3 Death rates per 1,000 population	23
4 Death rates from cancer per 100,000 population	27
5 Maternal mortality rates per 1,000 live births	31
6 Infant mortality rates per 1,000 live births	34

GENERAL NOTES

The figures contained in this Report may be regarded as superseding the provisional figures already published for the year 1977 in the Registrar General's quarterly returns.

Throughout the Report, births and deaths have been recorded according to date of registration and not to date of occurrence. They have also been allocated to the district of normal residence, if in Northern Ireland; births have been assigned to the districts containing the normal residence of parents, and deaths to the districts containing the normal residence of the deceased persons. Events occurring in Northern Ireland relating to persons whose normal residence is outside Northern Ireland have been assigned to the district of occurrence.

Rates are assessed per 1,000 of the estimated home population as at 30 June unless otherwise stated. The home population comprises the population of all types in Northern Ireland including Her Majesty's forces. Marriage rates relate to the number of marriages solemnised, and not to the number of persons married.

Comparisons with rates (births, deaths etc.) recorded in other parts of the British Isles are included in several tables and diagrams. These comparisons are substantially correct but it should be remembered that (with the exception of Diagram 3) they are crude rates only and take no account of changes in, or differences between, the age and sex structure of the populations.

Generally speaking, the classifications adopted for the purposes of this Report are the Detailed and Abbreviated Lists contained in the "Manual of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1965."

The term cancer, where used, refers to all malignant neoplasms and neoplasms of the lymphatic and haematopoietic tissues, except Hodgkin's disease, leukaemia and aleukaemia (I.C.D. Nos. 201, 204-207).

Where more than one cause of death is reported, the death is classified according to the underlying cause, i.e. the disease or injury which initiated the train of morbid events leading directly to death. This method of classification is followed even if the deceased may have recovered from the underlying cause long before the date of death.

In the text and tables the term "stillbirth" refers to a child born after the 28th week of pregnancy and which did not breathe or show any other sign of life. Perinatal deaths are deaths of infants under one week and also includes still-births; "neonatal mortality" relates to deaths of children under 4 weeks of age and "infant mortality" to deaths of all children (including neonatal) under 1 year of age.

In general in the tables and abstracts, dots (.) are used to indicate "none" and dashes (—) are used to indicate that information cannot be given or that the headings are not applicable.

REPORT 1977

SUMMARY

The birth, marriage, perinatal, neonatal and infant mortality rates were all lower than in 1976. The stillbirth rate increased from 10 to 12 per 1,000 births and the illegitimate live births increased by 4% of total live births.

The following figures indicate the general trend of marriages, births and deaths over the past 30 years. More detailed comparisons will be found in Tables A and A1.

Table B shows comparative statistics for Northern Ireland, England and Wales, Scotland and the Irish Republic. The marriage rate in Northern Ireland was lower than in England, Wales and Scotland. The live birth rate was lower than that of the Irish Republic but higher than that of England, Wales and Scotland; the death rate was lowest in the Irish Republic.

POPULATION

The home population of Northern Ireland estimated as at 30 June 1977 was 1,537,300 persons, a decrease of 800 from the mid 1976 figure. This estimate, comprising civilians and members of H.M. forces stationed in Northern Ireland, is based on the census taken on 25 April, 1971 (1,536,065 persons) and takes account of natural increase and net migration. During the year ended 30 June 1977, the natural increase of 8,500 (approx.) was off-set by net migration of 8,200 (approx.). Further details regarding migration are shown on pages 43 and 44.

The total population is further analysed by sex and age in Table C1.

Table C shows the population of the 26 District Council areas.

TABLE C. Population of 26 District Council Areas as recorded at the census of 1971 and as estimated at mid-year 1977.

AREA	Census 1971	Mid-Year estimate 1977

The 1971 Census population by age and sex for Northern Ireland and for District Council Areas is given in Abstract 1.

MARRIAGES

Number and rate. Marriages registered during the year numbered 9,696 giving a rate of 6·31 per 1,000 population. The corresponding number and rate for 1976 were 9,914 and 6·44 respectively. In 8,935 (92·1 per cent.) of the total marriages both contracting parties were single; in 293 (3·0 per cent.) one or both were widowed and in 507 (5·2 per cent.) one or both were divorced. Of every 1,000 persons married 31 were previously divorced. This rate is 2 above that for 1976; comparative rates for the years 1957 and 1967 were 9 and 8 respectively. Further details are given in Abstracts 3 and 6.

The number of marriages celebrated in each month in 1977 was as follows:

January . .	428	April . .	970	July . .	1,189	October . .	681
February . .	471	May . .	486	August . .	1,380	November . .	558
March . .	784	June . .	957	September . .	1,267	December . .	525
Qtrs.: 1st . .	1,683	2nd . .	2,413	3rd . .	3,836	4th . .	1,764

This shows that the period July to September was the most popular quarter for weddings, August heading the monthly totals with 1,380. January was the least popular month.

Ages of marriage. Although the most popular age for marriage was 21 years for men and 19 years for women, the arithmetical average age of men marrying in 1977 was 25·3 and of women 23·2. During 1976 this age was 25·6 among men and 23·4 among women. In 1967 the average age was 26·5 for men and 24·4 for women. The mean age at marriage of persons marrying for the first time in 1977 was 24·1 years for men and 22·1 years for women. Of the contracting parties 1·0 per cent. of the husbands and 6·0 per cent. of the wives were minors (the age of majority was lowered from 21 to 18 from 1 January 1970) the relative figures for 1967 being 13·0 per cent. and 30·5 per cent. Further statistics will be found in Table D and Abstracts 4, 5, 6, 7 and 7a.

Method of celebration. Table D1 shows the marriages registered during the years 1927, 1937, 1951, 1961, 1966, 1971 and 1973 to 1977 according to the form of celebration and Table D2 gives further details of marriages in 1977.

Marriages taking place in registrars' offices in the year under review represented 9·0 per cent. of the total marriages which is 0·3 below that for the previous year.

FERTILITY

LIVE BIRTHS

Number and rate. Live births registered during 1977, numbered 25,437 924 fewer than in 1976. The birth rate was 16·5 per 1,000 of the estimated population, being 0·6 below the rate for 1976.

The monthly incidence of births was as follows:

January . .	2,151	April . .	2,040	July . .	2,037	October . .	2,179
February . .	2,199	May . .	2,523	August . .	2,449	November . .	2,281
March . .	1,886	June . .	2,046	September . .	2,107	December . .	1,539
Qtrs.: 1st . .	6,236	2nd . .	6,609	3rd . .	6,593	4th . .	5,999

Compared with 1976, each of the four quarters showed decreases of 552, 226, 117 and 29 respectively.

Births registered during 1977, where the normal residence of the parents was outside Northern Ireland, numbered 88 as compared with 108 in 1976. In 64 cases an address in the Irish Republic was given. The 1976 figure was 108.

Proportion of males to females. Births of males in Northern Ireland in 1977 numbered 13,154 and those of females 12,283, the proportion of male to female births being 1,070 to 1,000. The corresponding proportion for each of the five years 1972-76 were 1,078, 1,079, 1,062, 1,065 and 1,056 respectively.

Age of Parents. Table E1 classifies legitimate live births according to the age of the mother. The maternal age-group which contributed the greatest number of live births was the group aged 25-29.

Place of Occurrence Of all live births 99.7 per cent. occurred in hospitals.

Multiple births Up to and including 1960, the birth of one live and one still-born infant was regarded as a single birth and the birth of two live infants and one still-born infant as a twin birth. Since 1961 still-births have been registered and these are now being taken into account to obtain accurate figures for single and multiple births. Of the 25,437 live births, 24,910 were the product of single, 518 of twin and 9 of triple pregnancies. There were no quadruple pregnancies. Table E2 gives the multiplicity of all births.

STILL-BIRTHS

Number and rate. The number of still-births registered in 1977 was 310 giving a rate of 12 per 1,000 births (live and still). Comparative 1977 figures for England/Wales and Scotland were 5,400 and 9 and 553 and 9 respectively.

Abstract 11 shows the number of still-births in administrative areas by sex. The number of still-born children who would have been illegitimate had they been born alive was 23 representing 7·4 per cent. of all still-births. Six of the still-births were the product of multiple confinements further particulars of which will be found in Table E2 above. In 222 cases the births occurred after a period of less than 37 weeks gestation or the weight of the foetus was not more than 2,500 grammes. Of the 310 still-births 281 were certified by doctors, 26 by mid-wives and 3 by coroners. Postmortem examinations were held in 10 cases. Abstract 10 shows still-births by cause, sex and period of gestation. The percentage of still-births which occurred in hospitals in 1977 was 97·4 compared to 98·9 per cent. in 1976.

TABLE F. Northern Ireland; Still-births and rates per 1,000 births (live and still) by District-council area 1974-1977.

Congenital malformations caused 73 still-births (i.e. 23·5 per cent. of the total). This group was also the main cause in 1976 when the corresponding figures were 77 and 27·7 respectively.

Illegitimate births. The number of illegitimate births was 1,383. This was 53 more than in 1976. The proportion to total live births (5·44 per cent.) was 0·39 above that for the previous year. In England and Wales, Scotland and the Irish Republic, the illegitimate births as percentages of the total live births in the year 1977 were (provisionally) 9·7, 9·6 and 4·1 respectively. Table F3 shows illegitimate live births by age of mother and reveals that illegitimacy is highest among women aged under 20.

DEATHS

Number and rate. The number of deaths recorded during the year 1977 and the death rate per 1,000 of the population were 16,921 and 11·1 respectively. The comparable figures for 1976 were 17,030 and 11·1.

The monthly incidence of deaths was as follows:

January	1,713	April	1,580	July	1,156	October	1,296
February	1,480	May	1,445	August	1,220	November	1,401
March	1,607	June	1,303	September	1,132	December	1,588
Qtrs.: 1st	4,800	2nd	4,328	3rd	3,508	4th	4,285

Of the total deaths 8,871 were of males and 8,050 were of females, the equivalent annual death rates being 11·7 and 10·4 per 1,000 of the male and female estimated populations, respectively. The corresponding rates for 1976 were 11·6 and 10·5.

According to the ages stated to registrars, 517 (3·0 per cent.) of the total deaths were of children under 5 years of age and 11,922 (70·5 per cent.) were of persons aged 65 and upwards. There were 195 deaths of persons (59 males and 136 females) aged 95 and upwards and this number included 2 females and 1 male at 100, 3 females at 101, 3 at 102, 1 at 103 and 1 at 107.

Table G gives a partial analysis of deaths by age for each sex and the percentage of the total deaths in each group.

TABLE G. Northern Ireland: Deaths by sex and certain age-groups and as percentage of total deaths, 1977.

		Total	Under 1 year	1-14 years	15-44 years	45-64 years	65 years and over

Deaths in hospitals The number of deaths occurring in hospitals in 1977 is shown in Table J. Of the deaths registered in 1977, 55.3 per cent. took place in N.H.S. hospitals (2.2 per cent. in mental hospitals).

TABLE J. Northern Ireland: Deaths in hospitals, 1974-1977.

	1974	1975	1976	1977
Number of deaths in:				
N.H.S. Psychiatric Hospitals	446	424	375	375

Non-N.H.S. hospitals and institutions for old and disabled	261	354	614	658
Elsewhere	7,178	6,841	6,958	6,902
Total deaths	17,327	16,511	17,030	16,921
Percentage of deaths in N.H.S. hospitals . .	57.1	56.4	55.5	55.3

Cause of death Where more than one cause of death is reported the death is classified to the underlying cause, i.e. the starting point in the sequence of events leading to death. See General Notes on page 1.

Proportion of deaths from principal causes. Heart diseases continued to bear by far the greatest proportion of the total deaths; other diseases having a high proportion were cancer, cerebrovascular disease (mainly cerebral thrombosis and cerebral haemorrhage) and respiratory diseases.

At ages under one year congenital malformations, premature birth, and pneumonia were the principal causes of death.

Between the ages of one and ten the highest proportions were caused by accidents, congenital malformations, pneumonia, cancer, Hodgkin's disease and leukaemia.

Between the ages of ten and twenty-four, accidents caused by far the largest proportion of deaths. The proportions from cancer, Hodgkin's disease and leukaemia were also high.

Between the ages of twenty-five and forty-four the principal causes were cancer, heart diseases, accidents, suicide and cerebrovascular disease.

From age forty-five the pattern was heart diseases followed by cancer, cerebrovascular disease and respiratory diseases.

Table K shows, for each of the principal causes, the number of deaths and the death rates for each year since 1973.

Deaths from the principal epidemic diseases. A total of 87 deaths (0·06 per 1,000 population) fell within this group. Of these, 76 were caused by influenza, 7 by diarrhoeal diseases of children under 2 years of age, 2 by measles, 1 by acute poliomyelitis and 1 by typhoid fever. No deaths resulted from the other diseases comprising this group, viz., diphtheria, smallpox, typhus, scarlet fever, paratyphoid fever and whooping cough.

The number of deaths from the principal epidemic diseases in 1976 was 143 and the relative rate was 0·09.

Influenza. There were 76 deaths from influenza in 1977 as against a total of 143 in 1976. The relative rates per 1,000 of the population were 0·05 (1977) and 0·09 (1976).

Tuberculosis. Deaths from this cause numbered 32 compared with 34 in 1976. The rate of 0·02 per 1,000 population is the same as that for 1976. Further details of comparable figures over the past years may be seen in Table L.

The tuberculosis death rates (provisional) for England and Wales, Scotland and the Irish Republic in 1977 were 0·02, 0·03 and 0·06 respectively. More detailed information about deaths from tuberculosis is given in Abstracts 12 and 17.

Cancer.* The number of deaths from cancer in Northern Ireland during 1977 was 2,976 giving a death rate of 1.94 per 1,000 of the population which is 0.09 above the rate for 1976.

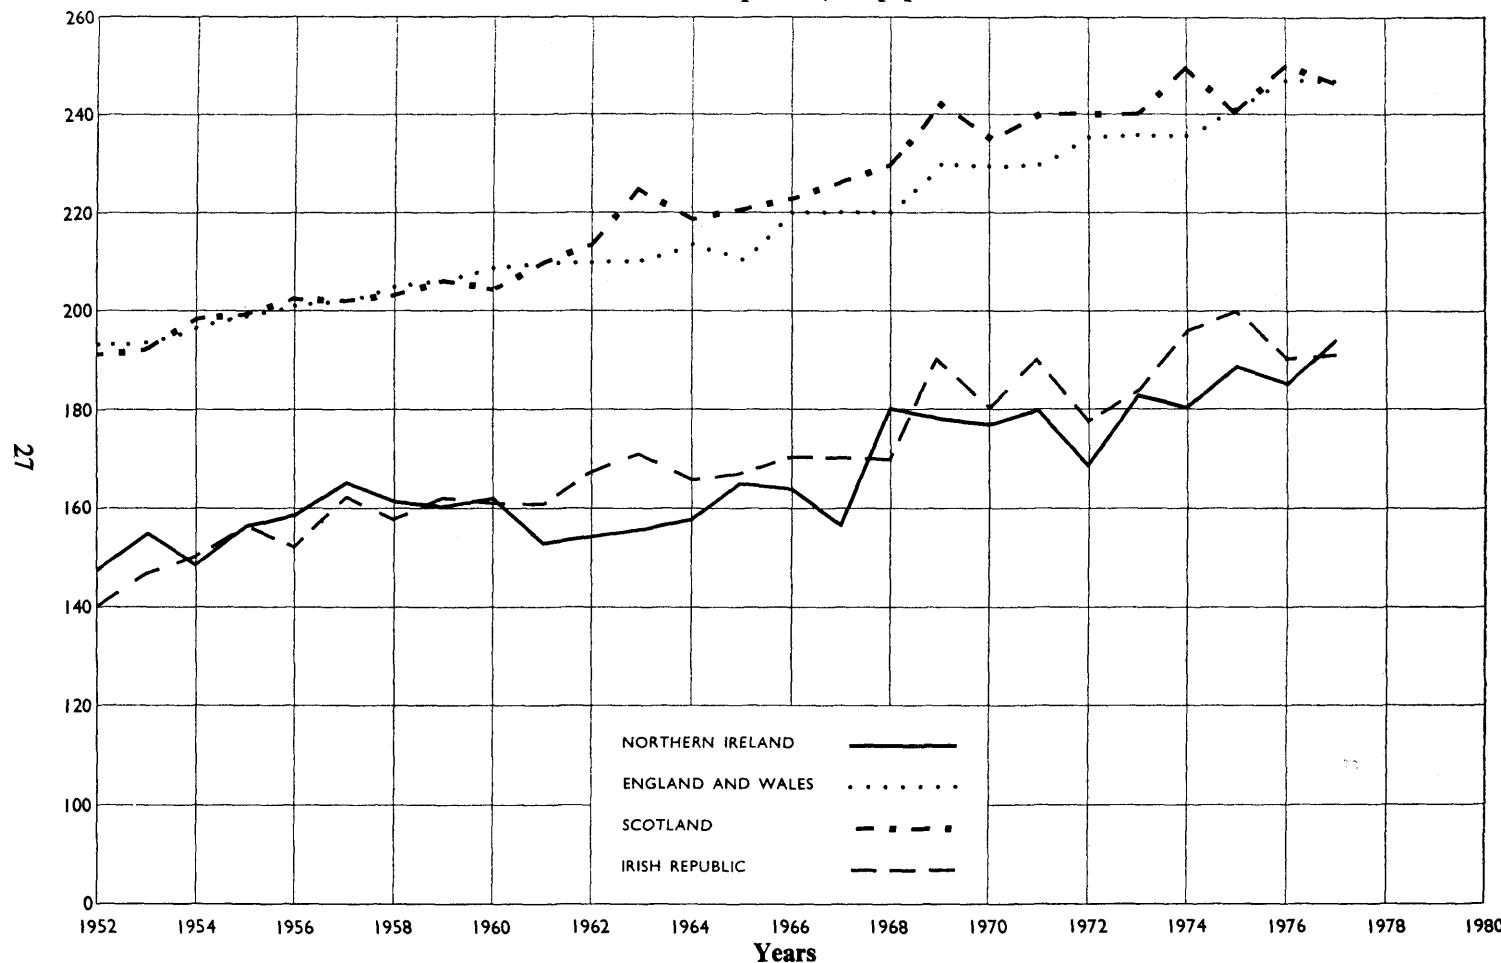

The death rates from cancer and tuberculosis were roughly the same in 1931 (i.e. 1.26 for cancer and 1.23 for tuberculosis). Since then the cancer rate has increased by 54.0 per cent. and the tuberculosis rate has decreased by 98.4 per cent.

TABLE M. Northern Ireland: Deaths and death rates from cancer, 1926, 1937, 1951, 1961, 1966 and 1968-1977.

	MALES		FEMALES		TOTAL	
	Number of deaths	Rate per 1,000 of the estimated male population	Number of deaths	Rate per 1,000 of the estimated female population	Number of deaths	Rate per 1,000 of the estimated population

* See definition on page 1.

DIAGRAM 4. Death rates (crude) from cancer in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1952-77. Rate per 100,000 population.

As will be seen from Abstract 12 the most frequent sites of fatal cancer among males during the year were bronchus and lungs, 501; stomach, 190; intestines, 155; prostate, 136; pancreas, 76 and rectum, 76. Among females the most frequent sites were breast, 318; intestines, 179; bronchus and lungs, 151; stomach, 144; pancreas, 74; ovary, fallopian tube and broad ligament, 72 and rectum 59.

For many years cancer of the stomach proved to be the most frequent site of fatal cancer for both sexes and it remained so among females up to 1961 when it took second place to cancer of the breast. Since 1954 however, cancer of the lung has been more prevalent among males.

Table M1 shows the numbers and rates of lung cancer deaths by sex for the past ten years. Abstract 12 gives particulars regarding the cancer sites by sex and age-groups and Abstracts 11, 17 and 21 give details of cancer incidence in administrative areas.

TABLE M1. *Northern Ireland: Deaths and death rates from lung cancer, 1968-1977.*

YEAR	Number			Rate per 100,000 population		
	Males	Females	Persons	Males	Females	Persons
1968	434	91	525	59	12	35
1969	442	102	544	60	13	36
1970	435	87	522	58	11	34
1971	479	101	580	63	13	38
1972	431	111	542	56	14	35
1973	498	113	611	65	14	39
1974	475	105	580	62	13	37
1975	488	135	623	64	17	40
1976	503	143	646	66	18	42
1977	501	151	652	66	19	42

Cerebral haemorrhage, apoplexy, etc. The deaths assigned to this group (described as "cerebrovascular disease") numbered 2,393 giving a rate of 1.56 per 1,000 of the population. This rate is the same as that for 1976, and is 0.03 below the average rate for the period 1972-76. The rate per 1,000 of the male population was 1.24 whilst the female rate was 1.86. Details of deaths in this group by ages are shown in Abstract 12.

Heart diseases. The deaths from the various forms of heart disease during the year numbered 6,306, the rate per 1,000 of the population being 4.10 which is 0.13 above that for the previous year and is 0.21 above the average for the five years 1972-1976.

TABLE N. *Northern Ireland: Deaths and death rates from heart disease (all forms), 1926, 1937, 1951, 1961, 1966 and 1968–1977.*

YEAR	MALES		FEMALES		PERSONS	
	Number of deaths	Rate per 1,000 of the estimated male population	Number of deaths	Rate per 1,000 of the estimated female population	Number of deaths	Rate per 1,000 of the estimated population
1926	1,241	2.04	1,437	2.22	2,678	2.14
1937	1,885	3.02	1,815	2.76	3,700	2.89
1951	2,785	4.16	2,722	3.87	5,507	4.01
1961	3,199	4.60	2,708	3.70	5,907	4.14
1966	3,178	4.41	2,611	3.45	5,789	3.92
1968	3,128	4.27	2,579	3.35	5,707	3.80
1969	3,228	4.38	2,691	3.47	5,919	3.91
1970	3,240	4.35	2,551	3.27	5,791	3.80
1971	3,232	4.28	2,551	3.27	5,783	3.77
1972	3,373	4.41	2,766	3.52	6,139	3.96
1973	3,254	4.25	2,769	3.54	6,023	3.89
1974	3,381	4.41	2,550	3.26	5,931	3.83
1975	3,274	4.30	2,574	3.31	5,848	3.80
1976	3,321	4.36	2,793	3.60	6,114	3.97
1977	3,512	4.61	2,794	3.60	6,306	4.10

Of the total number of deaths from heart diseases, 5,017, (79.6 per cent.) were in the group known as ischaemic heart disease which includes coronary disease. Chronic rheumatic heart disease accounted for 170 (2.7 per cent.), hypertensive heart disease for 115 (1.8 per cent.) and other forms of heart disease for 1,004 (15.9 per cent.) of all deaths from heart diseases.

I.C.D. numbers 393–398, 402, 404, 410–414 and 420–429 as shown in Abstract 12 give the age and sex breakdown of all deaths from heart diseases.

Bronchitis. The deaths from bronchitis during the year numbered 621, giving a rate of 0.40 per 1,000 of the population, which is 0.03 below the rate for 1976. Bronchitis was also an important contributory factor in 440 deaths though not related to the condition taken to have initiated the sequence of events leading to death.

Pneumonia. Deaths from pneumonia numbered 787 during the year 1977, the rate of 0.51 per 1,000 of the population being 0.06 below the rate for 1976. The average rate for the five years 1972–1976 was 0.61.

Pregnancy and childbirth. The mortality of women during pregnancy and childbirth is classified under two headings, namely—(1) deliveries and complications of pregnancy, childbirth and the puerperium and (2) deaths with mention of pregnancy, childbirth and the puerperium but not classified as maternal. The causes of death shown in detailed list numbers 630–678 of Abstract 12 are those to which the former group were assigned.

There was 1 death from diseases of pregnancy, childbirth, and the puerperal state in 1977 giving a rate of 0.04 per 1,000 births (live and still). There were 3 such deaths in 1976.

There were 2 deaths in which maternal conditions were coincidentally present in 1977. In 1976 there were no such deaths.

TABLE O. Northern Ireland: Deaths in which maternal conditions were coincidentally present 1977.

Detailed List	CAUSES OF DEATH	All Ages	Ages

† Rate per 1,000 live births for years 1926-60. The rates from 1961 are per 1,000 total births (live and still).

Infant mortality. Deaths of infants under 1 year of age numbered 438 or 17 per 1,000 live births registered. This rate is one below that for the previous year. Of these deaths, 246 were of males and 192 of females, the former number being equivalent to 19 per 1,000 live births of males and the latter to 16 per 1,000 live births of females. The corresponding rates for 1976 were 19 and 17 respectively. In 1977 the provisional infant mortality rate in England and Wales was 14, in Scotland 16 and in the Irish Republic 16. Comparative figures for previous years are shown in Table B on page 5.

DIAGRAM 5. Maternal mortality rates (crude) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1952-77. Rate per 1,000 live births.

Neonatal mortality. Deaths of infants aged under four weeks numbered 271 representing a rate of 11 per 1,000 live births. This is equivalent to 61·9 per cent. of all deaths of children under 1 year of age. The corresponding figures for 1976 were 350, 13 and 72·5 per cent. respectively. The 1977 rates for England and Wales, Scotland and the Irish Republic were (provisionally) 9, 11 and 10

Perinatal Deaths (i.e. deaths of children within the first week of life together with all still-births) numbered 544 giving a rate of 21 per 1,000 live and still-births. Comparative rates in England/Wales and Scotland were 17 and 18 respectively

Abstract 11 gives the number of infant deaths, together with the number of births, for each of the 26 District Council areas in Northern Ireland.

Abstract 22 gives the number of deaths of children under 1 year of age for Northern Ireland by District Council areas for the year 1977; the numbers are given by sex and age groups.

The number of infant deaths for 1977 by age and cause of death are given in Abstract 24, together with the infant mortality rates by cause.

Mortality among illegitimate children. Deaths of illegitimate children under 1 year of age numbered 11 in 1977, which is equivalent to a rate of 7.9 per 1,000 of the illegitimate live births registered and is 1.1 below the rate for the previous year. The corresponding rates for legitimate children in 1976 and 1977 were 18.8 and 17.7 per 1,000 legitimate live births.

Deaths of illegitimate infants aged under four weeks (illegitimate neonatal mortality) numbered 8, representing 72.7 per cent. of the total deaths of all illegitimate children under 1 year of age. The corresponding figures for 1976 were 7 and 58.3 per cent. respectively.

Abstract 23 shows the number of deaths of illegitimate children under 1 year of age for Northern Ireland by District Council areas; the sex and age distribution is also shown.

Abstract 24 gives the number of deaths and mortality rates of illegitimate children under 1 year of age by cause.

Violent deaths. Deaths from causes other than natural causes are termed violent deaths and are classified according to both the external circumstances giving rise to injury, expressed as the "external cause of injury" and to the nature of the injury sustained, designated as the "nature of injury" (see Abstract 19).

The number of deaths ascribed to violence during the year was 1,097 (705 males and 392 females) which is 21 more than the number registered in 1976, and is equivalent to 6·5 per cent. of the total deaths registered.

TABLE S. Northern Ireland: Violent deaths by external cause of injury 1973-1977.

CAUSES OF DEATH	1973	1974	1975	1976	1977
<i>Accidental Causes:</i>					
Drowning	29	32	39	41	34
Falls	207	227	249	230	233

Injury undetermined whether accidentally or purposely inflicted	29	20	42	26	25
TOTAL DEATHS FROM VIOLENCE	1,228	1,128	1,092	1,118	1,097

Of the 1,097 deaths 311 were attributed to transport accidents (E800-E845) (excluding drowning from watercraft (E830, E832)). Road vehicle accidents (E810—E827) accounted for 310 deaths as compared with 322 in 1976. Table S1 affords comparison of numbers of deaths from road vehicle accidents in 1977 with those for the four preceding years by sex and certain age-groups whilst Table S2 shows the various categories of persons killed in motor vehicle accidents and details of other transport accidents.

TABLE S1. Northern Ireland: Deaths from road vehicle accidents (E810—E827) 1973-1977.

	All ages	Under 5 years	5-14	15-34	35-54	55-74	75 and over
MALES . . .							
1973	291	13	30	113	56	59	20
1974	266	7	29	103	44	52	31
1975	226	7	22	95	38	45	19
1976	230	7	17	102	48	37	19
1977	211	11	12	83	40	52	13
FEMALES . . .							
1973	99	12	12	22	15	24	14
1974	74	2	3	16	8	26	19
1975	81	7	11	20	10	21	12
1976	92	1	7	32	9	24	19
1977	99	2	5	32	14	32	14

Other accidents accounted for 446 deaths and of these deaths 233 were ascribed to falls, 34 to drowning, 78 to poisons or poisonous gases, 42 to fire and heat, 3 to mechanical suffocation, 8 to machinery and 48 to other accidental causes. A detailed break-down showing non-transport accidents by sex and age-groups is given in Abstract 20.

Deaths from accidents recorded as occurring in the home numbered 341 compared with 324 in 1976 and 277 in 1975. Most accidents in the home are occasioned by falls and it should be noted that in 1977 there were 8 deaths from falls where the place of the accident was unspecified compared with 19 in 1976. Fuller details of these and other accidents (apart from transport accidents) are given in Abstract 20.

During the year there were 70 cases of suicide (38 males and 32 females) compared with 68 (42 males and 26 females) in 1976, 216 deaths from homicide and 26 from war operations. In addition there were 25 deaths in which it was not possible to determine whether the injuries were accidentally or purposely inflicted.

TABLE S2. *Deaths from transport accidents, by sex and age 1977.*

Deaths in which violence was stated to be the sequel to some other cause are correlated in Table S3. Alcoholism was, as usual, the greatest single factor in this group causing the deaths of 8 people. This figure, however, does not include deaths caused by other people who were in a state of intoxication.

TABLE S3. Northern Ireland: Deaths in which violence was a terminal cause, 1977.

CERTIFICATION OF DEATHS

All deaths must be certified by either a medical practitioner or a coroner and Table T shows the type of certification during the year. The circumstances of 2,947 deaths (17.4 per cent. of all deaths) were considered by the coroners and in 892 of these cases inquests were held. In 1,015 cases the deaths were certified by coroners after post-mortem examinations had proved inquests to be unnecessary.

Of the 13,974 deaths certified by medical practitioners the deceased persons were not seen after death by the practitioners in 1,922 cases.

LIFE TABLE

The expectation of life is the average number of years which would be lived by a group of people of given age who are continuously subject to given mortality rates, usually those of a selected year or years.

The abridged life table shown as Table U is based on the mortality rates for 1975-1977 and shows the expectation of life at various age-points together with the number of persons who would survive to given age x out of 10,000 born, if subjected throughout their lives to this mortality experience.

Thus 98 per cent. of males and 98 per cent. females would survive the first year of life; 97 per cent. of males and 97 per cent. of females would reach the age of 20; 77 per cent. of males and 86 per cent. of females would reach the age of 60 and the men could then expect an average future lifetime of 15 years compared with 19 years for women.

Based on the mortality experience of 1975-1977 the expectation of life at birth was 67.5 years for males and 73.8 years for females; at age one year the expectations were 67.9 years for males and 74.1 years for females. Table U1 affords comparison of these figures with those for certain preceding years.

TABLE U. Northern Ireland: Abridged Life Table 1975-1977.

Age x	Males		Females	
	lx	$l^o x$	lx	$l^o x$
0	10,000	67.54	10,000	73.84
1	9,800	67.92	9,825	74.15

75	3,826	6.85	5,943	8.74
80	2,289	4.77	4,313	6.10
85	955	2.95	2,331	4.15

This abridged life table is constructed from the estimated population and the total deaths registered during the years 1975-1977.

The column headed lx shows the numbers who would survive to exact age lx out of 10,000 born who were subject throughout their lives to the death probabilities indicated by the monthly records for the years 1975-1977.

Column $l^o x$ gives the "expectation of life"—that is the average future lifetime which would be lived by a person aged exactly x if subject to those death probabilities.

TABLE U1. Northern Ireland: Expectation of life at birth, at one year of age and at 65 years of age for certain periods between 1890 and 1977.

Period	Expectation of life					
	At birth		At age one year		At age 65 years	
	Male	Female	Male	Female	Male	Female
1890-92	46.3	45.7	—	—	10.6	10.6

1975-77	67.5	73.8	67.9	74.1	11.8	15.3

MIGRATION

The population figures ascertained at each census enable the net migration during the inter-censal periods to be calculated. Table V shows that during the period of approximately four and a half years between the censuses taken on the 9th October, 1966 and the 25th April, 1971 there was a net outward movement of 31,521 persons to all countries including other parts of the British Isles.

TABLE V. *Northern Ireland: Net migration during inter-censal period 1966–1971.*

	Males	Females	Total
Population, Census of 1966	723,884	760,891	1,484,775
Births, 1966–1971	76,518	72,188	148,706
Deaths, 1966–1971	38,102	34,476	72,578
Natural increase*	38,416	37,712	76,128
Population 1966 plus natural increase . . .	762,300	798,603	1,560,903
Adjustment for H.M.F's	+6,790	—107	6,683
Population 1966 plus natural increase plus adjustment for H.M.F's . . .	769,090	798,496	1,567,586
Population Census of 1971	754,676	781,389	1,536,065
Net movement outwards	14,414	17,107	31,521

*The excess of births over deaths.

Table VI shows the natural increase in the population for each inter-censal period since birth and death registration commenced in 1864, together with the net movement outwards and the percentage of the increase lost by migration.

TABLE VI. *Northern Ireland: Inter-censal variations in population, 1871–1971.*

Inter-censal period	Population at beginning of period	Natural increase*	Net movement outwards	Percentage of increase lost by migration
1871–1881	1,359,190	104,350	158,724	152
1881–1891	1,304,816	71,910	140,670	196
1891–1901	1,236,056	68,634	67,738	99

*Excess of births over deaths.

†Including deaths in H.M. Forces and Mercantile Marine which occurred outside Northern Ireland
It is estimated that during the year ended 30 June, 1977 the net outward migration amounted to 8,200 persons.

ADMINISTRATION

Introductory: The administrative functions of the Registrar General comprise the registration of births (live and still), deaths, marriages and adoptions, and the provision or supervision of machinery for dealing with preliminaries to marriages other than those according to the rites of the Roman Catholic Church.

Buildings licensed or registered for marriages: The number of places of worship (other than those belonging to the Roman Catholic Church) in which marriages could be solemnised, as at 31st December in each of the years 1973, 1974, 1975, 1976 and 1977 are as follows:

<i>Denomination</i>	1973	1974	1975	1976	1977
Church of Ireland . . .	415	414	416	416	416
Presbyterian . . .	515	516	516	517	517
Methodist . . .	161	160	159	159	160
Others . . .	353	369	382	390	396
TOTAL . . .	1,444	1,459	1,473	1,482	1,489

Legitimacy Acts (N.I.), 1928 to 1961: Under these Acts an illegitimate child whose parents have married is, subject to certain conditions, legitimised, and the Registrar General is empowered to authorise the registration or re-registration of the birth. During 1977 the registration or re-registration of the births of 230 children was authorised, the comparative figures for 1976 and 1975 being 199 and 236 respectively.

Adoption Act (N.I.), 1967 and Adoption (Hague Convention) Act (N.I.) 1969
Registers of children adopted under the provisions of the above Acts and of the previous Adoption Acts of 1929 and 1950 are kept in the General Register Office, to which the adoption orders made by the Courts are transmitted. A certified copy of an entry in the Adopted Children Register is evidence of adoption, and is also evidence of the date of birth of the adopted child. The children whose adoptions were recorded in the Adopted Children Registers during 1977 numbered 367 whilst the figures for 1976 and 1975 were 388 and 369 respectively.

Searches and certificates: The original records of live births, deaths and marriages registered in Northern Ireland were in the custody of local registration officers until 1 October 1973*, since which date the original records of births and deaths have been centralised in the General Register Office at Oxford House 49/55 Chichester Street Belfast; marriage original records are held by the local Registrars. The following statement shows the activity during 1977 by way of searches and issue of certificates from the General Register Office:—

*The date of introduction of a new system of registration in Northern Ireland: See The Births, Deaths and Marriages Registration (N.I.) Order 1973.

YEAR	OFFICIAL		PAID		
	Searches	Certificates	Searches	Certificates	
				Full	Short

1977	478	478	18,578	20,985	36,791

Verifications. Requests for the verification of particulars of events registered are received from Government Departments in connection with claims for pensions, etc. During the year the number of cases dealt with was 17,446.

METEOROLOGY

The following synopsis of weather experienced over Northern Ireland during 1977 is furnished by the Director-General, Meteorological Office through the Climatological Services and Public Records Office, Tyrone House, Ormeau Avenue, Belfast BT2 8HH.

Where the term "average" is used it refers to the World Meteorological Organisations current standard period 1941 to 1970 with respect to rainfall, temperature and sunshine.

Tables compiled and attached give data in respect of certain stations: columns 2 and 3 give the "highest" and "lowest" air temperatures recorded on any date during the month indicated; in columns 4 and 5 the mean daily maximum and minimum air temperatures are given. There is also a table giving similar data related to Northern Ireland as a whole based on a selection of stations appropriate to the meteorological element and not necessarily those whose data are published in the preceding pages. This information smoothes out the variation experienced in different parts of the province and therefore gives a general picture. The "highest" and "lowest" however refer to values from around sixty stations recording temperatures in Northern Ireland and are not restricted to the seven stations data given in the preceding pages.

Temperature is given in degrees centigrade. To convert actual values to degrees fahrenheit multiply by 9, divide by 5 and add 32·0 degrees. To convert "difference from average" in the degree centigrade scale to fahrenheit 1·0 degrees centigrade equals 1·8 degrees fahrenheit. Rainfall totals are in millimetres and sunshine a daily mean value in hours per day.

January was cold with rainfall and sunshine above average. Snow and sleet fell on 12 occasions, an unusually high frequency. Rainfall was 107% sunshine 110% and temperatures 1·1 degrees centigrade below normal. It was stormy with 4 occurrences of gales, 3 of hail, 1 of thunder, 6 of fog, 15 occurrences of air frost and 22 of ground frost away from coasts.

February was exceptionally wet and dull. It was the wettest February month since 1961 and only February 1923 of the present century was wetter. The period 1st to 21st was exceptionally wet. The rainfall value over the province as a whole was 219%, more than twice the normal. It was the dullest February since 1954 with a value of 68%. There were 15 occurrences of air frost and 22 of ground frost especially away from coasts. There were 3 occurrences of fog, 1 of thunder and 1 of hail.

March was wet, dull and mild. Rainfall was 129% and sunshine 83%. Air temperatures were 0·8 degrees centigrade above normal. The incidence of air and ground frost was below average. There were 3 occurrences of air frost, 10 of ground frost, 4 of gales, 2 of thunder, 5 of fog and 4 of hail.

April was cool with normal sunshine and a little above average rainfall. There were 5 occurrences of air frost and 12 of ground frost. It was the coldest April since 1970 with temperatures 1·0 degrees centigrade below normal. There were 4 occurrences of gale and 3 of thunder.

May was very dry and sunny though temperatures were 0.8 degrees centigrade below normal. Official droughts occurred in many areas between 13th and 31st. It was the second driest May this century. A freak thunderstorm occurred at Ballymena, Co. Antrim on 16th and caused fire damage to the Braid Spinning Company and Electricity Supplies in Ballymena town. Although the first 2 weeks of the month were cold from 20th onwards it was significantly warm. The incidence of ground frost was unusually high. Rainfall was 42% and sunshine 124%.

June was cool and dry with sunshine a little above normal. Rainfall was 72% of average, sunshine 106% and temperatures 1.1 degrees centigrade below normal. A long dry spell occurred between 12th and 23rd. Gales were prevalent on 3 occasions mainly on Eastern coasts.

July was dry warm and sunny. Rainfall was 51% and it was the driest July since 1968. Temperatures were 1.1 degrees centigrade above normal and it was the warmest July since 1971. A long dry spell occurred between 3rd and 14th in most areas. The periods 3rd to 7th and 9th to 14th were very warm. The frequency of thundery activity was above normal.

August was sunny with below average temperatures and rainfall. Sunshine was 136% of average and it was the sunniest August month since 1968 in some areas. Rainfall was 92% and temperatures 0.1 degrees centigrade below normal. There were 3 occurrences of fog, 2 of thunder and 1 of gale on 24th.

September was dry but cool with below average temperature and sunshine. A sustained dry spell occurred 12th to 22nd in all areas. Rainfall was 65% of average, sunshine 93% and temperatures 0.8 degrees centigrade below normal. There were gales in exposed places during the last week of the month, 2 occurrences of fog, 1 of thunder and 2 of hail.

October was mild with temperatures above average though sunshine and rainfall were a little below normal. Rainfall was 97%, sunshine 93% and temperatures 1.2 degrees centigrade above average. It was the warmest October since 1971. There were no occurrences of air frost and only a few of ground frost. Gales occurred on 1st and 30th in exposed places, there were 3 occurrences of thunder, 3 of hail and 2 of fog.

November was cold and wet. Rainfall was 115% and temperatures 1.6 degrees centigrade below normal. Although the first part of the month was mild the period 12th to 30th was cold and it was very cold on 21st, 26th, 29th and 30th. There were 7 occurrences of air frost and 18 of ground frost, an unusually high frequency. There were 3 occurrences of snow and snow depths reached 15 centimetres over higher ground. There were 3 occurrences of gales locally, 6 on exposed coasts, 1 of thunder, 3 of hail and 5 of fog.

December was comparatively mild but very dull with sunshine well below normal; it was the dullest December month notably at Enniskillen, Co. Fermanagh since records began there in 1941. Rainfall was 87% of average over the province as a whole, sunshine 54% and temperatures 1.2 degrees centigrade above normal. There were 3 occurrences of snow/sleet, 1 of hail, 2 of fog, 2 of gale but locally 10 in exposed places.

1977 as a whole had below average rainfall, above average sunshine and temperatures a little below normal. Rainfall was 96%, sunshine 107% and temperatures 0.1 degrees centigrade below average. Notable features of the year were the wetness of February and only February

1923 was wetter since 1900. The first quarter of the year was cold, wet and dull. Although April, May and June were drier with droughts in most areas in May, the intensity of ground frost in May was unusual for the time of year. The May and June period was one of the driest May/Junes this century. During the period May to September the dry weather was very significant as was the nature of rainfall over the period May to July which was mostly thundery. Snowfalls in November giving depths of 15 centimetres over high ground coupled with a very unusual incidence of frost, the intensity of frost being severe, are worthy of mention. December sunshine was exceptionally low, the dullest in Co. Fermanagh since records began with a total of 12·2 hours for the month, a mere 29% of normal. The storminess of October to December period was highly significant especially along Eastern seabards.

TABLE X. Northern Ireland: Air temperature, rainfall and sunshine recorded at seven stations during the year 1977 and general values for the Province as a whole (final values*).

ABSTRACT 17. Abbreviated list numbers and equivalent detailed list numbers and causes of death (8th Revision I.C.D.).

Detailed List	Abbreviated List 'B'	CAUSE OF DEATH
000	1	Cholera
001	2	Typhoid fever
004, 006	3	Bacillary dysentery and amoebiasis
008, 009	4	Enteritis and other diarrhoeal diseases
010-012	5	Tuberculosis of respiratory system
013-019	6	Other tuberculosis, including late effects
020	7	Plague
032	8	Diphtheria
033	9	Whooping cough
034	10	Streptococcal sore throat and scarlet fever
036	11	Meningococcal infection
040-043	12	Acute poliomyelitis
050	13	Smallpox
055	14	Measles
080-083	15	Typhus and other rickettsioses
084	16	Malaria
090-097	17	Syphilis and its sequelae
Rem. 000-136	18	All other infective and parasitic diseases
Cancer of:—		
151	19A	stomach
152-154	19B	intestines and rectum
162	19C	trachea, bronchus and lung
174	19D	breast
180-189	19E	genito-urinary organs
Rem. 140-200,	19F	other sites
202, 203, 208, 209	19G	Hodgkin's disease and leukaemia
201, 204-207	20	Benign neoplasms and neoplasms of unspecified nature
250	21	Diabetes mellitus
260-269	22	Avitaminoses and other nutritional deficiency
280-285	23	Anaemias
320	24	Meningitis
390-392	25	Active rheumatic fever
393-398	26	Chronic rheumatic heart disease
402, 404	27A	Hypertensive heart disease
400, 401, 403	27B	Other hypertensive disease
Pt. of 410-414	28A	Ischaemic heart disease with hypertension
Rem. of 410-414	28B	Ischaemic heart disease without hypertension
420-429	29	Other forms of heart disease
Pt. of 430-438	30A	Cerebrovascular disease with hypertension (benign)
Rem. of 430-438	30B	Cerebrovascular disease without hypertension
440-458	46A	Other diseases of circulatory system
470-474	31	Influenza
480-486	32	Pneumonia
490-493	33	Bronchitis, emphysema and asthma
Rem. 460-519	46B	Other diseases of respiratory system
531-533	34	Peptic ulcer
540-543	35	Appendicitis
550-553, 560	36	Intestinal obstruction and hernia
571	37	Cirrhosis of liver
Rem. 520-577	46C	Other diseases of digestive system
580-584	38	Nephritis and nephrosis
600	39	Hyperplasia of prostate
640-645	40	Abortion
630-639, 650-678	41	Other complications of pregnancy, childbirth and puerperium
740-759	42	Congenital anomalies
764-768, 772, 776	43	Birth injury, difficult labour and other anoxic and hypoxic conditions
760-763, 769-771,	44	Other causes of perinatal mortality
773-775, 777-779,		
780-796	45	Symptoms and ill-defined conditions
Rem. 240-738	46D	All other diseases
E810-E823	47	Motor vehicle accidents
E800-E807,		
E825-E949,	48	All other accidents
E950-E959	49	Suicide and self-inflicted injuries
E960-E999	50	All other external causes
