Notes:

1 The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification.

2 A person not living in a couple can be classified married (or re-married) if they denote their marital status as married (or re-married) but have no spouse or partner resident in the household.

Notes:

1 'Other method' includes no fixed place of work, working at offshore installation, working outside the UK.

2 For purposes of this table, public transport is defined as: train, bus, minibus or coach.

3 The last two columns show the number of persons who travel to work by public transport who live in a household with/without a car or van expressed as a percentage of the number of persons who travel to work by public transport. Note that these columns may not sum up to 100% as residents of communal establishments who travel to work by public transport appear in neither column.

Notes:

1 Includes any company car or van when available for private use.

2 'All cars or vans in area' includes only those cars and vans owned by, or available for use by, households. This count is not exact as households with more than 10 cars or vans are counted as having 10 cars or vans.

Notes:

¹ The occupancy rating provides a measure of under-occupancy and overcrowding. For example, a value of -1 implies there is one room too few and that there is overcrowding in the household. The occupancy rating assumes that every household, including one person households, requires a minimum of two common rooms (excluding bathrooms).
