4 Death rates from cancer per 100,000 population . . . .	29
5 Maternal mortality rates per 1,000 live births . . . .	33
6 Infant mortality rates per 1,000 live births . . . .	36

## GENERAL NOTES

---

The figures contained in this Report may be regarded as superseding the provisional figures already published for the year 1978 in the Registrar General's quarterly returns.

Throughout the Report, births and deaths have been recorded according to date of registration and not to date of occurrence. They have also been allocated to the district of normal residence, if in Northern Ireland; births have been assigned to the districts containing the normal residence of parents, and deaths to the districts containing the normal residence of the deceased persons. Events occurring in Northern Ireland relating to persons whose normal residence is outside Northern Ireland have been assigned to the district of occurrence.

Rates are assessed per 1,000 of the estimated home population as at 30 June unless otherwise stated. The home population comprises the population of all types in Northern Ireland including Her Majesty's forces. Marriage rates relate to the number of marriages solemnised, and not to the number of persons married.

Comparisons with rates (births, deaths etc.) recorded in other parts of the British Isles are included in several tables and diagrams. These comparisons are substantially correct but it should be remembered that (with the exception of Diagram 3) they are crude rates only and take no account of changes in, or differences between, the age and sex structure of the populations.

Generally speaking, the classifications adopted for the purposes of this Report are the Detailed and Abbreviated Lists contained in the "Manual of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1965."

The term cancer, where used, refers to all malignant neoplasms and neoplasms of the lymphatic and haematopoietic tissues, except Hodgkin's disease, leukaemia and aleukaemia (I.C.D. Nos. 201, 204-207).

Where more than one cause of death is reported, the death is classified according to the underlying cause, i.e. the disease or injury which initiated the train of morbid events leading directly to death. This method of classification is followed even if the deceased may have recovered from the underlying cause long before the date of death.

In the text and tables the term "stillbirth" refers to a child born after the 28th week of pregnancy and which did not breathe or show any other sign of life. Perinatal deaths are deaths of infants under one week and also includes still-births; "neonatal mortality" relates to deaths of children under 4 weeks of age and "infant mortality" to deaths of all children (including neonatal) under 1 year of age.

In general in the tables and abstracts, dots (.) are used to indicate "none" and dashes (—) are used to indicate that information cannot be given or that the headings are not applicable.

## REPORT 1978

### SUMMARY

In 1978 there was an increase in the birth and marriage rates, and a decrease in the death and infant mortality rates compared with 1977. Still-births and perinatal death rates also showed a reduction in comparison to the previous year.

The following figures indicate the general trend of marriages, births and deaths over the past 30 years. More detailed comparisons will be found in Tables A and A1.

Table B shows comparative statistics for Northern Ireland, England and Wales, Scotland and the Irish Republic. The marriage rate in Northern Ireland was lower than in England, Wales and Scotland. The live birth rate was lower than that of the Irish Republic but higher than that of England, Wales and Scotland; the death rate was lowest in the Irish Republic.

<i>Previous estimated population</i>		<i>1543500 / 1545500</i>

## POPULATION

The home population of Northern Ireland estimated as at 30 June 1978 was 1,538,800 persons, an increase of 1,500 from the mid 1977 figure. This estimate, comprising civilians and members of H.M. forces stationed in Northern Ireland, is based on the census taken on 25 April, 1971 (1,536,065 persons) and takes account of natural increase and net migration. During the year ended 30 June 1978, the natural increase of 9,200 (approx.) was off-set by net migration of 7,500 (approx.). Further details regarding migration are shown on page 44.

The total population is further analysed by sex and age in Table C1.

Table C shows the population of the 26 District Council areas.

TABLE C. *Population of 26 District Council Areas as recorded at the census of 1971 and as estimated at mid-year 1978.*

The 1971 Census population by age and sex for Northern Ireland and for District Council Areas is given in Abstract 1.

## MARRIAGES

**Number and rate.** Marriages registered during the year numbered 10,304 giving a rate of 6·7 per 1,000 population. The corresponding number and rate for 1977 were 9,696 and 6·3 respectively. In 9,405 (91·3 per cent.) of the total marriages both contracting parties were single; in 341 (3·3 per cent.) one or both were widowed and in 612 (5·9 per cent.) one or both were divorced. Of every 1,000 persons married 34 were previously divorced. This rate is 3 above that for 1977; comparative rates for the years 1958 and 1968 were 7 and 10 respectively. Further details are given in Abstracts 3 and 6.

The number of marriages celebrated in each month in 1978 was as follows:

January	. 445	April	. 762	July	. 1,304	October	. 708
February	. 457	May	. 540	August	. 1,534	November	. 505
March	. 930	June	. 1,104	September	. 1,431	December	. 584
Qtrs.: 1st	. 1,832	2nd	. 2,406	3rd	. 4,269	4th	. 1,797

This shows that the period July to September was the most popular quarter for weddings, August heading the monthly totals with 1,534. January was the least popular month.

**Ages of marriage.** Although the most popular age for marriage was 21 years for men and women, the arithmetical average age of men marrying in 1978 was 25·4 and of women 23·2. During 1977 this age was 25·3 among men and 23·2 among women. In 1968 the average age was 26·2 for men and 23·8 for women. The mean age at marriage of persons marrying for the first time in 1978 was 24·2 years for men and 22·3 years for women. Of the contracting parties 1·1 per cent. of the husbands and 5·6 per cent. of the wives were minors (the age of majority was lowered from 21 to 18 from 1 January 1970) the relative figures for 1968 being 12·6 per cent. and 30·6 per cent. Further statistics will be found in Table D and Abstracts 4, 5, 6, 7 and 8.

**Method of celebration.** Table D1 shows the marriages registered during the years 1927, 1937, 1951, 1961, 1966, 1971 and 1974 to 1978 according to the form of celebration and Table D2 gives further details of marriages in 1978.

Marriages taking place in registrars' offices in the year under review represented 9·8 per cent. of the total marriages which is 0·8 above that for the previous year.

## FERTILITY

### LIVE BIRTHS

**Number and rate.** Live births registered during 1978, numbered 26,239, 802 more than in 1977. The birth rate was 17·1 per 1,000 of the estimated population, being 0·6 above the rate for 1977.

The monthly incidence of births was as follows:

January	. 2,512	April	. 2,189	July	. 2,584	October	. 2,720
February	. 2,067	May	. 2,066	August	. 1,917	November	. 1,943
March	. 1,795	June	. 2,531	September	. 2,158	December	. 1,757
Qtrs.: 1st	. 6,374	2nd	. 6,786	3rd	. 6,659	4th	. 6,420

Compared with 1977 each of the four quarters showed increases of 138, 176, 67 and 421 respectively.

Births registered during 1978, where the normal residence of the parents was outside Northern Ireland, numbered 114 as compared with 88 in 1977. In 89 cases an address in the Irish Republic was given. The 1977 figure was 64.

**Proportion of males to females.** Births of males in Northern Ireland in 1978 numbered 13,168 and those of females 13,071, the proportion of male to female births being 1,007 to 1,000. The corresponding proportion for each of the five years 1973-77 were 1,079, 1,062, 1,065, 1,056 and 1,070 respectively.

**Age of Parents.** Table E1 classifies legitimate live births according to the age of the mother. The maternal age-group which contributed the greatest number of live births was the group aged 25-29.

**Place of Occurrence.** Of all live births 99·7 per cent. occurred in hospitals.

**Multiple births.** Up to and including 1960, the birth of one live and one still-born infant was regarded as a single birth and the birth of two live infants and one still-born infant as a twin birth. Since 1961 still-births have been registered and these are now being taken into account to obtain accurate figures for single and multiple births. Of the 26,239 live births, 25,754 were the product of single, 479 of twin and 6 of triple pregnancies. There were no quadruple pregnancies. Table E2 gives the multiplicity of all births.

**Illegitimate births.** The number of illegitimate births was 1,523. This was 140 more than in 1977. The proportion to total live births (5·80 per cent.) was 0·36 above that for the previous year. In England and Wales, Scotland and the Irish Republic, the illegitimate births as percentages of the total live births in the year 1978 were 10·2, 9·8 and 4·2 respectively. Table F1 shows illegitimate live births by age of mother and reveals that illegitimacy is highest among women aged under 20.

## LIVE BIRTHS BY SOCIAL CLASS

For the first time the Annual Report includes information about live births by social class. Social class is based on the occupation of the father of the child except where the child is illegitimate and the father's name and occupation is not stated. In these cases the social class is determined from the mother's occupation. Occupations are grouped into the following categories:—professional, intermediate (includes managers, government officials and financial agents), skilled non-manual, skilled manual, partly skilled and unskilled. In addition there are two further groups, namely members of the Armed Forces and those whose occupations are inadequately described. This last group includes students, children under 16, housewives, persons with independent means, the permanently sick and those with no stated occupation.

In 1978 the largest percentage of all live births 35·0% (9,177) were those of the skilled manual group and the smallest, 1,528 or 5·8% (excluding those born to the Armed Forces and to those with no occupation) were from the professional group. Further details will be found in Table G.

Of the 1,523 illegitimate live births, 25·7% were born to parents' whose occupations could not be adequately described, 23·7% and 21·0% were born to the partly skilled and skilled manual groups respectively. The lowest percentage of illegitimate births (1·1%) was born to professional parents. Table G1 gives more detailed information.

Abstract 14 shows details of live births by sex, age of mother, number of previous children born and social class.

## STILL-BIRTHS

**Number and rate.** The number of still-births registered in 1978 was 243 giving a rate of 9.2 per 1,000 births (live and still). Comparative 1978 figures for England, Wales and Scotland were 5,108 and 8.5 and 517 and 8 respectively.

Abstract 37 shows the number of still-births in administrative areas by sex. The number of still-born children who would have been illegitimate had they been born alive was 24 representing 9.9 per cent. of all still-births. Six of the still-births were the product of multiple confinements further particulars of which will be found in Table E2 above. In 183 cases the births occurred after a period of less than 37 weeks gestation or the weight of the foetus was not more than 2,500 grammes. Of the 243 still-births, 209 were certified by doctors, 32 by mid-wives and 2 by the informants declaration. There were no still-births certified by a coroner. Postmortem examinations were held in 9 cases. Abstract 17 shows still-births by cause, sex and period of gestation. The percentage of still-births which occurred in hospitals in 1978 was 98.4 compared to 97.4 per cent. in 1977.

TABLE H. *Northern Ireland: Still-births and rates per 1,000 births (live and still) by District Council area, 1975-1978.*

## DEATHS

**Number and rate.** The number of deaths recorded during the year 1978 and the death rate per 1,000 of the population were 16,153 and 10·5 respectively. The comparable figures for 1977 were 16,921 and 11·1.

The monthly incidence of deaths was as follows:

January	. 1,665	April	. 1,343	July	. 1,248	October	. 1,256
February	. 1,374	May	. 1,482	August	. 1,228	November	. 1,256
March	. 1,575	June	. 1,315	September	. 1,098	December	. 1,313
Qtrs.: 1st	. 4,614	2nd	. 4,140	3rd	. 3,574	4th	. 3,825

Of the total deaths 8,458 were of males and 7,695 were of females, the equivalent annual death rates being 11·1 and 9·9 per 1,000 of the male and female estimated populations, respectively. The corresponding rates for 1977 were 11·7 and 10·4.

According to the ages stated to registrars, 492 (3·0 per cent.) of the total deaths were of children under 5 years of age and 11,429 (70·8 per cent.) were of persons aged 65 and upwards. There were 175 deaths of persons (45 males and 130 females) aged 95 and upwards and this number included 4 females and 1 male at 100, 4 females and 1 male at 101, 2 females at 102, and 1 female and 1 male at 103.

Table I gives a partial analysis of deaths by age for each sex and the percentage of the total deaths in each group.

TABLE I. *Northern Ireland: Deaths by sex and certain age-groups and as percentage of total deaths, 1978.*

Percentage of deaths in N.H.S. hospitals . . . . .	56.4	55.5	55.3	55.7

**Cause of death** Where more than one cause of death is reported, the death is classified to the underlying cause, i.e. the starting point in the sequence of events leading to death. See General Notes on page 1.

**Proportion of deaths from principal causes.** Heart diseases continued to bear by far the greatest proportion of the total deaths; other diseases having a high proportion were cancer, cerebrovascular disease (mainly cerebral thrombosis and cerebral haemorrhage) and respiratory diseases.

At ages under one year congenital malformations, premature birth, and pneumonia were the principal causes of death.

Between the ages of one and ten the highest proportions were caused by accidents, congenital malformations, pneumonia, cancer, Hodgkin's disease and leukaemia.

Between the ages of ten and twenty-four, accidents caused by far the largest proportion of deaths. The proportions from cancer, Hodgkin's disease and leukaemia were also high.

Between the ages of twenty-five and forty-four the principal causes were cancer, heart diseases, accidents, suicide and cerebrovascular disease.

From age forty-five the pattern was heart diseases followed by cancer, cerebrovascular disease and respiratory diseases.

Table L shows, for each of the principal causes, the number of deaths and the death rates for each year since 1974.

**Deaths from the principal epidemic diseases.** A total of 64 deaths (0.04 per 1,000 population) fell within this group. Of these, 56 were caused by influenza, 4 by diarrhoeal diseases of children under 2 years of age, 3 by whooping cough and 1 by scarlet fever. No deaths resulted from the other diseases comprising this group, viz., measles, acute poliomyelitis, typhoid fever, paratyphoid fever, typhus, diphtheria or smallpox.

The number of deaths from the principal epidemic diseases in 1977 was 87 and the relative rate was 0.06.

**Influenza.** There were 56 deaths from influenza in 1978 as against a total of 76 in 1977. The relative rates per 1,000 of the population were 0.05 (1978) and 0.05 (1977).

**Tuberculosis.** Deaths from this cause numbered 25 compared with 32 in 1977. The rate of 0.02 per 1,000 population is the same as that for 1977. Further details of comparable figures over the past years may be seen in Table M.

The tuberculosis death rates (provisional) for England and Wales, Scotland and the Irish Republic in 1978 were 0.02, 0.03 and 0.06 respectively. More detailed information about deaths from tuberculosis is given in Abstracts 21 and 28.

**DIAGRAM 3. Death rates (standardised) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1960-1978. Rate per 1,000 population.**

**Cancer.\*** The number of deaths from cancer in Northern Ireland during 1978 was 2,870 giving a death rate of 1.87 per 1,000 of the population which is 0.07 below the rate for 1977.

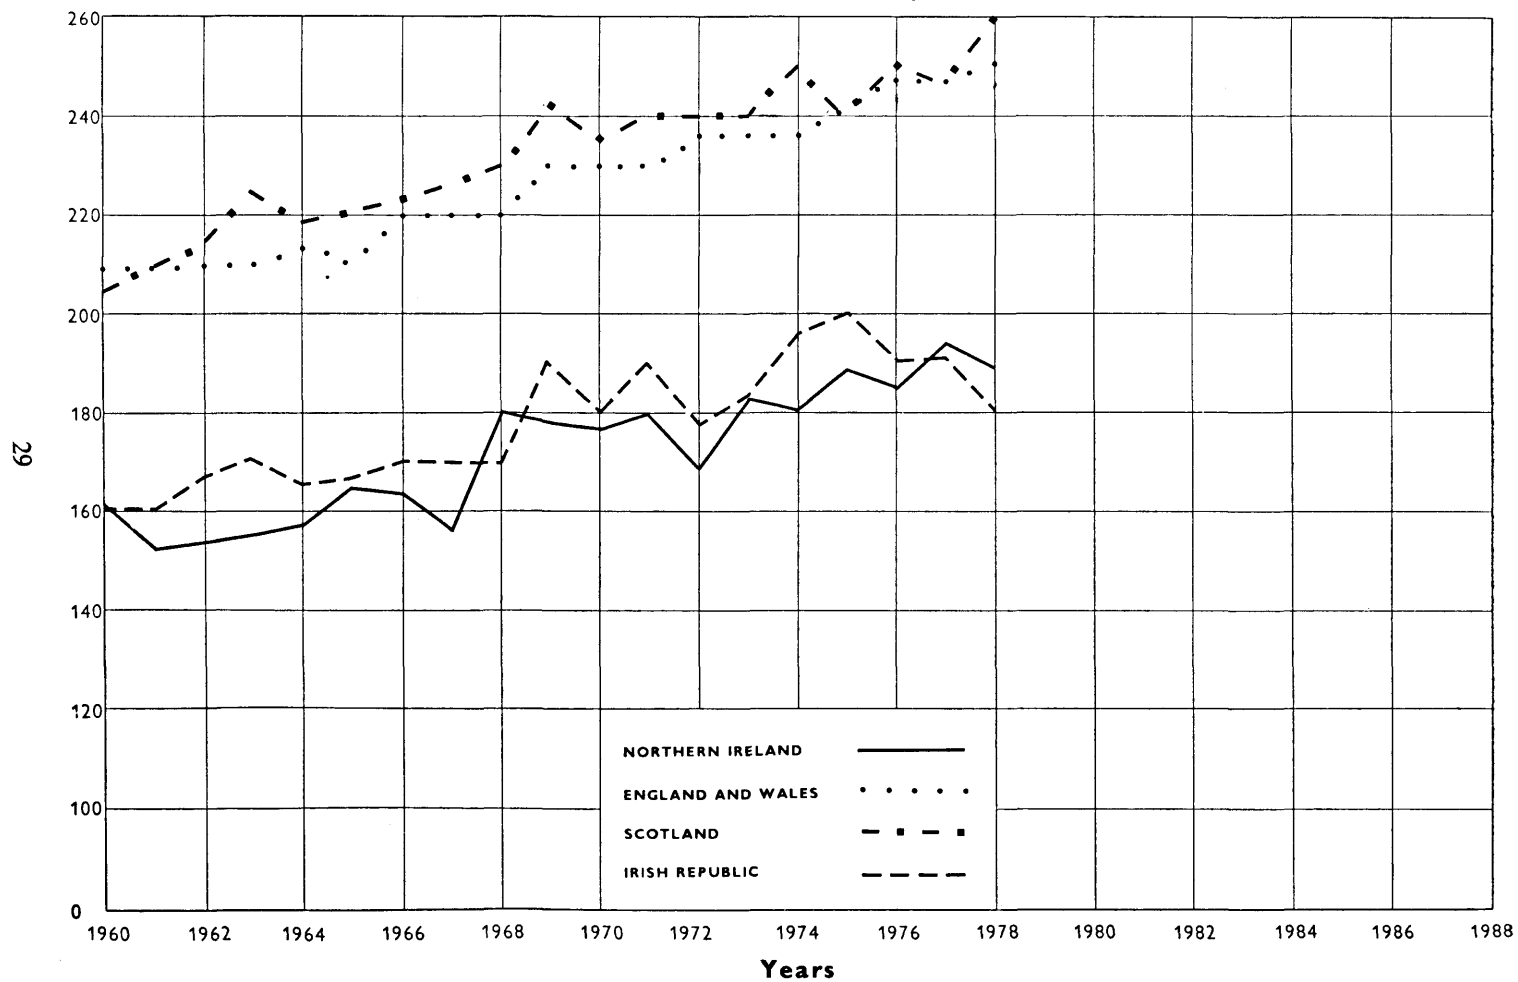

The death rates from cancer and tuberculosis were roughly the same in 1931 (i.e. 1.26 for cancer and 1.23 for tuberculosis). Since then the cancer rate has increased by 48.0 per cent. and the tuberculosis rate has decreased by 98.4 per cent.

\* See definition on page 1.

**DIAGRAM 4. Death rates (crude) from cancer in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1960-1978. Rate per 100,000 population.**

As will be seen from Abstract 21 the most frequent sites of fatal cancer among males during the year were bronchus and lungs, 520; stomach, 164; intestines, 129; prostate, 121; pancreas, 91; and rectum, 62. Among females the most frequent sites were breast, 294; intestines, 180; stomach, 140; bronchus and lungs, 132; pancreas, 68; ovary, fallopian tube and broad ligament, 62; and rectum 60.

For many years cancer of the stomach proved to be the most frequent site of fatal cancer for both sexes and it remained so among females up to 1961 when it took second place to cancer of the breast. Since 1954 however, cancer of the lung has been more prevalent among males.

Table N1 shows the numbers and rates of lung cancer deaths by sex for the past ten years. Abstract 21 gives particulars regarding the cancer sites by sex and age-groups and Abstracts 28, 32 and 37 give details of cancer incidence in administrative areas.

TABLE N1. *Northern Ireland: Deaths and death rates from lung cancer, 1968-1978.*

YEAR	Number			Rate per 100,000 population		
	Males	Females	Persons	Males	Females	Persons
1969	442	102	544	60	13	36
1970	435	87	522	58	11	34
1971	479	101	580	63	13	38
1972	431	111	542	56	14	35
1973	498	113	611	65	14	39
1974	475	105	580	62	13	37
1975	488	135	623	64	17	40
1976	503	143	646	66	18	42
1977	501	151	652	66	19	42
1978	520	132	652	68	17	42

**Cerebral haemorrhage, apoplexy, etc.** The deaths assigned to this group (described as "cerebrovascular disease") numbered 2,319 giving a rate of 1.51 per 1,000 of the population. This rate is 0.05 below the rate for 1977, and is 0.07 below the average rate for the period 1973-77. The rate per 1,000 of the male population was 1.23 whilst the female rate was 1.78. Details of deaths in this group by ages are shown in Abstract 21.

**Heart diseases.** The deaths from the various forms of heart disease during the year numbered 5,904, the rate per 1,000 of the population being 3.84 which is 0.26 below that for the previous year and is 0.08 below the average for the five years 1973-1977.

TABLE N2. *Northern Ireland: Deaths and death rates from heart disease (all forms), 1926, 1937, 1951, 1961, 1966 and 1969-1978.*

YEAR	MALES		FEMALES		PERSONS

1973	3,254	4.25	2,769	3.54	6,023	3.89
1974	3,381	4.41	2,550	3.26	5,931	3.83
1975	3,274	4.30	2,574	3.31	5,848	3.80
1976	3,321	4.36	2,793	3.60	6,114	3.97
1977	3,512	4.61	2,794	3.60	6,306	4.10
1978	3,312	4.35	2,592	3.34	5,904	3.84

Of the total number of deaths from heart diseases, 4,753, (80.5 per cent.) were in the group known as ischaemic heart disease which includes coronary disease. Chronic rheumatic heart disease accounted for 94 (1.6 per cent.), hypertensive heart disease for 99 (1.7 per cent.) and other forms of heart disease for 958 (16.2 per cent.) of all deaths from heart diseases.

I.C.D. numbers 393-398, 402, 404, 410-414 and 420-429 as shown in Abstract 21 give the age and sex breakdown of all deaths from heart diseases.

**Bronchitis.** The deaths from bronchitis during the year numbered 466, giving the rate of 0.30 per 1,000 of the population, which is 0.1 below the rate for 1977. Bronchitis was also an important contributory factor in 439 deaths though not related to the condition taken to have initiated the sequence of events leading to death.

**Pneumonia.** Deaths from pneumonia numbered 981 during the year 1978, the rate of 0.64 per 1,000 of the population being 0.13 above the rate for 1977. The average rate for the five years 1973-1977 was 0.60.

**Pregnancy and childbirth.** The mortality of women during pregnancy and childbirth is classified under two headings, namely—(1) deliveries and complications of pregnancy, childbirth and the puerperium and (2) deaths with mention of pregnancy, childbirth and the puerperium but not classified as maternal. The causes of death shown in detailed list numbers 630-678 of Abstract 21 are those to which the former group are assigned. However in 1978 there were no deaths from diseases of pregnancy, childbirth, and the puerperal state. There was 1 such death in 1977.

There were 2 deaths in which maternal conditions were coincidentally present in 1978. In 1977 there were also 2 such deaths.

TABLE O. *Northern Ireland: Deaths in which maternal conditions were coincidentally present 1978.*

† Rate per 1,000 live births for years 1926–60. The rates from 1961 are per 1,000 total births (live and still).

**DIAGRAM 5. Maternal mortality rates (crude) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1960-1978. Rate per 1,000 live births.**

**Infant mortality.** Deaths of infants under 1 year of age numbered 417 or 16 per 1,000 live births registered. This rate is one below that for the previous year. Of these deaths, 228 were of males and 189 of females, the former number being equivalent to 17 per 1,000 live births of males and the latter to 14 per 1,000 live births of females. The corresponding rates for 1977 were 19 and 16 respectively. In 1978 the infant mortality rate in England and Wales was 13, in Scotland 13 and in the Irish Republic 15. Comparative figures for previous years are shown in Table B on page 5.

TABLE P. *Northern Ireland: Infant Mortality by District Council area 1975-1978.*

AREA	Infant Mortality				Infant mortality rate per 1,000 live births

**Neonatal mortality.** Deaths of infants aged under four weeks numbered 275 representing a rate of 10 per 1,000 live births. This is equivalent to 65.9 per cent. of all deaths of children under 1 year of age. The corresponding figures for 1977 were, 271, 11, and 61.9 per cent. respectively. The 1978 rates for England and Wales, Scotland and the Irish Republic were 9, 9 and 10.

TABLE P1. *Northern Ireland: Neonatal mortality by District Council area 1975-1978.*

**Perinatal Deaths** (i.e. deaths of children within the first week of life together with all still-births) numbered 480 giving a rate of 18 per 1,000 live and still-births. Comparative rates in England, Wales and Scotland were 16 and 15 respectively.

Abstract 37 gives the number of infant deaths, together with the number of births, for each of the 26 District Council areas in Northern Ireland.

Abstract 33 gives the number of deaths of children under 1 year of age for Northern Ireland by District Council areas for the year 1978; the numbers are given by sex and age groups.

The number of infant deaths for 1978 by age and cause of death are given in Abstract 35, together with the infant mortality rates by cause.

**Mortality among illegitimate children.** Deaths of illegitimate children under 1 year of age numbered 17 in 1978, which is equivalent to a rate of 11.2 per 1,000 of the illegitimate live births registered and is 3.3 above the rate for the previous year. The corresponding rates for legitimate children in 1977 and 1978 were 17.7 and 16.2 per 1,000 legitimate live births.

Deaths of illegitimate infants aged under four weeks (illegitimate neonatal mortality) numbered 11, representing 64.7 per cent. of the total deaths of all illegitimate children under 1 year of age. The corresponding figures for 1977 were 8 and 72.7 per cent. respectively.

**Violent deaths.** Deaths from causes other than natural causes are termed violent deaths and are classified according to both the external circumstances giving rise to injury, expressed as the "external cause of injury" and to the nature of the injury sustained, designated as the "nature of injury" (see Abstract 30).

The number of deaths ascribed to violence during the year was 1,073 (672 males and 401 females) which is 24 less than the number registered in 1977, and is equivalent to 6.6 per cent. of the total deaths registered.

TABLE S. *Northern Ireland: Violent deaths by external cause of injury 1974-1978.*

<b>TOTAL DEATHS FROM VIOLENCE . . . . .</b>	<b>1,128</b>	<b>1,092</b>	<b>1,118</b>	<b>1,097</b>	<b>1,073</b>

Of the 1,073 deaths 354 were attributed to transport accidents (E800-E845) (excluding drowning from watercraft (E830, E832)). Road vehicle accidents (E810-E827) accounted for 348 deaths as compared with 310 in 1977. Table SI affords comparison of numbers of deaths from road vehicle accidents in 1977 with those for the four preceding years by sex and certain age-groups whilst Table S2 shows the various categories of persons killed in motor vehicle accidents and details of other transport accidents.

TABLE S1. *Northern Ireland: Deaths from road vehicle accidents (E810-E827) 1974-1978.*

		All ages	Under 5 years	5-14	15-34	35-54	55-74	75 and over
MALES . . . . .	1974	266	7	29	103	44	52	31
	1975	226	7	22	95	38	45	19
	1976	230	7	17	102	48	37	19
	1977	211	11	12	83	40	52	13
	1978	252	13	25	106	39	51	18
FEMALES . . . . .	1974	74	2	3	16	8	26	19
	1975	81	7	11	20	10	21	12
	1976	92	1	7	32	9	24	19
	1977	99	2	5	32	14	32	14
	1978	96	4	16	24	10	31	11

Other accidents accounted for 511 deaths and of these deaths 279 were ascribed to falls, 37 to drownings, 67 to poisons or poisonous gases, 34 to fire and heat, 7 to mechanical suffocation, 25 to machinery and 62 to other accidental causes. A detailed break-down showing non-transport accidents by sex and age-groups is given in Abstract 31.

Deaths from accidents recorded as occurring in the home numbered 317 compared with 341 in 1977 and 324 in 1976. Most accidents in the home are occasioned by falls and it should be noted that in 1978 there were 3 deaths from falls where the place of the accident was unspecified compared with 8 in 1977. Fuller details of these and other accidents (apart from transport accidents) are given in Abstract 31.

During the year there were 70 cases of suicide (38 males and 32 females) which is the same as 1977 (38 males and 32 females). There were 87 deaths from homicide and 10 from war operations. In addition there were 41 deaths in which it was not possible to determine whether the injuries were accidentally or purposely inflicted.

TABLE S2. *Deaths from transport accidents, by sex and age 1978.*

Deaths in which violence was stated to be the sequel to some other cause are correlated in Table S3. Alcoholism was, as usual, the greatest single factor in this group causing the deaths of 10 people. This figure, however, does not include deaths caused by other people who were in a state of intoxication.

TABLE S3. *Northern Ireland: Deaths in which violence was a terminal cause, 1978.*

## CERTIFICATION OF DEATHS

All deaths must be certified by either a medical practitioner or a coroner and Table T shows the type of certification during the year. The circumstances of 2,775 deaths (17·2 per cent. of all deaths) were considered by the coroners and in 770 of these cases inquests were held. In 891 cases the deaths were certified by coroners after post-mortem examinations had proved inquests to be unnecessary.

Of the 13,378 deaths certified by medical practitioners the deceased persons were not seen after death by the practitioners in 1,614 cases. In 1 case it was not stated whether the deceased was seen by a practitioner.

TABLE T. *Northern Ireland: Deaths by certification, 1978.*

AREA	Total deaths	Certified by medical practitioners	Certified by coroners		
			Without inquest		After inquest
			Without post-mortem	After post-mortem

## LIFE TABLE

The expectation of life is the average number of years which would be lived by a group of people of given age who are continuously subject to given mortality rates, usually those of a selected year or years.

The abridged life table shown as Table U is based on the mortality rates for 1976–1978 and shows the expectation of life at various age-points together with the number of persons who would survive to given age  $x$  out of 10,000 born, if subjected throughout their lives to this mortality experience.

Thus 98 per cent. of males and 98 per cent. females would survive the first year of life; 97 per cent. of males and 98 per cent. of females would reach the age of 20; 78 per cent. of males and 87 per cent. of females would reach the age of 60 and the men could then expect an average future lifetime of 15 years compared with 19 years for women.

Based on the mortality experience of 1976–1978 the expectation of life at birth was 67·8 years for males and 74·1 years for females; at age one year the expectations were 68·0 years for males and 74·2 years for females. Table U1 affords comparison of these figures with those for certain preceding years.

TABLE U. *Northern Ireland: Abridged Life Table 1976-1978.*

Age	Males		Females	
	$l_x$	$e^{\circ}x$	$l_x$	$e^{\circ}x$
0	10,000	67.76	10,000	74.08
1	9,816	68.03	9,841	74.27
2	9,803	67.11	9,826	73.38
3	9,793	66.18	9,817	72.44
4	9,787	65.22	9,811	71.49
5	9,783	64.26	9,808	70.51
10	9,761	59.39	9,795	65.60
15	9,743	54.50	9,784	60.67
20	9,680	49.83	9,760	55.82
25	9,599	45.23	9,733	50.96
30	9,524	40.57	9,701	46.12
35	9,454	35.85	9,659	41.31
40	9,353	31.21	9,601	36.55
45	9,193	26.71	9,509	31.88
50	8,919	22.45	9,347	27.39
55	8,462	18.53	9,080	23.12
60	7,771	14.96	8,661	19.12
65	6,755	11.83	8,058	15.36
70	5,425	9.13	7,204	11.88
75	3,862	6.81	6,005	8.76
80	2,308	4.71	4,396	6.06
85	978	2.71	2,400	4.01

This abridged life table is constructed from the estimated population and the total deaths registered during the years 1976-1978.

The column headed  $l_x$  shows the numbers who would survive to exact age  $l_x$  out of 10,000 born who were subject throughout their lives to the death probabilities indicated by the monthly records for the years 1976-1978.

Column  $e^{\circ}x$  gives the "expectation of life"—that is the average future lifetime which would be lived by a person aged exactly  $x$  if subject to those death probabilities.

TABLE U1. *Northern Ireland: Expectation of life at birth, at one year of age and at 65 years of age for certain periods between 1890 and 1978.*

Period	Expectation of life					
	At birth		At age one year		At age 65 years	
	Male	Female	Male	Female	Male	Female
1890-92	46.3	45.7	—	—	10.6	10.6
1900-02	47.1	46.7	—	—	10.5	10.4
1910-12	50.7	51.0	—	—	12.1	12.8
1925-27	55.4	56.1	59.9	59.5	11.9	12.7
1936-38	57.8	59.2	—	—	11.6	12.4
1950-52	65.5	68.8	67.5	70.3	12.1	13.5
1966-68	68.2	73.5	69.0	74.1	12.3	15.1
1967-69	68.3	73.7	69.2	74.3	12.4	15.3
1968-70	67.9	73.5	68.8	74.0	12.1	15.1
1969-71	67.8	73.7	68.6	74.2	12.0	15.2
1970-72	67.6	73.7	68.3	74.1	12.0	15.2

1972-74	65.0	73.6	67.3	74.1	11.8	15.7
1973-75	67.2	73.5	67.7	74.0	11.8	15.1
1974-76	66.8	73.7	67.6	74.1	11.8	15.2
1975-77	67.5	73.8	67.9	74.1	11.8	15.3
1976-78	67.8	74.1	68.0	74.3	11.8	15.3

## MIGRATION

The population figures ascertained at each census enable the net migration during the inter-censal periods to be calculated. Table V shows that during the period of approximately four and a half years between the censuses taken on the 9th October, 1966 and the 25th April, 1971 there was a net outward movement of 31,521 persons to all countries including other parts of the British Isles.

TABLE V. *Northern Ireland: Net migration during inter-censal period 1966-1971.*

	Males	Females	Total
Population, Census of 1966 . . . . .	723,884	760,891	1,484,775
Births, 1966-1971 . . . . .	76,518	72,188	148,706
Deaths, 1966-1971 . . . . .	38,102	34,476	72,578
Natural increase* . . . . .	38,416	37,712	76,128
Population 1966 plus natural increase . . . . .	762,300	798,603	1,560,903
Adjustment for H.M.F's . . . . .	+ 6,790	—107	6,683
Population 1966 plus natural increase plus adjustment for H.M.F's . . . . .	769,090	798,496	1,567,586
Population Census of 1971 . . . . .	754,676	781,389	1,536,065
Net movement outwards . . . . .	14,414	17,107	31,521

\*The excess of births over deaths.

Table VI shows the natural increase in the population for each inter-censal period since birth and death registration commenced in 1864, together with the net movement outwards and the percentage of the increase lost by migration.

TABLE VI. *Northern Ireland: Inter-censal variations in population, 1871-1971.*

Inter-censal period	Population at beginning of period	Natural increase*	Net movement outwards	Percentage of increase lost by migration
1871-1881	1,359,190	104,350	158,724	152
1881-1891	1,304,816	71,910	140,670	196
1891-1901	1,236,056	68,634	67,738	99
1901-1911	1,236,952	78,996	65,417	83
1911-1926	1,250,531	113,603	107,573†	95
1926-1937	1,256,561	80,835	57,651	71
1937-1951	1,279,745	158,443	67,267†	42
1951-1961	1,370,921	146,349	92,228	63
1961-1966	1,425,042	97,434	37,701	39
1966-1971	1,484,775	76,128	31,521	41

\*Excess of births over deaths.

†Including deaths in H.M. Forces and Mercantile Marine which occurred outside Northern Ireland

It is estimated that during the year ended 30 June, 1978 the net outward migration amounted to 7,500 persons.

## ADMINISTRATION

**Introductory:** The administrative functions of the Registrar General comprise the registration of births (live and still), deaths, marriages and adoptions, and the provision or supervision of machinery for dealing with preliminaries to marriages other than those according to the rites of the Roman Catholic Church.

**Buildings licensed or registered for marriages:** The number of places of worship (other than those belonging to the Roman Catholic Church) in which marriages could be solemnised, as at 31st December in each of the years 1974, 1975, 1976, 1977 and 1978, are as follows:

<i>Denomination</i>	<b>1974</b>	<b>1975</b>	<b>1976</b>	<b>1977</b>	<b>1978</b>
Church of Ireland . . .	414	416	416	416	419
Presbyterian . . . . .	516	516	517	517	525
Methodist . . . . .	160	159	159	160	161
Others . . . . .	369	382	390	396	416
<b>TOTAL</b> . . . . .	<b>1,459</b>	<b>1,473</b>	<b>1,482</b>	<b>1,489</b>	<b>1,521</b>

**Legitimacy Acts (N.I.), 1928 to 1961:** Under these Acts an illegitimate child whose parents have married is, subject to certain conditions, legitimated, and the Registrar General is empowered to authorise the registration or re-registration of the birth. During 1978 the registration or re-registration of the births of 221 children was authorised, the comparative figures for 1977 and 1976 being 230 and 199 respectively.

**Adoption Act (N.I.), 1967 and Adoption (Hague Convention) Act (N.I.) 1969:** Registers of children adopted under the provisions of the above Acts and of the previous Adoption Acts of 1929 and 1950 are kept in the General Register Office, to which the adoption orders made by the Courts are transmitted. A certified copy of an entry in the Adopted Children Register is evidence of adoption, and is also evidence of the date of birth of the adopted child. The children whose adoptions were recorded in the Adopted Children Registers during 1978 numbered 315 whilst the figures for 1977 and 1976 were 367 and 388 respectively.

**Searches and certificates:** The original records of live births, deaths and marriages registered in Northern Ireland were in the custody of local registration officers until 1 October 1973\*, since which date the original records of births and deaths have been centralised in the General Register Office at Oxford House 49/55 Chichester Street Belfast; marriage original records are held by the local Registrars. The following statement shows the activity during 1978 by way of searches and issue of certificates from the General Register Office:—

---

\*The date of introduction of a new system of registration in Northern Ireland: See The Births, Deaths and Marriages Registration (N.I.) Order 1973.

YEAR	OFFICIAL		PAID		
	Searches	Certificates	Searches	Certificates	
				Full	Short
1927	56	29	109	112	—
1937	94	88	363	290	—
1951	222	220	1,683	1,609	1,270
1971	294	286	3,977	4,306	3,455
1974	415	415	23,313	26,606	39,393
1975	418	418	27,699	31,147	38,043
1976	575	575	22,347	25,246	41,813
1977	478	478	18,578	20,985	36,791
1978	565	565	19,311	22,757	37,449

**Verifications.** Requests for the verification of particulars of events registered are received from Government Departments in connection with claims for pensions, etc. During the year the number of cases dealt with was 15,374.

## METEOROLOGY

The following synopsis of weather experienced over Northern Ireland during 1978 is furnished by the Director General, Meteorological Office through the Climatological Services and Public Records Office, Tyrone House, Ormeau Avenue, Belfast BT2 8HH.

Where the term "average" is used it refers to the World Meteorological Organisations' current standard 30 year period 1941 to 1970 with respect to rainfall, temperature and sunshine.

Tables compiled and attached give data in respect of certain stations: columns 2 and 3 give the "highest" and "lowest" air temperature recorded on any data during the month indicated; in columns 4 and 5 the mean daily maximum and minimum air temperatures are given. There is also a table giving similar data related to Northern Ireland as a whole based on a selection of stations appropriate to the meteorological element and not necessarily those whose data are published in the preceding pages. This information smoothes out the variation experienced in different parts of the province and therefore gives a general picture. The "highest" and "lowest" however refer to values from around sixty stations recording temperature in Northern Ireland and are not restricted to the seven stations data given in the preceding pages.

Temperatures are given in degrees centigrade. To convert actual values to degrees fahrenheit multiply the centigrade value by 9, divide by 5 and add 32.0 degrees. To convert "differences from average" in the degree centigrade scale to fahrenheit 1.0 degrees centigrade equals 1.8 degrees fahrenheit. Rainfall totals are in millimetres and sunshine a daily mean in hours per day.

**January** was cold and wet. Heavy rainfall occurred in counties Tyrone and Londonderry, and snowfalls gave hazardous conditions especially in the North and West where considerable drifting occurred in strong winds. Rainfall was 119% of average, sunshine 122% and it was the sunniest January month since 1963. Temperatures were 0.1 degrees centigrade below normal. The periods 10th to 12th and 16th to 18th were unusually cold. There were very severe gales on 11th/12th and again on 28th/29th with mean speeds 56 knots and gust speeds reaching 76 knots notably at Orlock Head, Groomsport, Co. Down.

**February** was cool with normal rainfall and sunshine. Rainfall was 99% and sunshine 102% over the province as a whole. Parts of the Mourne Mountains were wettest with rainfall of 150%, whilst locally at Ballycastle in North Antrim a value of 50% of normal was noted. There were 8 occurrences of snow/sleet, 4 of hail, 2 of fog and 3 of gales. Snow lay to depths of around 15 centimetres at Garvagh, Co. Londonderry on 13th. There were 12 occurrences of air frost and 18 of ground frost inland and the frost was severe between 10th and 14th. It was the coldest February month since 1970.

**March** was very wet, the wettest March since 1940 over Northern Ireland as a whole with a value of 163%. The frequency of snow and sleet was well above average. It was colder with a high severity of frost in the North and West. Sunshine was just below normal with a general value of 98%. There were 7 occurrences of hail, 4 of thunder, 4 of gale and 6 of fog.

**April** was dry and cold with rainfall well below average. Temperatures were below normal and sunshine too was well below the seasonal average. There were only 6 drier Aprils this century. It was the coldest April since 1941 with a more than usual frequency of snow and sleet. The periods 5th to 15th and 25th to 30th were very cold. Hail occurred on 5 days, there were 2 occurrences of gales and 5 of fog.

**May** was very dry and warm with above average temperatures and below normal sunshine. It was the warmest May since 1970 and the last week was significantly warm with daily maxima temperatures rising to 28·0 degrees centigrade. Some places had their warmest May days on record this century. An isolated thunderstorm gave a fall of 32·0 millimetres of rain at Knockbracken, Belfast in 30 minutes on 22nd, a very rare fall indeed. There were 2 occurrences of hail, 1 of thunder, 1 of fog and no gales.

**June** was cool, dry and dull. It was the duller June month since 1958 over Northern Ireland as a whole. Rainfall was 65%, sunshine 75% and temperatures 1·0 degrees centigrade below average. There was no air or ground frost, 1 occurrence of gale, 1 of hail and no fog or thunder.

**July** was significantly cool but in contrast the period 12th/13th July was warm and sunny. Rainfall varied throughout the province from values of 50% in County Fermanagh to 150% of average in the Mourne, County Down. There were 2 occurrences of fog, and gales occurred in some areas between 4th and 6th. Rainfall was 80% of average, sunshine 93% and temperatures 0·6 degrees centigrade below normal.

**August** was again cool with variable rainfall and little sunshine. It was the duller August month since 1942 and the least sunniest at Armagh Observatory since 1912. Apart from a dry spell, 22nd to 28th, it was wet and especially so between 11th and 21st. There were 2 occurrences of thunder, 3 of fog, 2 of hail and no gales.

Rainfall was 84%, sunshine 64% and temperatures 0·3 degrees centigrade below average.

**September** was wet and dull with above average temperatures. Rainfall was 99% and sunshine 86%. Heavy falls of rain occurred on 9th/10th and between 26th and 29th and flooding occurred in some areas particularly in Co. Londonderry where over 50 millimetres fell in 48 hours. Air temperatures were 0·6 degrees centigrade above normal and the periods 3rd to 9th and 19th to 23rd were comparatively warm with temperatures 3·0 degrees centigrade above normal. There were 3 occurrences of gales on exposed coasts.

**October** was very dry, warm and sunny. It was the driest October since 1951, the sunniest since 1959 and the warmest since 1971 over the province generally. Stormont, Belfast with 28% of average rainfall had its driest October on record. Rainfall over Northern Ireland as a whole was 46%, sunshine 112% and temperatures were 1·5 degrees centigrade above normal. The periods 5th to 13th and 25th/26th were very warm with daily maxima temperatures 5·0 degrees centigrade above average.

**November** was mild, wet and dull. Rainfall was 112%, sunshine 87% and temperatures 1·7 degrees centigrade above normal. It was the mildest

November since 1948. Heavy falls of rain occurred on 14th, 16th, 17th and 23rd. The period 1st to 23rd was very mild with temperatures 3·0 to 5·0 degrees centigrade above normal and in deep contrast 24th to 30th was very cold with temperatures 3·0 degrees below average. There were 3 occurrences of air frost, 7 of ground frost, 3 occurrences of snow/sleet mainly late in month. There were 4 occurrences of gales and 3 of hail.

**December** was exceptionally wet especially in counties Down, Antrim and Armagh. It was the wettest December this century and since records began in most areas east of the River Bann. In the Belfast area monthly totals of around 250 to 275 millimeters of rain fell. In the Mourne Mountain region, monthly rainfall totals exceeded 450 millimetres. A 48 hour total of over 200 millimetres at Silent Valley on the 27th/28th had a return period of at least 1 in 5,000 years, *a very rare fall*. Severe flooding occurred in many areas and was particularly severe in Annesborough, Newcastle and Downpatrick where the situation was aggravated by sustained easterly severe gale force winds and high tides. Snowfalls occurred and lay to depths of 5 to 15 centimetres with considerable drifting between 27th and 30th more especially in eastern districts. On 31st December 1978 freezing temperatures persisted all day. Rainfall for the month was 193% of average (about twice normal) temperatures a little below normal by 0·5 degrees centigrade and surprisingly sunshine was 118% of average.

The year 1978 had just below average rainfall, with a value of 97% below normal sunshine 88% and normal temperatures.

Features of the 12 month period were; the above average frequency of snow/sleet in the winter months; the severe gales of January and December; the dryness of the period April to October; the exceptional rainfalls of March, November and December. The easterly gales of the period 26th to 29th December were sustained and of severe intensity and were a rare occurrence indeed. The cool dry weather of the April to August period constituted one of the driest April to August periods over the province as a whole this century. The mildness of the October-November period followed a cool dull summer.

The heavy rainfalls in counties Antrim, Down and Armagh of December and more especially the amounts recorded in the Mourne and in the Belfast area were perhaps the most significant events of the year.

TABLE X. Northern Ireland: Air temperature, rainfall and sunshine recorded at seven stations during the year 1978 and general values for the Province as a whole (final values\*).

# ABSTRACT 21 (continued). Northern Ireland: Causes

Detailed List	CAUSES OF DEATH	AGES AT									
		ALL AGES	Under 4 weeks	Total under one year	1-	2-	3-	4-	5-	10-	15-
610-616	<i>Diseases of breast, ovary, fallopian tube and parametrium</i> . . . . . F	2	.	.	.	.	.	.	.	.	.
610	Chronic cystic disease of breast . . . . . F	.	.	.	.	.	.	.	.	.	.
611	Other diseases of breast . . . . . F	1	.	.	.	.	.	.	.	.	.
612	Acute salpingitis and oophoritis . . . . . F	.	.	.	.	.	.	.	.	.	.
613	Chronic salpingitis and oophoritis . . . . . F	.	.	.	.	.	.	.	.	.	.
614	Salpingitis and oophoritis, unqualified . . . . . F	.	.	.	.	.	.	.	.	.	.
615	Other diseases of ovary and fallopian tube . . . . . F	.	.	.	.	.	.	.	.	.	.
616	Diseases of parametrium and pelvic peritoneum (female) . . . . . F	1	.	.	.	.	.	.	.	.	.
620-629	<i>Diseases of uterus and other female genital organs</i> . . . . . F	1	.	.	.	.	.	.	.	.	.
620	Infective diseases of cervix uteri . . . . . F	.	.	.	.	.	.	.	.	.	.
621	Other diseases of cervix . . . . . F	.	.	.	.	.	.	.	.	.	.
622	Infective diseases of uterus (except cervix), vagina and vulva . . . . . F	.	.	.	.	.	.	.	.	.	.
623	Uterovaginal prolapse . . . . . F	1	.	.	.	.	.	.	.	.	.
624	Malposition of uterus . . . . . F	.	.	.	.	.	.	.	.	.	.
625	Other diseases of uterus . . . . . F	.	.	.	.	.	.	.	.	.	.
626	Disorders of menstruation . . . . . F	.	.	.	.	.	.	.	.	.	.
627	Menopausal symptoms . . . . . F	.	.	.	.	.	.	.	.	.	.
628	Sterility, female . . . . . F	.	.	.	.	.	.	.	.	.	.
629	Other diseases of female genital organs . . . . . F	.	.	.	.	.	.	.	.	.	.
	<b>XI. Complications of Pregnancy, Child birth and the Puerperium</b>										
630-634	<i>Complications of pregnancy</i> . . . . . F	.	.	.	.	.	.	.	.	.	.
630	Infections of genital tract during pregnancy . . . . . F	.	.	.	.	.	.	.	.	.	.
631	Ectopic pregnancy . . . . . F	.	.	.	.	.	.	.	.	.	.
632	Haemorrhage of pregnancy . . . . . F	.	.	.	.	.	.	.	.	.	.
633	Anaemia of pregnancy . . . . . F	.	.	.	.	.	.	.	.	.	.
634	Other complications of pregnancy . . . . . F	.	.	.	.	.	.	.	.	.	.
635-639	<i>Urinary infections and toxæmias of pregnancy and the puerperium</i> . . . . . F	.	.	.	.	.	.	.	.	.	.
635	Urinary infections arising during pregnancy and the puerperium . . . . . F	.	.	.	.	.	.	.	.	.	.
636	Renal disease arising during pregnancy and the puerperium . . . . . F	.	.	.	.	.	.	.	.	.	.
637	Pre-eclampsia, eclampsia and toxæmia, unspecified . . . . . F	.	.	.	.	.	.	.	.	.	.
638	Hyperemesis gravidarum . . . . . F	.	.	.	.	.	.	.	.	.	.

of death at different age-periods, 1978.

**ABSTRACT 28. Abbreviated list numbers and equivalent detailed list numbers and causes of death (8th Revision I.C.D.).**

Detailed List	Abbreviated List 'B'	CAUSE OF DEATH
000	1	Cholera
001	2	Typhoid fever
004, 006	3	Bacillary dysentery and amoebiasis
008, 009	4	Enteritis and other diarrhoeal diseases
010-012	5	Tuberculosis of respiratory system
013-019	6	Other tuberculosis, including late effects
020	7	Plague
032	8	Diphtheria
033	9	Whooping cough
034	10	Streptococcal sore throat and scarlet fever
036	11	Meningococcal infection
040-043	12	Acute poliomyelitis
050	13	Smallpox
055	14	Measles
080-083	15	Typhus and other rickettsioses
084	16	Malaria
090-097	17	Syphilis and its sequelae
Rem. 000-136	18	All other infective and parasitic diseases
		Cancer of:—
151	19A	stomach
152-154	19B	intestines and rectum
162	19C	trachea, bronchus and lung
174	19D	breast
180-189	19E	genito-urinary organs
Rem. 140-200, 202, 203, 208, 209	19F	other sites
201, 204-207	19G	Hodgkin's disease and leukaemia
210-239	20	Benign neoplasms and neoplasms of unspecified nature
250	21	Diabetes mellitus
260-269	22	Avitaminoses and other nutritional deficiency
280-285	23	Anaemias
320	24	Meningitis
390-392	25	Active rheumatic fever
393-398	26	Chronic rheumatic heart disease
402, 404	27A	Hypertensive heart disease
400, 401, 403	27B	Other hypertensive disease
Pt. of 410-414	28A	Ischaemic heart disease with hypertension
Rem. of 410-414	28B	Ischaemic heart disease without hypertension
420-429	29	Other forms of heart disease
Pt. of 430-438	30A	Cerebrovascular disease with hypertension (benign)
Rem. of 430-438	30B	Cerebrovascular disease without hypertension
440-458	46A	Other diseases of circulatory system
470-474	31	Influenza
480-486	32	Pneumonia
490-493	33	Bronchitis, emphysema and asthma
Rem. 460-519	46B	Other diseases of respiratory system
531-533	34	Peptic ulcer
540-543	35	Appendicitis
550-553, 560	36	Intestinal obstruction and hernia
571	37	Cirrhosis of liver
Rem. 520-577	46C	Other diseases of digestive system
580-584	38	Nephritis and nephrosis
600	39	Hyperplasia of prostate
640-645	40	Abortion
630-639, 650-678	41	Other complications of pregnancy, childbirth and puerperium
740-759	42	Congenital anomalies
764-768, 772, 776	43	Birth injury, difficult labour and other anoxic and hypoxic conditions
760-763, 769-771, 773-775, 777-779	44	Other causes of perinatal mortality
780-796	45	Symptoms and ill-defined conditions
Rem. 240-738	46D	All other diseases
E810-E823	47	Motor vehicle accidents
E800-E807, E825-E949	48	All other accidents
E950-E959	49	Suicide and self-inflicted injuries
E960-E999	50	All other external causes
