extended in 1896.

⁽d) Figure not available.

It is interesting to note from Table 18 that the excess of females over males is relatively the greatest amongst Roman Catholics.

^{*} All figures relate to the Borough as constituted at the date of each Census. The Borough boundary was extended in 1896.

ORPHANHOOD.

Table 19 shows that, of the 128,437 children enumerated in Belfast County Borough at ages under 16, 12,837 have lost one or both parents. This figure excludes cases of orphaned children whose loss has been supplied by step-parents or adoptive parents, and 423 cases in which no statement as to parents was secured. Of the 12,837 orphans, 61 per cent. are fatherless and 32 per cent. are motherless, the remaining 7 per cent. being orphaned by the death of both parents. The high proportion of fatherless to motherless orphans is in part a corollary of the high proportion of widows to widowers, though to some extent it may be due to a possible tendency to regard the fathers of illegitimate children as dead if their whereabouts are unknown.

INFIRMITIES.

The number of persons returned as Deaf and Dumb is 309, or 16 less than the number returned in 1911. The Dumb Only numbered 36, which compares with 41 in 1911.

The number returned as Blind has increased from 379 in 1911 to 546 in 1926. The latter figure may be compared with the result of a special house to house census of blind persons, taken in 1921 by the Belfast Corporation, which gave a total of 561 blind persons at that time in the County Borough.

The total number of persons who have been classified as Crippled is 1,548, comprising 944 males and 604 females. It has not been found possible to test the reliability of this figure, and it should be accepted with due reserve, both on account of the broad interpretation, which necessarily had to be placed on the term "crippled" for classification purposes, and because of a possible reluctance on the part of some crippled persons to disclose their infirmity by stating it on the census schedule.

Of the 450 persons returned as mentally afflicted, 190 were enumerated in the Belfast Union Workhouse and 4 in other institutions. Figures comparable with these for the year 1911 are not available, but the persons returned at that Census as Lunatic, Idiot, or Imbecile numbered 991, including 811 enumerated in the Belfast District Asylum in Falls Road. This building is no longer used as an asylum, all Belfast cases, certified as lunatic, now being sent to the Belfast District Asylum, which is situated outside the County Borough at Purdysburn.

Particulars of the sex, age, and marital condition of persons suffering from infirmities will be found in Table 20.

[†] This figure comprises 125,166 Church of Ireland, 7,914 Church of England, and 20 Episcopal Church of Scotland.

•

PART III.—TABLES.

TABLE 1.—Area, Houses, and Population, 1926.

County Borough.

DEFINITIONS.—The terms "Area," "Houses," "Inhabited," and "Population" are defined on pages vi and vii.

TABLE 2.—Population 1821—1926.

County Borough.

- DEFINITIONS.— 1. The term "Population" is defined on page vi. The figures for 1821 to 1851 exclude members of H.M. Forces.
 - 2. The figures given for 1821 relate to the "Town" of Belfast; those for 1831 to the "Town and Suburbs"; and those for subsequent years to the area of the Borough or County Borough as constituted at the date of each Census. The boundary of the Borough of Belfast, defined in the Municipal Corporations (I) Act, 1840, was extended by the Belfast Borough Extension Act, 1853, and by the Belfast Corporation Act, 1896. By virtue of the Local Government (Ireland) Act, 1898, the Borough became a County Borough.
 - 3. It will be noted that the last intercensal period covers fifteen years.

TABLE 3.—Area, Population, Houses, Accommodation, and Valuation.

County Borough, District Electoral Divisions or Wards.

DEFINITIONS.— 1. Definitions of the terms "Area," "Population," "Houses," "Inhabited," "Private Families," "Rooms," and "Rateable Valuation" will be found on pages vi to viii.

2. Each District Electoral Division shown in the Table is coterminous with the Ward of the same name.

ARRANGEMENT.—The names of the Dispensary Districts included wholly or in part within each District Electoral Division are noted in the first column of Table. For entire Dispensary Districts see Table 4.

ABBREVIATIONS.— D. = Dispensary District: D.E.D. = District Electoral Division.

TABLE 4.—Area, Population, Houses, and Accommodation.

County Borough, Poor Law Union, (or Superintendent Registrar's District), Dispensary (or Registrars') Districts, and District Electoral Divisions.

- DEFINITIONS.— 1. Definitions of the terms "Area," "Population," "Houses," "Inhabited," "Private Families," and "Rooms" will be found on pages vi and vii.
 - 2. Each District Electoral Division shown in the Table is coterminous with the Ward of the same name.
 - 3. Dots (.) indicate nil (0), and dashes (—) indicate that information cannot or is not intended to be given.

ARRANGEMENT.—The reference in the second column of the Table is to the serial number prefixed to the name of each District Electoral Division in the first column of Table 3.

ABBREVIATIONS.— D. = Dispensary District: D.E.D. = District Electoral Division.
