## *GENERAL NOTES*

---

The figures contained in this Report may be regarded as superseding the provisional figures already published for the year 1972 in the Registrar General's weekly and quarterly returns.

The value of the statistical information concerning deaths contained in the Registrar General's Annual Reports and other publications is to a large extent dependent on the degree of care and accuracy with which the members of the medical profession enter the required particulars on the form of medical certificate of the cause of death.

Throughout the Report, births and deaths have been recorded according to date of registration and not to date of occurrence. They have also been allocated to the district of normal residence, if in Northern Ireland, births having been assigned to the districts containing the normal residence of the parents, and deaths to the districts containing the normal residence of the deceased persons. Events occurring in Northern Ireland relating to persons whose normal residence is outside Northern Ireland have been assigned to the district of occurrence.

Rates are assessed per 1,000 of the estimated home population as at 30 June unless otherwise stated. Marriage rates relate to the number of marriages solemnised, not to the number of persons married.

Comparisons with rates (births, deaths, etc.) recorded in other parts of the British Isles are included in several tables and diagrams. These comparisons are substantially correct but it should be remembered that (with the exception of Diagram 3) they are crude rates only and take no account of changes in or differences between the age and sex structure of the populations.

Generally speaking, the classifications adopted for the purposes of this Report are the Detailed and Abbreviated Lists contained in the "Manual of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1965."

The term cancer, where used, refers to all malignant neoplasms and neoplasms of the lymphatic and haematopoietic tissues, except Hodgkin's disease, leukaemia and aleukaemia (I.S.C. Nos. 201, 204-207).

Where more than one cause of death is reported, the death is classified according to the underlying cause, i.e. the disease or injury which initiated the train of morbid events leading directly to death. This method of classification is followed even if the deceased may have recovered from the underlying cause long before the date of death.

In the text and tables the term "neonatal mortality" relates to deaths of children under 4 weeks of age and the term "infant mortality" to deaths of all children (including neonatal) under 1 year of age. Perinatal deaths are deaths of infants under one week plus still-births.

In general in the tables and abstracts, dots (·) are used to indicate "none", and dashes (—) are used to indicate that information cannot be given or that the headings are not applicable.

## REPORT 1972

---

### SUMMARY

The rates for marriage and live births were lower than in 1971, the still-birth rate remained the same and the death rate was higher.

The following figures indicate the general trend of marriages, births and deaths over the past thirty years. More detailed comparisons will be found in Tables A and A1.

		1942	1962	1971	1972
Estimated population		1,296,000	1,435,400	1,534,000	1,549,400
Marriages	Number	11,673	9,842	12,152	11,905
	Rate	9.0	6.9	7.9	7.7
Live births	Number	29,645	32,565	31,765	29,994

## POPULATION

The population of Northern Ireland estimated as at 30 June, 1972 was 1,549,400 persons, an increase of 15,400 over the mid 1971 figure. This estimate, comprising civilians and members of H.M. Forces stationed in Northern Ireland, is based on the census taken on 25 April, 1971 (1,536,065 persons) revised to allow for natural increase and net migration. During the year ended 30 June, 1972, the natural increase of 14,000 (approx.) was off-set by net migration of 7,500 (approx.) Further details regarding migration are shown on page 41.

**TABLE C. Populations of counties, county boroughs and urban and rural areas as recorded at the censuses of 1901, 1926, 1951, 1966 and 1971 and as estimated at mid-year 1972.**

AREA	Census 1901	Census 1926	Census 1951	Census 1966	Census 1971*	Mid-Year Estimate 1972

The 1971 Census population by age and sex for Northern Ireland and for counties and county boroughs is given in Abstract 1.

1972 My figures were revised - see working paper's n (473)

## MARRIAGES

**Number and rate** Marriages registered during the year numbered 11,905 giving a rate of 7.68 per 1,000 population. The corresponding number and rate for 1971 were 12,152 and 7.92 respectively. In 11,303 (94.9 per cent.) of the total marriages both contracting parties were single; in 327 (2.7 per cent.) one or both were widowed and in 314 (2.6 per cent.) one or both were divorced. Of every 1,000 persons married, 14 were previously divorced. This rate is the same as that for 1971; comparative rates for the years 1962 and 1952 were 7 and 10 respectively. Further details are given in Abstracts 3 and 6.

The number of marriages celebrated in each month in 1972 was as follows:

January . .	679	April . .	1,103	July . .	1,502	October . .	877
February . .	589	May . .	635	August . .	1,510	November . .	614
March . .	759	June . .	1,262	September . .	1,584	December . .	791
Qtrs.: 1st . .	2,027	2nd . .	3,000	3rd . .	4,596	4th . .	2,282

This shows that the period July to September was the most popular quarter for weddings, September heading the monthly totals with 1,584. February was the least popular month.

**Ages at marriage** Although the most popular age for marriage was 22 years for men and 21 years for women, the arithmetical average age of men marrying in 1972 was 25.5 and of women 23.3. During 1971 this age was 25.7 among men and 23.5 among women. In 1962, the average age was 27.8 for men and 24.9 for women. The mean age at marriage of persons marrying for the first time in 1972 was 24.7 years for men and 22.7 years for women. Of the contracting parties 0.7 per cent. of the husbands and 5.9 per cent. of the wives were minors (the age of majority was lowered from 21 to 18 from 1 January 1970) the relative figures for 1962 being 10.9 per cent. and 28.3 per cent. Further statistics will be found in Abstracts 4, 5, 6 and 7.

**Method of celebration** Table D shows the marriages registered during the years 1927, 1937, 1951 and 1965 to 1972 according to the form of celebration and Table D1 gives further details of marriages in 1972.

Marriages taking place in registrars' offices in the year under review represented 6.8 per cent. of the total marriages as compared with 7.1 per cent. in the previous year.

*TABLE D. Northern Ireland: Marriages registered according to form of celebration, 1927, 1937, 1951, 1965-1972.*

### LIVE BIRTHS

**Number and rate** Live births registered during 1972 numbered 29,994, 1,771 fewer than in 1971. The birth rate was 19.4 per 1,000 of the estimated population, being 1.3 below the rate for 1971.

The monthly incidence of births was as follows:

January	.2,555	April	.2,553	July	.2,318	October	.2,525
February	.2,452	May	.2,661	August	.2,753	November	.2,346
March	.2,508	June	.2,738	September	.2,512	December	.2,073
Qtrs.: 1st	.7,515	2nd	.7,952	3rd	.7,583	4th	.6,944

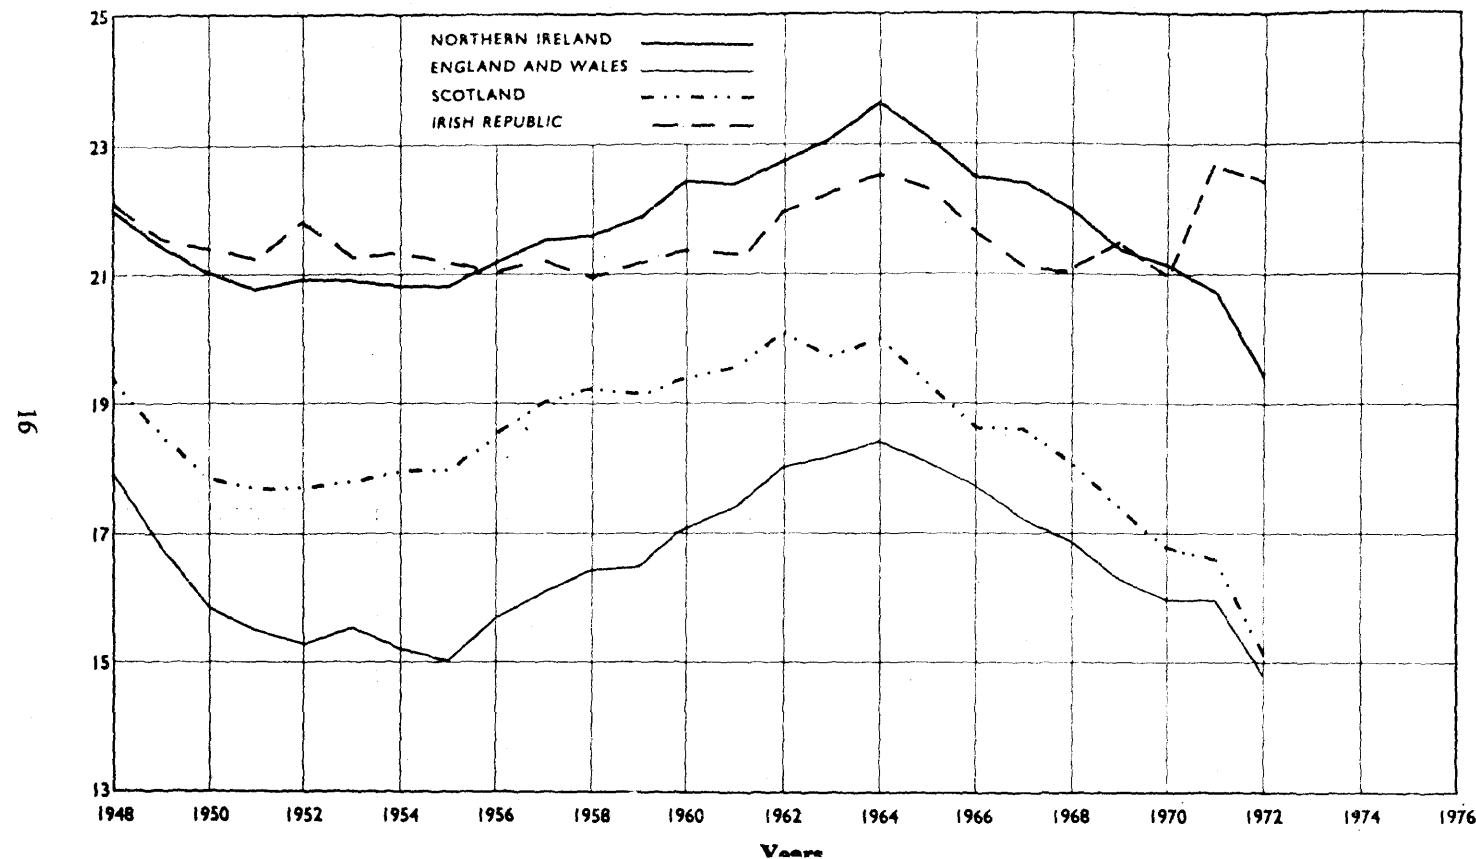

Compared with 1971, the first, second, third and fourth quarters showed decreases of 780, 255, 467 and 269 respectively.

TABLE E. Northern Ireland: Live births, numbers and rates by area, 1969-1972.

AREA	Number				Rate per 1,000 of the population

\*Excluding County Borough.

**DIAGRAM 2. Birth rates (crude) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1948-72.**  
Rate per 1,000 population.

Births registered during 1972, where the normal residence of the parents was outside Northern Ireland, numbered 196 as compared with 279 in 1971. In 107 cases an address in the Irish Republic was given, and of these, 80 births occurred in hospitals: the 1971 figures were 163 and 104 respectively. In 13 cases the parents were itinerants having no fixed abode and all of these births took place in hospitals.

**Proportion of males to females** Births of males in Northern Ireland in 1972 numbered 15,559 and those of females 14,435, the proportion of male to female births being 1,078 to 1,000. The corresponding proportions for each of the five years 1967-71 were 1,057, 1,070, 1,049, 1,064 and 1,081 respectively.

**Illegitimate births** The number of illegitimate births was 1,263. This was 56 more than in 1971. The proportion to total live births (4.21 per cent.) was 0.41 above that for the previous year. In England and Wales, Scotland and the Irish Republic, the illegitimate births as percentages of the total live births in the year 1972 were (provisionally) 8.6, 8.5 and 2.9 respectively.

TABLE E1. *Northern Ireland: Illegitimate live births by area, 1969-72.*

\*Excluding County Borough

**Multiple births** Up to and including 1960, the birth of one live and one still-born infant was regarded as a single birth and the birth of two live infants and one still-born infant as a twin birth. Since 1961 still-births have been registered and these are now being taken into account to obtain accurate figures for single and multiple births. Of the 29,994 live births, 29,347 were the product of single, 637 of twin, 6 of triple, and 4 of quadruple pregnancies. Table E2 gives the multiplicity of all births.

TABLE E2. Northern Ireland: *Multiple births*, 1972.

**STILL-BIRTHS**

**Number and rate** The number of still-births registered in 1972 was 434 giving a rate of 14 per 1,000 births (live and still). The relative numbers and rates for the period 1969-1972 are shown in Table F. Comparative 1972 figures in England and Wales and Scotland were 8,794 and 12 and 1,053 and 13 respectively.

Abstract 11 shows the numbers of still-births in administrative areas by sex. The number of still-born children who would have been illegitimate had they been born alive was 34 representing 7.8 per cent. of all still-births. Thirteen of the still-births were the product of multiple confinements further particulars of which will be found in Table E2 above. In 302 cases the births occurred after a period of less than 37 weeks gestation or the weight of the foetus was not more than 5½ lbs. Of the 434 still-births 372 were certified by doctors, 60 by midwives and 2 by coroners. Post-mortem examinations were held in 116 cases. Abstract 10 shows still-births by cause, sex and period of gestation. The percentage of still-births which occurred in hospitals in 1972 was 97.9 compared with 98.5 per cent. in 1971.

**TABLE F1. Northern Ireland: Still-births in hospitals etc., and parity\* of mother 1972.**

Place of confinement	Total still-births	Parity of mother											
		0	1	2	3	4	5	6	7	8	9	10 and over	Not stated
In hospital . .	425	152	59	58	52	25	20	7	7	8	3	6	28
In own homes, nursing homes and all other places . .	9	3	1	.	1	.	.	.	.	1	.	.	3
TOTAL . .	434	155	60	58	53	25	20	7	7	8	4	6	31

\*Parity has been taken to mean the number of children born (live and still) to the mother as the result of previous pregnancies.

Congenital malformations caused 129 still-births (i.e. 29.7 per cent. of the total). This group was also the main cause in 1971 when the corresponding figures were 139 and 30.1 respectively.

## DEATHS

**Number and rate** The number of deaths recorded during the year 1972 and the death rate per 1,000 of the population were 17,032 and 11.0 respectively. The comparable figures for 1971 were 16,202 and 10.6.

The monthly incidence of deaths was as follows:

January .	1,598	April .	1,356	July .	1,195	October .	1,363
February .	1,721	May .	1,484	August .	1,246	November .	1,356
March .	1,589	June .	1,322	September .	1,236	December .	1,566
Qtrs.: 1st .	4,908	2nd .	4,162	3rd .	3,677	4th .	4,285

Of the total deaths 9,001 were of males and 8,031 were of females, the equivalent annual death rates being 11.8 and 10.2 per 1,000 of the male and female estimated populations, respectively. The corresponding rates for 1971 were 11.4 and 9.8.

According to the ages stated to registrars, 727 (4.3 per cent.) of the total deaths were of children under 5 years of age and 11,661 (68.5 per cent.) were of persons aged 65 and upwards. There were 193 deaths of persons (65 males and 128 females) aged 95 and upwards and this number included 3 males and 6 females at 100 years, 1 male and 3 females at 101, 4 females at 102, 2 females at 103, 1 female at 104 and 1 female at 105.

Table G gives a partial analysis of deaths by age for each sex and the percentage of the total deaths in each group.

**TABLE G. Northern Ireland: Deaths by sex and certain age-groups and as percentage of total deaths, 1972.**

		Total	Under 1 year	1-14 years	15-44 years	45-64 years	65 years and over
Number of deaths	P	17,032	616	231	874	3,650	11,661

**DIAGRAM 3. Death rates (standardised) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1948-72**  
Rate per 1,000 population.

**Area mortality comparisons** Indices of mortality by sex and principal cause on an age-standardised basis are presented with the addition of Standardised Mortality Ratios (S.M.R.) in Abstract 17 of this year's Report. The S.M.R. shows the number of deaths registered in each area as a percentage of those which would have been expected in that area had the age-specific death rates of the total Northern Ireland population operated in the corresponding population age-groups of that area.

**Deaths in hospitals** The number of deaths occurring in hospitals in each of the years 1963–1972 is shown in Table J. Of the deaths registered in 1972, 56.7 per cent. took place in hospitals (3.2 per cent. in mental hospitals). It will be seen from Table J that the percentage of deaths occurring in hospitals has been increasing steadily through the years, with the exception of the years 1966 and 1972. The proportion of deaths occurring in institutions in 1942 amounted to 30.0 per cent. of the total deaths.

TABLE J. *Northern Ireland: Deaths in hospitals, 1963–1972.*

	1963	1964	1965	1966	1967	1968	1969	1970	1971	1972

Other hospitals . . .	7,100	7,603	7,723	8,135	7,530	8,165	8,591	8,857	8,738	9,113
Elsewhere . . .	8,189	7,309	7,190	7,764	6,626	7,184	7,163	7,103	6,906	7,377
Total deaths . . .	15,899	15,354	15,551	16,441	14,671	15,933	16,338	16,551	16,202	17,032
Percentage of deaths in hospitals . . .	48.5	52.4	53.8	52.8	54.8	54.9	56.2	57.1	57.4	56.7

**Cause of death** Where more than one cause of death is reported the death is classified to the underlying cause, i.e., the starting point in the sequence of events leading to death. See General Notes on page 8.

**Proportion of deaths from principal causes** Abstract 15B sets out the causes of death as proportions per 1,000 of the total deaths in certain age-groups by sex. Heart diseases continued to bear by far the greatest proportion of the total deaths; other diseases having a high proportion were cancer, cerebrovascular disease (mainly cerebral thrombosis and cerebral haemorrhage) and respiratory diseases.

At ages under one year congenital malformations, premature birth, and pneumonia were the principal causes of death.

Between the ages of one and ten the highest proportions were caused by accidents, congenital malformations, cancer, Hodgkin's disease and leukaemia and pneumonia.

Between the ages of ten and twenty-four, accidents caused by far the largest proportion of deaths. The proportions from cancer, congenital malformations and Hodgkin's disease and leukaemia were also high.

Between the ages of twenty-five and forty-four the principal causes were cancer, heart diseases, accidents, suicide and cerebrovascular disease.

From age forty-five the pattern was heart diseases followed by cancer, cerebrovascular disease and respiratory diseases.

Table K shows, for each of the principal causes, the numbers of deaths and the death rates for each year since 1969.

**Deaths from the principal epidemic diseases** A total of 127 deaths (0.07 per 1,000 population) fell within this group. Of these, 107 were caused by influenza and 20 by diarrhoeal diseases of children under 2 years of age. No deaths resulted from the other diseases comprising this group, viz., measles, dysentery, whooping cough, diphtheria, smallpox, typhus, typhoid fever, scarlet fever, paratyphoid fever and acute polio-myelitis.

The number of deaths from the principal epidemic diseases in 1971 was 86 and the relative rate was 0.06. The higher incidence of deaths from influenza in 1972 accounted mainly for the increase in deaths in this group.

TABLE K. Northern Ireland: Causes of death and death rates per 100,000 of estimated population, 1969-1972

See definition on page 8.

The notifications of certain infectious diseases for each administrative area in Northern Ireland for the year 1972 are shown in Abstract 31, and the diseases named are those laid down by regulations (issued by the Ministry of Health and Social Services) as compulsorily notifiable throughout Northern Ireland.

**Influenza** There were 107 deaths from influenza in 1972 as against a total of 51 in 1971. The relative rates per 1,000 of the population were 0.07 (1972) and 0.03 (1971).

**Tuberculosis** Deaths from this cause numbered 49 compared with 43 in 1971. The rate of 0.03 per 1,000 population is the same as that for 1971. Further details of comparable figures over the past years may be seen at a glance in Tables L and L1.

The tuberculosis death rates (provisional) for England and Wales, Scotland and the Irish Republic in 1972 were 0.03, 0.04 and 0.06 respectively.

**TABLE L. Northern Ireland: Deaths and death rates from tuberculosis (all forms), 1926, 1937, 1951 and 1961–1972.**

More detailed information about deaths from tuberculosis is given in Abstracts 12 and 17.

**Cancer\*** The number of deaths from cancer in Northern Ireland during 1972 was 2,614 giving a death rate of 1.69 per 1,000 of the population which is 0.11 below the rate for 1971.

The death rates from cancer and tuberculosis were roughly the same in 1931 (i.e. 1.26 for cancer and 1.23 for tuberculosis). Since then the cancer rate has increased by 34.1 per cent. and the tuberculosis rate has decreased by 97.6 per cent.

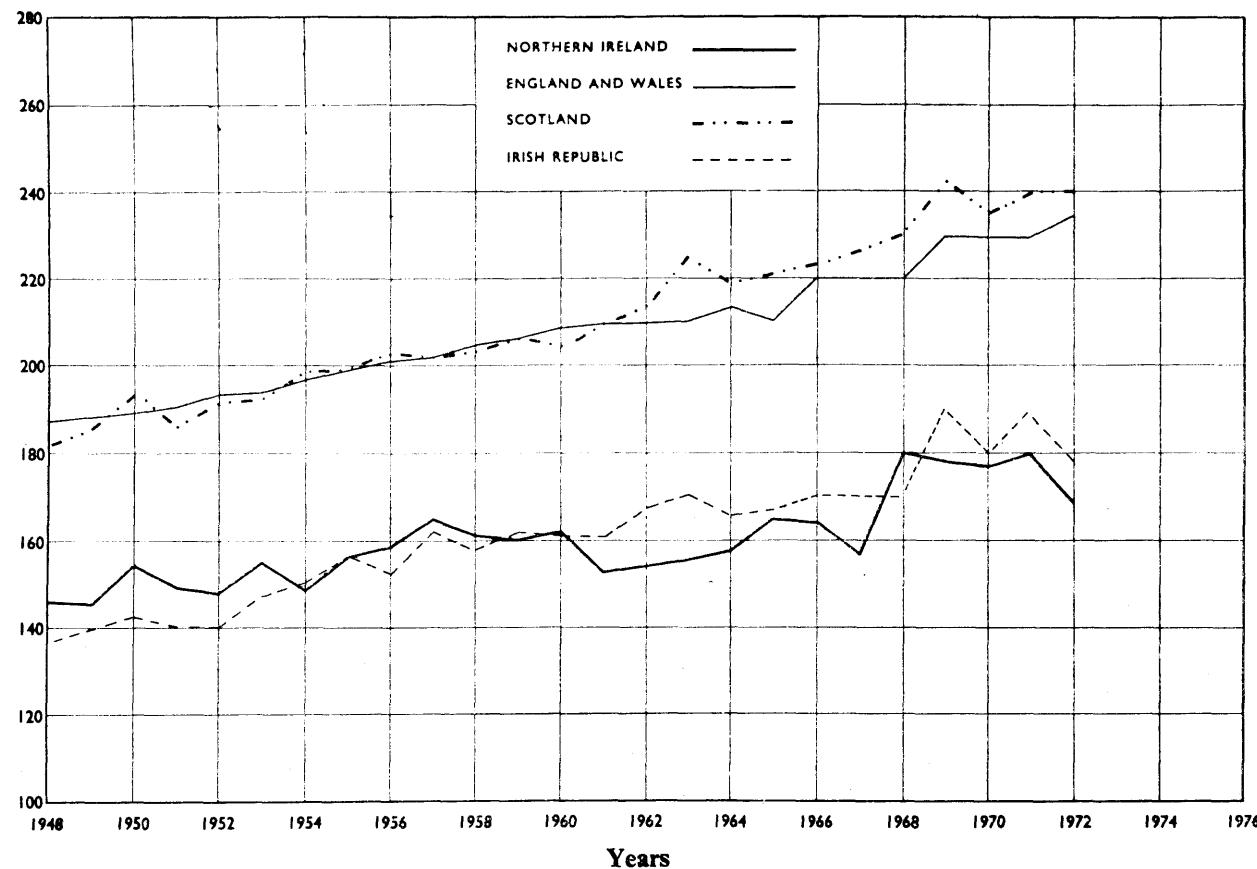

TABLE M. *Northern Ireland: Deaths and death rates from cancer, 1926–1937, 1951 and 1959–1972.*

\* See definition on page 8

**DIAGRAM 4.** Death rates (crude) from cancer in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1948-72. Rate per 100,000 population.

26

As will be seen from Abstract 12 the most frequent sites of fatal cancer among males during the year were bronchus and lungs, 431; stomach, 181; intestines, 135; prostate, 112; pancreas, 75 and rectum, 74. Among females the most frequent sites were breast, 241; intestines, 175; stomach, 140; bronchus and lungs, 111; pancreas 58; rectum 54 and ovary, fallopian tube and broad ligament 65.

For many years cancer of the stomach proved to be the most frequent site of fatal cancer for both sexes and it remained so among females up to 1961 when it took second place to cancer of the breast. Since 1954 however, cancer of the lung has been more prevalent among males. The number of male deaths from this cause increased each year since 1945, with the exception of 1958, 1960, 1962, 1964, 1970 and 1972 in each of which years there was a slight decrease compared with the year immediately preceding.

Table M1 shows the numbers and rates of lung cancer deaths by sex for the past ten years. Abstract 12 gives particulars regarding the cancer sites by sex and age-groups and Abstracts 11, 17 and 21 give details of cancer incidence in administrative areas.

TABLE M1. *Northern Ireland: Deaths and death rates from lung cancer, 1961-1972.*

YEAR	Number			Rate per 100,000 population		
	Males	Females	Persons	Males	Females	Persons
1961	317	48	365	46	7	26
1962	296	64	360	42	9	25
1963	354	60	414	50	8	29
1964	330	66	396	46	9	27
1965	352	62	414	49	8	28
1966	374	73	447	52	10	30
1967	393	81	474	54	11	32
1968	434	91	525	59	12	35
1969	442	102	544	60	13	36
1970	435	87	522	58	11	34
1971	479	101	580	63	13	38
1972	431	111	542	56	14	35

**Cerebral haemorrhage, apoplexy, etc.** The deaths assigned to this group (described as "cerebrovascular disease") numbered 2,528 giving a rate of 1.63 per 1,000 of the population. This rate is the same as that for 1971, and is 0.09 above the average rate for the period 1967-1971. The rate per 1,000 of the male population was 1.36 whilst the female rate was 1.90. Details of deaths in this group by ages are shown in Abstract 12.

**Heart diseases** The deaths from the various forms of heart disease during the year numbered 6,139, the rate per 1,000 of the population being 3.96 which is 0.19 above that for the previous year and is 0.17 above the average for the five years 1967-1971.

7 | TABLE N. Northern Ireland: Deaths and death rates from heart disease (all forms) 1926, 1937, 1951, and 1964-1972.

YEAR	MALES		FEMALES		PERSONS	
	Number of deaths	Rate per 1,000 of the estimated male population	Number of deaths	Rate per 1,000 of the estimated female population	Number of deaths	Rate per 1,000 of the estimated population
1926	1,241	2.04	1,437	2.22	2,678	2.14
1937	1,885	3.02	1,815	2.76	3,700	2.89
1951	2,785	4.16	2,722	3.87	5,507	4.01
1963	3,303	4.69	2,776	3.75	6,079	4.20
1964	3,034	4.27	2,526	3.38	5,560	3.81
1965	3,120	4.36	2,580	3.43	5,700	3.88
1966	3,178	4.41	2,611	3.45	5,789	3.92
1967	2,971	4.09	2,488	3.26	5,459	3.66
1968	3,128	4.27	2,579	3.35	5,707	3.80
1969	3,228	4.38	2,691	3.47	5,919	3.91
1970	3,240	4.35	2,551	3.27	5,791	3.80
1971	3,232	4.28	2,551	3.27	5,783	3.77
1972	3,373	4.41	2,766	3.52	6,139	3.96

Of the total number of deaths from heart diseases, 4,822 (78.5 per cent.) were in the group known as ischaemic heart disease which includes coronary disease. Chronic rheumatic heart disease accounted for 195 (3.2 per cent.), hypertensive heart disease for 204 (3.3 per cent.) and other forms of heart disease for 918 (15.0 per cent.) of all deaths from heart diseases.

International detailed list numbers 393-398, 402, 404, 410-414 and 420-429 as shown in Abstract 12 give the age and sex breakdown of all deaths from heart diseases.

**Bronchitis** The deaths from bronchitis during the year numbered 819, giving a rate of 0.53 per 1,000 of the population, which is 0.7 above the rate for 1971. Bronchitis was also an important contributory factor in 513 deaths though not related to the condition taken to have initiated the sequence of events leading to death.

**Pneumonia** Deaths from pneumonia numbered 820 during the year 1972, the rate of 0.53 per 1,000 of the population being 0.03 lower than the rate for 1971. The average rate for the five years 1967-1971 was 0.47.

**Pregnancy and childbirth** The mortality of women during pregnancy and childbirth is classified under two headings, namely—(1) deliveries and complications of pregnancy, childbirth and the puerperium and (2) deaths with mention of pregnancy, childbirth and the puerperium but not classified as maternal. The causes of death shown in detailed list numbers 630-678 of Abstract 12 are those to which the former group were assigned, and Table O below gives details of the latter group.

There were 3 deaths from diseases of pregnancy, childbirth and the puerperal state in 1972 giving a rate of 0.10 per 1,000 births (live and still). There were 6 such deaths in 1971.

There were no deaths in which maternal conditions were coincidentally present. In 1971 there were 6 such deaths.

TABLE O1. *Northern Ireland: Deaths of women in pregnancy, childbirth and the puerperium, 1926, 1937, 1951, and 1964-1972.*

Year	Maternal deaths		Not classed as maternal	
	No.	Rate† per 1,000 births	No.	Rate† per 1,000 births

\* Excluding County Borough.

**Infant mortality** Deaths of infants under 1 year of age numbered 616, or 21 per 1,000 live births registered. This rate is 2 below that for the previous year. Of these deaths, 350 were of males and 266 of females, the former number being equivalent to 23 per 1,000 live births of males and the latter to 18 per 1,000 live births of females. The corresponding rates for 1971 were 24 and 21 respectively. In 1972 the provisional infant mortality rate in England and Wales was 17, in Scotland 19 and in the Irish Republic 18. Comparative figures for previous years are shown in Table B on page 11.

**Neonatal mortality** Deaths of infants aged under four weeks numbered 418, representing a rate of 14 per 1,000 live births. This is equivalent to 67.9 per cent. of all deaths of children under 1 year of age. The corresponding figures for 1971 were 505, 16 and 69.9 per cent. respectively. The 1972 rates for England and Wales, Scotland and the Irish Republic were (provisionally) 12, 12 and 12 respectively.

**DIAGRAM 6. Infant mortality rates (crude) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1948-72. Rate per 1,000 live births.**

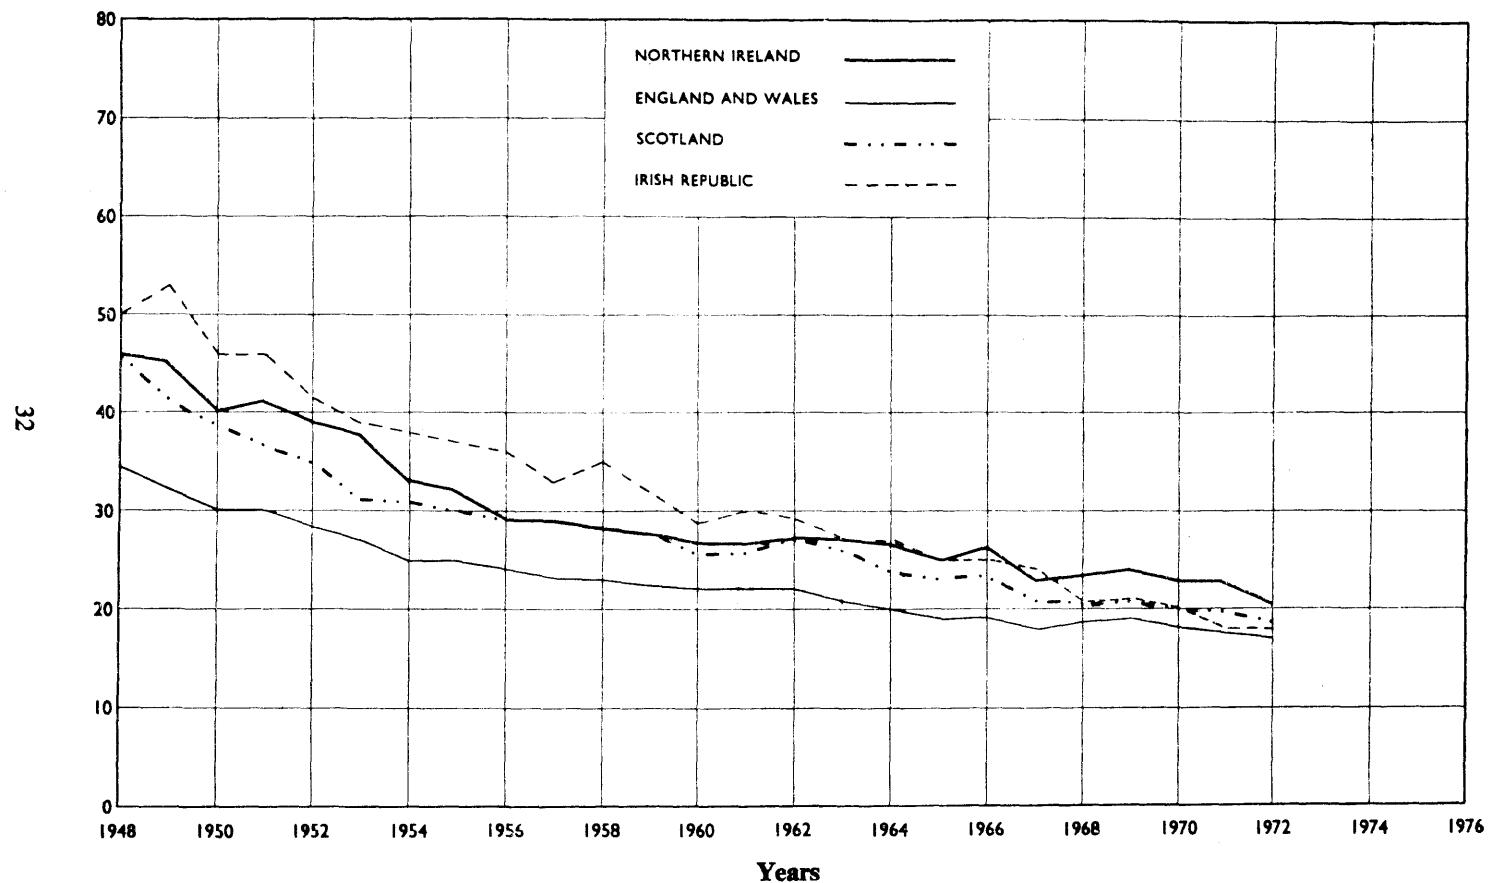

TABLE P. Northern Ireland: Neonatal and infant mortality rates per 1,000 live births by area, 1969-1972.

\* Excluding County Borough.

Perinatal deaths (i.e. deaths of children within the first week of life together with all still-births) numbered 790 giving a rate of 26 per 1,000 live and still-births. Comparative rates in England and Wales and Scotland were (provisionally) 22 and 24 respectively.

TABLE Q. Perinatal deaths and rates per 1,000 births (live and still) by area, 1969-1972.

\* Excluding County Borough.

Abstract 22 gives the number of deaths of children under 1 year of age for Northern Ireland by counties and county boroughs (also for the aggregates of the urban and rural areas) for the years 1969-1972. For the last of these years the numbers are given by sex and age-groups.

Abstract 11 gives the number of infant deaths, together with the number of births, for each administrative area in Northern Ireland.

The numbers of infant deaths for 1972 by age and cause of death are given in Abstract 24, together with the infant mortality rates by causes.

**Mortality among illegitimate children** Deaths of illegitimate children under 1 year of age numbered 42 in 1972, which is equivalent to a rate of 33 per 1,000 of the illegitimate live births registered and is 3 above the rate for the previous year. The corresponding rates for legitimate children were 22 and 20 per 1,000 legitimate live births for 1971 and 1972.

TABLE R. Northern Ireland: Illegitimate neonatal and infant mortality rates per 1,000 illegitimate live births by area, 1969-1972.

AREA	Illegitimate neonatal mortality rate per 1,000 illegitimate live births				Illegitimate infant mortality rate per 1,000 illegitimate live births

\*Excluding County Borough.

Deaths of illegitimate infants aged under four weeks (illegitimate neonatal mortality) numbered 30, representing 71.4 per cent. of the total deaths of all illegitimate children under 1 year of age. The corresponding figures for 1971 were 27 and 75.0 per cent. respectively.

Abstract 24 gives the number of deaths and mortality rates of illegitimate children under 1 year of age by causes. Most of the rates are considerably in excess of the corresponding rates for all children, but it should be noted that many of the mortality rates of illegitimate children are based on very small numbers of deaths.

Abstract 23 shows the numbers of deaths of illegitimate children under 1 year of age for Northern Ireland by counties and county boroughs and the numbers in the urban and rural areas for the years 1969-1972. The sex and age distribution is shown for the year 1972.

**Violent deaths** Deaths from causes other than natural causes are termed violent deaths and are classified according to both the external circumstances giving rise to injury, expressed as the "external cause of injury" and to the nature of the injury sustained, designated as the "nature of injury" (see Abstract 19).

The number of deaths ascribed to violence during the year was 1,033 (696 males and 337 females) which is 294 more than the number registered in 1971, and is equivalent to 6.1 per cent. of the total deaths registered.

TABLE S. Northern Ireland: *Violent deaths by external cause of injury, 1968-1972.*

Injury undetermined whether accidentally or purposely inflicted . . . . .	12	10	13	17	20
TOTAL DEATHS FROM VIOLENCE . . . . .	639	647	696	739	1,033

Of the 1,033 deaths 351 were attributed to transport accidents (E800—E845) (excluding drowning from watercraft (E830, E832)). Road vehicle accidents (E810—E827) accounted for 351 deaths as compared with 293 in 1971. Table S1 affords comparison of numbers of deaths from road vehicle accidents in 1972 with those for the three preceding years by sex and certain age-groups whilst Table S2 shows the various categories of persons killed in motor vehicle accidents and details of other transport accidents.

TABLE S1. Northern Ireland: *Deaths from road vehicle accidents (E810—827), 1969-1972.*

	All ages	Under 5 years	5-14	15-34	35-54	55-74	75 and over
<b>MALBS . . .</b>							
1969	182	10	16	62	43	40	11
1970	195	13	22	69	33	38	20
1971	210	10	25	76	36	40	23
1972	255	11	27	87	41	58	31
<b>FEMALES . . .</b>							
1969	58	10	9	7	6	18	8
1970	78	6	11	13	15	25	8
1971	83	8	5	23	11	24	12
1972	96	3	10	31	22	20	10

Other accidents accounted for 345 deaths and of these deaths 191 were ascribed to falls, 20 to drowning, 39 to poisons or poisonous gases, 43 to fire and heat, 6 to mechanical suffocation, 6 to machinery and 40 to other accidental causes. A detailed break-down showing non-transport accidents by sex and age-groups is given in Abstract 20.

Deaths from accidents recorded as occurring in the home numbered 218 compared with 179 in 1971 and 189 in 1970. Most accidents in the home are occasioned by falls and it should be noted that in 1972 there were 22 deaths from falls where the place of the accident was unspecified compared with 19 in 1971. Fuller details of these and other accidents (apart from transport accidents) are given in Abstract 20.

During the year there were 47 cases of suicide (31 males and 16 females) compared with 53 (34 males and 19 females) in 1971, 55 deaths from homicide and 212 from war operations. In addition there were 20 deaths in which it was not possible to determine whether the injuries were accidentally or purposely inflicted.

TABLE S2. *Deaths from transport accidents, by sex and age, 1972*

International List Numbers	Cause of death	All ages	under 1 year	1-4	5-9	10-14	15-24	25-34	35-44	45-54	55-64	65-74	75-84	85 and over

Deaths in which violence was stated to be the sequel to some other cause are correlated in Table S3. Alcoholism was, as usual, the greatest single factor in this group causing the deaths of 9 people. This figure, however, does not include deaths caused by other people who were in a state of intoxication.

TABLE S3. Northern Ireland: Deaths in which violence was a terminal cause, 1972.

		UNDERLYING CAUSE OF DEATH		Motor vehicle traffic accident involving collision with pedestrian E814		Non-collision motor vehicle traffic accident due to loss of control E816		Fall on or from stairs or steps E830		Excessive cold E901		Hunger, thirst, exposure and neglect E904		Accidental drowning and submersion E910		Inhalation and ingestion of food causing obstruction or suffocation E911		TOTAL

## CERTIFICATION OF DEATHS

All deaths must be certified by either a medical practitioner or a coroner and Table T shows the type of certification during the year. The circumstances of 2,571 deaths (15.1 per cent. of all deaths) were considered by the coroners and in 905 of these cases inquests were held. In 836 cases the deaths were certified by coroners after post-mortem examinations had proved inquests to be unnecessary.

**TABLE T. Northern Ireland: Deaths by certification, 1972.**

AREA	Total deaths	Certified by medical practitioners	Certified by coroners		
			Without inquest		After inquest
			Without post-mortem	After post-mortem	
Northern Ireland . . .	17,032	14,461	830	836	905
Co. Antrim . . .	3,438	2,975	145	144	174

All rural areas . . .	7,225	6,238	337	278	372

\*Excluding County Borough.

Of the 14,461 deaths certified by medical practitioners the deceased persons were not seen after death by the practitioners in 3,281 cases.

## LIFE TABLE

The expectation of life is the average number of years which would be lived by a group of people of given age who are continuously subject to given mortality rates, usually those of a selected year or years.

The abridged life table shown as Table U is based on the mortality rates for 1970-1972 and shows the expectation of life at various age-points together with the number of persons who would survive to given age  $x$  out of 10,000 born, if subjected throughout their lives to this mortality experience.

Thus 98 per cent. of males and 98 per cent. of females would survive the first year of life; 96 per cent. of males and 97 per cent. of females would reach the age of 20; 78 per cent. of males and 86 per cent. of females would reach the age of 60 and the men could then expect an average future lifetime of 15 years compared with 19 years for women.

Based on the mortality experience of 1970-1972 the expectation of life at birth was 67.6 years for males and 73.7 years for females; at age one year the expectations were 68.3 years for males and 74.1 years for females. Table U1 affords comparison of these figures with those for certain preceding years.

TABLE U. Northern Ireland: Abridged Life Table, 1970-1972.

Age $x$	Males		Females	
	$l_x$	$\bar{e}_x$	$l_x$	$\bar{e}_x$

85	1,034	3.64	2,362	4.46

This abridged life table is constructed from the estimated populations and the total deaths registered during the years 1970-1972.

The column headed  $l_x$  shows the numbers who would survive to exact age  $x$  out of 10,000 born who were subject throughout their lives to the death probabilities indicated by the mortality records for the years 1970-1972.

Column  $\bar{e}_x$  gives the "expectation of life"—that is the average future lifetime which would be lived by a person aged exactly  $x$  if subject to those death probabilities.

TABLE U1. Northern Ireland: Expectation of life at birth, at one year of age and at 65 years of age for certain periods between 1890 and 1972.

Period	Expectation of life					
	At birth		At age one year		At age 65 years	
	Male	Female	Male	Female	Male	Female
1890-92	46.3	45.7	—	—	10.6	10.6
1900-02	47.1	46.7	—	—	10.5	10.4
1910-12	50.7	51.0	—	—	12.1	12.8
1925-27	55.4	56.1	59.9	59.5	11.9	12.7
1936-38	57.8	59.2	—	—	11.6	12.4
1950-52	65.5	68.8	67.5	70.3	12.1	13.5
1963-65	67.8	72.9	68.8	73.6	12.2	14.8
1964-66	67.8	73.0	68.7	73.7	12.1	14.8
1965-67	68.1	73.3	68.9	74.1	12.3	15.0
1966-68	68.2	73.5	69.0	74.1	12.3	15.1
1967-69	68.3	73.7	69.2	74.3	12.4	15.3
1968-70	67.9	73.5	68.8	74.0	12.1	15.1
1969-71	67.8	73.7	68.6	74.2	12.0	15.2
1970-72	67.6	73.7	68.3	74.1	12.0	15.2

The Life Tables for 1901, 1926, 1951 and 1961 are included in Section I of the Ulster Year Book, 1972, obtainable from Her Majesty's Stationery Office price 75p.

## CONGENITAL MALFORMATIONS

This section which appeared in the Report for the first time in 1964, relates to children born (live or still) with any apparent deformity. The information about these congenital malformations is furnished to the General Register Office by the county and county borough health committees and is classified according to the residence of the parents and not to the place of occurrence.

During the year 911 children were born with congenital malformations compared with 995 in 1971 and 1,043 in 1970. The Northern Ireland rate for 1972 was 29.9 per 1,000 births (live and still) compared with 30.9 for 1971.

**TABLE V. Northern Ireland: Number of congenitally malformed children by area and month of birth, 1972.**

AREA	MONTH OF BIRTH												Totals	Rate*
	January	February	March	April	May	June	July	August	September	October	November	December		
Northern Ireland .	74	86	91	85	82	67	77	66	67	70	81	65	911	29.9

County Tyrone .	3	6	12	5	10	5	3	2	5	4	6	4	65	19.6

\*Per 1,000 births (live and still).

†Excluding County Borough.

Of the 911 children born with malformations 140 (15.4 per cent.) were born with more than one abnormality. In all, 1,088 separate abnormalities were recorded. Table VI shows the number of children affected by multiple abnormalities in each county and county borough.

**TABLE VI. Northern Ireland: Multiple abnormalities by area, 1972.**

AREA	NUMBER OF ABNORMALITIES											
	1		2		3		4		5		All	
Children	Abnorm.	Children	Abnorm.	Children	Abnorm.	Children	Abnorm.	Children	Abnorm.	Children	Abnorm.	Abnorm.

Northern Ireland TOTAL	771	771	110	220	24	72	5	20	1	5	911	1,088

\*Excluding County Borough.

In Northern Ireland as a whole 10 (1.1 per cent.) of the congenitally malformed children were born at home, the remainder having been born in hospitals.

In 7 cases the children were twins, the other partner of each having no reported malformation in 5 instances.

Details about the nature of the malformations will be found in Abstracts 26, 27, 29 and 30 and data about the mother's age and the number of other children born to her are in Abstract 28.

### MIGRATION

The population figures ascertained at each census enable the net migration during the inter-censal periods to be calculated. Table W shows that during the period of approximately four and a half years between the censuses taken on the 9th October, 1966 and the 25th April, 1971 there was a net outward movement of 24,838 persons to all countries including other parts of the British Isles.

**TABLE W. Northern Ireland: Net migration during inter-censal period 1966-1971.**

	Males	Females	Total
Population, Census of 1966 . . .	723,884	760,891	1,484,775
Births, 1966-1971 . . .	76,518	72,188	148,706
Deaths, 1966-1971 . . .	38,102	34,476	72,578
Natural increase*	38,416	37,712	76,128
Population 1966 plus natural increase	762,300	798,603	1,560,903
Population, Census of 1971 . . .	754,676	781,389	1,536,065
Net movement outwards . . .	7,624	17,214	24,838

\* The excess of births over deaths.

Table W1 shows the natural increase in the population for each inter-censal period since birth and death registration commenced in 1864, together with the net movement outwards and the percentage of the increase lost by migration.

**TABLE W1. Northern Ireland: Inter-censal variations in population, 1871-1971.**

Inter-censal period	Population at beginning of period	Natural increase*	Net movement outwards	Percentage of increase lost by migration
1871-1881	1,359,190	104,350	158,724	152
1881-1891	1,304,816	71,910	140,670	196
1891-1901	1,236,056	68,634	67,738	99
1901-1911	1,236,952	78,996	65,417	83
1911-1926	1,250,531	113,603	107,573†	95
1926-1937	1,256,561	80,835	57,651	71
1937-1951	1,279,745	158,443	67,267†	42
1951-1961	1,370,921	146,349	92,228	63
1961-1966	1,425,042	97,434	37,701	39
1966-1971	1,484,775	76,128	24,838	33

\* Excess of births over deaths.

† Including deaths in H.M. Forces and Mercantile Marine which occurred outside Northern Ireland.

It is estimated that during the year ended 30 June, 1972 the net outward migration amounted to 7,500 persons which represents 53.6 per cent. of the natural increase (13,995) during that period.

## METEOROLOGY

The following synopsis of the weather experienced in Northern Ireland during 1972 is furnished by the Director-General of the Meteorological Office through the Climatological Services and Public Records Office, Belfast. Where the term average is used it refers to the thirty-five year period 1916 to 1950 for rainfall and to the World Meteorological Organisations standard period 1931 to 1960 for temperatures and sunshine.

Tables on pages 44 and 45 give data in respect of certain stations: columns 2 and 3 give the highest and lowest air temperatures recorded on any date during the month indicated: in columns 4 and 5 the mean daily maximum and minimum air temperatures are given. There is also a table giving similar data related to Northern Ireland as a whole, based upon a selection of stations appropriate to the Meteorological element and not necessarily those whose data are published in the preceding tables. This information smooths out the variations experienced in different parts of the Province and therefore gives a general picture. The "Highest" and "Lowest" however, refer to values received from around sixty stations recording temperatures in Northern Ireland and are not restricted to the seven stations data given in the preceding tables.

Temperature is given in degrees Centigrade: to convert actual values to Fahrenheit multiply by 9, divide by 5 and add 32.0 degrees. To convert "differences from average" temperatures in the Centigrade Scale to Fahrenheit 1.0 degrees Centigrade=1.8 degrees Fahrenheit.

During 1972 rainfall was below average during the July to October period and above average during the January to June period. November had above average rainfall and December had below average rainfall. The year's value was 94 per cent. Temperatures were 0.6 degrees Centigrade below average.

The wetness of the period January to June inclusive, when each month had above normal amounts was significant in that it was the first such pattern of rainfall over Northern Ireland since 1900. There were other years in which the total amount over the 6 months January to June was higher but such a year included at least 1 month with below average amounts. The period July to October inclusive was the driest July to October period on record and it included the very dry September, the driest in living memory in many areas. There were drought periods in many places during August and September. Temperatures were mostly below average during the first six months of the year and June was the coldest June over Northern Ireland this century. Sunshine was also below average with a value of 96 per cent. March and July were the sunniest months while May and August were the dullest. The unusual windiness of the last quarter of the year was a noteworthy feature, in fact it was a stormy year with a more than average frequency of gale force winds.

Brief summary of general weather of each month of the year:—  
**January:** Wet and dull. Rainfall 118 per cent, sunshine 78 per cent and temperatures 0.4 degrees Centigrade below average. Moneydig in Co. Londonderry had on the 31st its lowest January air minimum of minus 15.9 degrees Centigrade since 1945. There were 2 occurrences of gales.

**February:** Rainfall was above average, some areas having values as high as 200 per cent—especially in The Mourne. Temperatures were around normal and sunshine below average at 98 per cent. There were 2 occurrences of gales.

**March:** Very wet with rainfall well above normal with a general value of 171 per cent. Temperatures were below normal by 0.5 to 1.0 degrees Centigrade. Sunshine was 107 per cent. There were one or two occurrences of gales. It was the warmest St. Patrick's Day at Aldergrove, Co. Antrim since records began there in 1927.

**April:** April had above average rainfall amounts though some parts of the Province had droughts between the 14th and the 28th. Rainfall was 121 per cent, sunshine 102 per cent and temperatures were about average. There were one or two occurrences of gales.

**May:** Very wet. It was the wettest May in counties Fermanagh and Tyrone since 1924 and generally over Northern Ireland since 1945. The general value was 158 per cent. Temperatures were 1.1 degrees Centigrade below normal. Sunshine was 75 per cent of average.

**June:** It was the coldest June over the Province this century. Temperatures were 2.7 degrees Centigrade below normal. Rainfall was above average with a general value of 125 per cent. In the Donaghadee area rainfall was as high as 175 per cent of average. There were 2 occurrences of thunder and 3 of hail.

**July:** Dry with rainfall well below normal with a value of 75 per cent for Northern Ireland as a whole. It was sunny with a general value of 122 per cent though temperatures were 0.3 degrees Centigrade below average.

**August:** It was a dry, cool and dull month. Rainfall was 54 per cent of average. Temperatures were 1.5 degrees Centigrade below normal and sunshine too was well below average with a general value of 74 per cent. There were droughts in parts of the Province.

**September:** It was the driest September in living memory in many places. The monthly totals of rainfall in the Downpatrick/Comber area of County Down were as low as 2.0 millimetres, Comber had the distinction of being the driest with a total of 1.1 mms for the month. Many areas had drought conditions.

**October:** Rainfall was again well below normal with a general value of 49 per cent. It was the driest October over Northern Ireland since 1962. Temperatures were 0.2 to 0.9 degrees Centigrade above average. Sunshine was about average. There were 4 or 5 occurrences of fog and 1 or 2 of gales.

**November:** Rainfall was above average in most places with a general value of 113 per cent. Temperatures were 1.0 degree below normal. Sunshine was 94 per cent of average. There were 2 occurrences of gales in most places.

**December:** Rainfall was below average everywhere with a value of around 87 per cent for the Province as a whole. Temperatures were 0.5 to 1.0 degree above normal. Sunshine was well above average with a value of 111 per cent. It was the sunniest December at Aldergrove in Co. Antrim since 1963. There were 2 occurrences of gale but 4 in some exposed places in the east. There was 1 occurrence of fog, 1 of thunder and 1 of hail.

**TABLE X. Northern Ireland: Air temperature, rainfall and sunshine recorded at seven stations during the year, 1972 and general values for the Province as a whole (final values\*).**

## ADMINISTRATION

**Introductory** The administrative functions of the office of the Registrar General comprise the registration of births (live and still), deaths, marriages and adoptions, and the provision or supervision of machinery for dealing with preliminaries to marriages other than those according to the rites of the Roman Catholic Church.

**Buildings licensed or registered for marriages** The numbers of places of worship (other than those belonging to the Roman Catholic Church) in which marriages could be solemnised, as at 31st December in each of the years 1969, 1970, 1971 and 1972 were as follows:

<i>Denomination</i>	1969	1970	1971	1972
Church of Ireland . . . .	417	413	414	414
Presbyterian . . . .	515	515	513	516
Methodist . . . .	161	162	162	163
Others . . . .	309	327	333	346
<b>TOTAL</b>	<b>1,402</b>	<b>1,417</b>	<b>1,422</b>	<b>1,439</b>

**State of registration** The measures adopted for particulars of births notified under the Notification of Births Act, 1907, to be furnished to registrars in the two county boroughs have continued to be of value in securing the registration of a number of births which had not been registered within the prescribed period of 6 weeks.

Births and deaths not registered within a year of their occurrence can be recorded only with the authority of the Registrar General. During 1972 such authority was granted for the registration of 16 births, as compared with 25 in 1971 and 27 in 1970. The registration of 30 deaths was authorised as compared with 14 in 1971 and 12 in 1970.

**Legitimacy Acts (N.I.), 1928 to 1961** Under these Acts an illegitimate child whose parents have married is, subject to certain conditions, legitimised, and the Registrar General is empowered to authorise the registration or re-registration of the birth. During 1972 the registration or re-registration of the births of 193 children was authorised, the comparative figures for 1971 and 1970 being 212 and 213 respectively.

**Adoption Act (N.I.), 1967** Registers of children adopted under the provisions of the above Act and of the previous Adoption Acts of 1929 and 1950 are kept in the General Register Office, to which the adoption orders made by the Courts are transmitted. A certified copy of an entry in the Adopted Children Register is evidence of adoption, and is also evidence of the date of birth of the adopted child. The children whose adoptions were recorded in the Adopted Children Registers during 1972 numbered 426 whilst the figures for 1971 and 1970 were 393 and 554 respectively.

**Searches and certificates** The original records of live births, deaths, and marriages registered in Northern Ireland are, in general, in the custody of local registration officers, who issue annually therefrom many thousands of certificates. An indication of the extent to which Government Departments and the public have utilised the facilities for searching in the indexes and obtaining certificates from records in the General Register Office for

Northern Ireland (including the Adopted Children Register) is afforded by the following statement:

YEAR	OFFICIAL		PAID			Fees Received £ s. d.

1972	254	254	4,587	4,996	3,761	1,960.40	

\*Fees for certificates and searches were increased with effect from the 21st April, 1956 and the 1st April 1966.

**Verifications** Requests for the verification of particulars of events registered are received from Government Departments in connection with claims for pensions, etc. During the year the number of cases dealt with was 11,491 out of which 5,561 were checked from the records in the General Register Office and 5,930 events (where records were not available at that office) were referred to local registration officers.

**ABSTRACT 17. Abbreviated list numbers and equivalent detailed list numbers and causes of death (8th Revision I.C.D.).**

Detailed List	Abbreviated List	CAUSE OF DEATH
000	1	Cholera
001	2	Typhoid fever
004-006	3	Bacillary dysentery and amoebiasis
008-009	4	Enteritis and other diarrhoeal diseases
010-012	5	Tuberculosis of respiratory system
013-019	6	Other tuberculosis, including late effects
1,020	7	Plague
032	8	Diphtheria
033	9	Whooping cough
034	10	Streptococcal sore throat and scarlet fever
036	11	Meningococcal infection
040-043	12	Acute poliomyelitis
050	13	Smallpox
055	14	Measles
080-083	15	Typhus and other rickettsioses
084	16	Malaria
090-097	17	Syphilis and its sequelae
Rem. 000-136	18	All other infective and parasitic diseases
Cancer of:-		
151	19A	stomach
152-154	19B	intestines and rectum
162	19C	trachea, bronchus and lung
174	19D	breast
180-189	19E	genito-urinary organs
Rem. 140-200, 202, 203, 208, 209	19F	other sites
201, 204-207	19G	Hodgkin's disease and leukaemia
210-239	20	Benign neoplasms and neoplasms of unspecified nature
250	21	Diabetes mellitus
260-269	22	Avitaminoses and other nutritional deficiency
280-285	23	Anaemias
320	24	Meningitis
390-392	25	Active rheumatic fever
393-398	26	Chronic rheumatic heart disease
402, 404	27A	Hypertensive heart disease
400, 401, 403	27B	Other hypertensive disease
Pt. of 410-414	28A	Ischaemic heart disease with hypertension
Rem. of 410-414	28B	Ischaemic heart disease without hypertension
420-429	29	Other forms of heart disease
Pt. of 430-438	30A	Cerebrovascular disease with hypertension (benign)
Rem. of 430-438	30B	Cerebrovascular disease without hypertension
440-458	46A	Other diseases of circulatory system
470-474	31	Influenza
480-486	32	Pneumonia
490-493	33	Bronchitis, emphysema and asthma
Rem. 460-519	46B	Other diseases of respiratory system
531-533	34	Peptic ulcer
540-543	35	Appendicitis
550-553, 560	36	Intestinal obstruction and hernia
571	37	Cirrhosis of liver
Rem. 520-577	46C	Other diseases of digestive system
580-584	38	Nephritis and nephrosis
600	39	Hyperplasia of prostate
640-645	40	Abortion
630-639, 650-678	41	Other complications of pregnancy, childbirth and puerperium
740-759	42	Congenital anomalies
764-768, 772, 776	43	Birth injury, difficult labour and other anoxic and hypoxic conditions
760-763, 769-771,	44	Other causes of perinatal mortality
773-775, 777-779		
780-796	45	Symptoms and ill-defined conditions
Rem. 240-738	46D	All other diseases
E810-E823	47	Motor vehicle accidents
E800-E807,		
E825-E949	48	All other accidents
E950-E959	49	Suicide and self-inflicted injuries
E960-E999	50	All other external causes
