

Release plans for Northern Ireland Census 2011 Statistics

Due to the breadth and depth of the Census 2011 results, the statistics on the main resident population base (usual residents) will be released in four main stages. The release schedule provides an overview of the proposed content of each release, and their geography, and is available to download: [Northern Ireland Census 2011 Prospectus: Release schedule and table titles](#).

Further releases will follow; however they will cover more specialist outputs products for example grid squares. In time, more detailed products will be available under special agreement (for example microdata samples). Access arrangements and agreements will be published as soon as they are available.

This section of the prospectus covers the following:

- [First release](#)
 - [Phase 1](#) 16 July 2012: Population by age and sex for Northern Ireland
 - [Phase 2](#) 19 September 2012: Population by age and sex for Local Government Districts
- [Second release](#)
 - [Phase 1](#) 11 December 2012: Key Statistics for Northern Ireland and Local Government Districts
 - [Phase 2](#) 30 January 2013: Key Statistics for Assembly Areas (AAs), Electoral Wards, Super Output Areas (SOAs) and Small Areas (SAs)
 - [Phase 3](#) 28 February 2013: Quick Statistics for all geographies and Population and Household Estimates for lower geographies
 - [Phase 4](#) 18 April 2013: 3 additional Quick Statistics tables covering approximated social grade and communal establishments
26 March 2015: Quick Statistics showing characteristics of usual residents who have lived outside Northern Ireland for a year or more
- [Third release](#)
 - [Phase 1](#) 16 May 2013: Detailed Characteristics for Northern Ireland (including Religion, Identity and Health)
 - [Phase 2](#) 28 June 2013: Detailed Characteristics for Northern Ireland (including Ethnicity, Country of Birth and Language)
 - [Phase 3](#) 11 September 2013: Remaining Detailed Characteristics for Northern Ireland (including Housing and Labour Market)
 - [Phase 4](#) 28 November 2013: All Detailed Characteristics for the remaining geographical levels
 - [Phase 5](#) 26 March 2015: Detailed Characteristics tables for approximated social grade, year of most recent arrival in Northern Ireland and internal migration

Northern Ireland Census 2011 Output Prospectus

Release plans for Northern Ireland Census 2011 Statistics

- [Fourth release](#)
 - [Phase 1](#) 20 March 2014: All Local Characteristics
 - [Phase 2](#) 26 March 2015: Local Characteristics tables for approximated social grade
- [Subsequent releases](#)
 - [Postcodes Estimates](#) 26 September 2013
 - [Census 2011 statistics for new Local Government Districts](#) 30 January 2014
 - [Census 2011 statistics for Settlement 2015](#) 30 July 2015
 - [Census 2011 statistics for District Electoral Areas](#) 30 July 2015
 - [Microdata](#)
 - [Origin-Destination](#)
 - [Combined Grid Square Product](#) 15 October 2015
 - [Alternative population bases](#)
 - [Travel to Work or Place of Study \(DC & LC tables\)](#) 26 February 2015
- [UK Census Releases](#)
- [Commissioned tables](#)
- [Northern Ireland Census 2011 reporting and analysis](#)

Statistical commentary, in the form of a statistical bulletin, will appear alongside every major release of Northern Ireland Census 2011 statistics. This will provide description and context around various topics, provide comparability to some previous Census outputs, and highlight further sources of information where applicable.

Northern Ireland Census 2011 statistics will be accompanied by appropriate reference material to ensure that terms and concepts are defined and data are placed in context. Changes and differences in the population will also be shown through data visualisations on the [Northern Ireland Neighbourhood Information Service \(NINIS\) website](#). Visualisation provides an easily accessible way to identify key changes and compare results across geography and/or through time.

The planned tables may be subject to redesign before release, as a result of the application of statistical disclosure control.

[Back to the top](#)

First release of Northern Ireland Census 2011 statistics – Phase 1

Population and Household Estimates from the 2011 Census are available on our [NINIS website](#)

[Phase 1](#) of the first release of statistics from the Northern Ireland Census 2011 was published on 16 July 2012. The statistics and accompanying Statistical Bulletin are available via the Northern Ireland Statistics and Research Agency's (NISRA's) website. The statistics include the following elements:

- Usually resident census day population estimates for Northern Ireland, by single year of age and sex – figures rounded to the nearest 100.
- Estimates of the number of households, household structure and average household size for Northern Ireland – figures rounded to the nearest 100.

NISRA provided visualisation in the form of [population pyramids](#) alongside phase 1 of the first release of Northern Ireland Census 2011 statistics. The population pyramids allow users to browse statistics, comparing age and sex distributions for Northern Ireland, and to compare demographic statistics from 1911 to 2011.

A [statistical bulletin](#) accompanied phase 1 of the first release of Northern Ireland Census 2011 statistics. This highlighted any key demographic trends, for example changes in the age structure of the population. [Quality assurance](#) and [methodology](#) reports also accompanied this release of Northern Ireland Census 2011 statistics.

[Back to the top](#)

First release of Northern Ireland Census 2011 statistics – Phase 2

Population and Household Estimates from the 2011 Census are available on our [NINIS website](#)

[Phase 2](#) of the first release of statistics from the Northern Ireland Census 2011 was published on 19 September 2012. The statistics, accompanied by a Statistical Bulletin, are again available via NISRA's website. The statistics included the following elements:

- Usually resident census day population estimates for Northern Ireland at Local Government District (LGD), Health and Social Care Trust (HSCT) and Education and Library Board (ELB) level, by single year of age and sex.
- Estimates of the number of households and average household size by the geographic units outlined above.

The statistics published in phase 2 were consistent with those published in phase 1, other than that the estimates are no longer rounded. The minor effect of moving from rounded to unrounded output was summarised in an [accompanying note](#).

Again NISRA have provided data visualisation alongside phase 2 of the first release of Northern Ireland Census 2011 statistics.

A [statistical bulletin](#) also accompanied phase 2 of the first release of Northern Ireland Census 2011 statistics. Again this highlighted any key changes over time. A further [quality assurance report](#) accompanied this phase of the first release of Northern Ireland Census 2011 statistics.

[Back to the top](#)

Second release of Northern Ireland Census 2011 statistics – Phase 1

Key Statistics from the 2011 Census are available on our [NINIS website](#)

Key Statistics

[Phase 1](#) of the second release of statistics from the Northern Ireland Census 2011 was published at 9.30am on 11 December 2012.

This phase included all Key Statistics tables for Northern Ireland, the Local Government Districts (LGDs), the Health and Social Care Trusts (HSCTs), the Education and Library Boards (ELBs) and NUTS level III (European Union Nomenclature of Units for Territorial Statistics).

The release was accompanied by a [press release](#), a [statistical bulletin](#) and some interactive content, including maps and was disseminated via the Northern Ireland Neighbourhood Information Service (NINIS). A number of other products provide supporting information for Phase 1 of the second release and are available on the [NISRA website](#).

As the datasets are developed and quality assured some changes or amendments have become necessary due to statistical disclosure control and data utility. Some of the Key Statistics tables may differ from the layouts previously provided on the NISRA website. NISRA consulted with census users about requirements for the output of Northern Ireland Census 2011 statistics and consequently the vast majority of 2001 Census outputs were carried forward and repeated in 2011. This is for comparability and continuity purposes, and takes account of user satisfaction with the design of the 2001 statistics. The statistics in the second release correspond to the 2001 Census Key Statistics tables produced for mostly univariate information (as counts and percentages) and the 2001 Univariate tables.

Second release of Northern Ireland Census 2011 statistics – Phase 2

Key Statistics from the 2011 Census are available on our [NINIS website](#)

[Phase 2](#) of the second release of statistics from the Northern Ireland Census 2011 was published at 9.30am on 30 January 2013.

This phase included the Key Statistics tables for the remaining geographical levels and this included Assembly Areas (AAs), Electoral Wards, Super Output Areas (SOAs) and Small Areas (SAs). It was accompanied by a short [press release](#).

[Back to the top](#)

Second release of Northern Ireland Census 2011 statistics – Phase 3

Quick Statistics from the 2011 Census are available on our [NINIS website](#)

Quick Statistics

[Phase 3](#) of the second release of statistics from the Northern Ireland Census 2011 was published at 9.30am on 28 February 2013.

This phase included all Quick Statistics tables for Northern Ireland, Local Government Districts (LGDs), the Health and Social Care Trusts (HSCTs), Education and Library Boards (ELBs), NUTS level III (European Union Nomenclature of Units for Territorial Statistics), Assembly Areas (AAs), Electoral Wards, Super Output Areas (SOAs) and Small Areas (SAs) along with Population and Household Estimates for lower level geographies.

These tables are equivalent to the Univariate (UV) tables produced in 2001.

In the same way as with the Key Statistics tables, the Quick Statistics tables were developed and quality assured. Some changes or amendments have become necessary due to statistical disclosure control and data utility. Therefore the layouts of the Quick Statistics outputs may differ from those already published on the NISRA website.

Additional Quick Statistics Tables

Additional Quick Statistics from the 2011 Census are available on our [NINIS website](#)

[Phase 4](#), due to ongoing quality assurance work it was not possible to publish three Quick Statistics tables along with the main Quick Statistics release on 28 February 2013.

These three tables were published, on NINIS, on 18 April 2013 at all geographical levels down to Small Area (SA). These tables are:

- Communal Establishment Management and Type – Communal Establishments: QS413NI
- Communal Establishment Management and Type – Usual Residents: QS414NI
- Approximated Social Grade – Household Reference Person (HRP) Aged 16 to 64: QS611NI

On 26 March 2015 at 9.30am 6 additional Quick Statistics tables were published. These tables show characteristics of usual residents who have lived outside Northern Ireland for a continuous period of a year or more.

[Back to the top](#)

Third release of Northern Ireland Census 2011 statistics

Detailed Characteristics Statistics from the 2011 Census are available on our [NINIS website](#)

In light of users' reaction, and having considered the data, a decision was made to swap the order of the third and fourth releases. The third release contains the Detailed Characteristics tables and the fourth release the Local Characteristics tables.

Detailed Characteristics statistics

The third release of Northern Ireland Census 2011, Detailed Characteristics (DC) statistics which are more detailed multivariate tables (cross tabular format), commenced on 16 May 2013. This release was released in topic based phases. Further information on the scheduling and content is given below. As with the previous releases of Northern Ireland Census 2011 statistics, release 3 will be published in phases:

- [Phase 1](#) was released at 9.30am on 16 May 2013 and contained DC tables that focused on Religion, Identity and Health. There were also a small number of tables on Irish and Ulster-Scots. Phase 1 tables were at the Northern Ireland level.
- [Phase 2](#) was released at 9.30am on 28 June 2013. This phase contained DC tables at the Northern Ireland level primarily focused around Ethnicity, Country of Birth and Language.
- [Phase 3](#) was published at 9.30am on 11 September 2013. This contained the remaining DC tables at the Northern Ireland level. This concluded the publication of DC tables at the Northern Ireland level and contained tables on a few topics such as Labour Market and Housing.
- [Phase 4](#) was published at 9.30am on 28 November 2013. This phase contained all the DC tables at the outstanding geographical levels, including Local Government District (LGD) and Super Output Area (SOA).
- [Phase 5](#) was published at 9.30am on 26 March 2015. This release contained Detailed Characteristics(DC) tables for the following topics:
 - Approximated social grade;
 - Year of most recent arrival in NI;
 - Internal migration.

[Table layouts](#) for these tables are now available. [Phase 1](#), [Phase 2](#) and [Phase 3](#) of this release were accompanied by statistical bulletins.

Available Geography

Detailed Characteristics tables are available for Northern Ireland, Local Government Districts (LGDs) and Electoral Wards/Super Output Areas (SOAs), Health and Social Care Trusts (HSCTs), Education and Library Boards (ELBs), NUTS level III (European Union Nomenclature of Units for Territorial Statistics) and Assembly Areas (AAs). It was not possible to produce all Detailed Characteristics tables at all the geographical levels listed above due to statistical disclosure control considerations. A summary of which tables are available for various geographic units is available on the [NISRA website](#).

[Back to the top](#)

Fourth release of Northern Ireland Census 2011 statistics

Local Characteristics Statistics from the 2011 Census are available on our [NINIS website](#)

The fourth release now comprises of the Local Characteristics tables. This release took place at 9.30am on 20 March 2014. All Local Characteristics were published at this time.

Local Characteristics statistics

[Phase 1](#) of the fourth release is available for download. This release also contained multivariate tables; however they contain less detail than the Detailed Characteristics statistics in the third release. The reduced level of detail compared to the Detailed Characteristics statistics, reflects the availability of these Local Characteristics statistics at Small Area (SA) level.

The statistics in the fourth release correspond to the 2001 Census Area Statistics (CAS) tables.

[Table layouts](#) for these tables are now available. Examples of tables include:

- Economic Activity by Sex
- Provision of Unpaid Care by Hours Worked
- Country of Birth by Age
- Occupation by Hours Worked by Sex

Phase 2

[Phase 2](#) was published at 9.30am on 26 March 2015. This included 2 tables on the topic of approximated social grade.

[Table layouts](#) for these tables are now available.

Available Geography

In most instances Local Characteristics statistics will be available for all geographies down to Small Area (SA). This will include data for Northern Ireland, Local Government Districts (LGDs), Health and Social Care Trusts (HSCTs), Education and Library Boards (ELBs), NUTS level III (European Union Nomenclature of Units for Territorial Statistics), Electoral Wards/Super Output Areas (SOAs), Assembly Areas (AAs) and Small Areas (SAs).

[Back to the top](#)

Subsequent releases

A series of further releases, subsequent to the four main releases of Northern Ireland Census 2011 statistics, are being developed. For a sample of proposed content of subsequent releases, download: [Northern Ireland Census 2011 Prospectus: Release schedule and table titles](#).

Postcode Estimates

Postcode Headcount and Household Estimates from the 2011 Census are available on our [NINIS website](#)

[Postcode estimates](#) for Northern Ireland were published on the NINIS website at 9.30am on 26 September 2013.

This release comprised of a headcount and household estimate for all applicable postcodes in Northern Ireland. The headcount is split by gender. A Small Area (SA) to postcode look up is available from the [Central Postcode Directory](#) (CPD).

Census 2011 Statistics for New Local Government Districts

Key Statistics from the 2011 Census are available on our [NINIS website](#)

New local government structures (LGD2014), based on 11 Districts composed of 462 wards, and were approved by the Northern Ireland Assembly through the Local Government (Boundaries) Order (Northern Ireland) 2012. These will be the basis of new council administrations from 2015 onwards.

[2011 Census Key Statistics for the new 11 Districts](#) were released at 9.30am on 30 January 2014 and disseminated through the NINIS website.

Statistics for the 11 Districts (LGD2014) are exact aggregates of information available at the Small Area level. For further information see: [A Guidance Note on Census Outputs for the 11 Districts](#).

Census 2011 Statistics for Settlement 2015

Key Statistics for Settlements from the 2011 Census are available on our [NINIS website](#)

At 9.30am on 26 March 2015 the [headcount and household estimates](#) were published for Settlements (Settlement 2015) in Northern Ireland.

On 30 July 2015 at 9.30am [Key Statistics for Settlements](#) in Northern Ireland were released. This included 45 Key Statistics tables for settlements with 500 or more usual residents.

Census 2011 Statistics for District Electoral Areas

District Electoral Area information from the 2011 Census are available on our [NINIS website](#)

At 9.30am on 30 July 2015 [population and household estimates](#) for District Electoral Areas (2014) (DEAs) in Northern Ireland were released. This comprised of population estimates by age and sex along with household estimates for each of the DEAs in Northern Ireland.

On 8 March 2016 at 9.30am Key Statistics for DEAs (2014) in Northern Ireland were released. This release consisted of 45 key statistics tables for all 80 DEAs in Northern Ireland.

[Back to the top](#)

Microdata

As with previous Censuses, NISRA is committed to producing Microdata Samples of Anonymised Records (SARs) from the 2011 Census. This work is being advanced collaboratively with the other UK Census Offices and in conjunction with key users.

The products that are available are:

[Teaching File \(1% Sample of Individual Records\)](#)

Microdata Data Teaching File from the 2011 Census are available on our [NINIS website](#)

This file is considerably less detailed than the file made available under end-user licence in 2001. It constitutes a 'taster' file, of particular use in teaching. The file was published on 23 January 2014 and is available to download from the [NINIS website](#).

More information on the teaching file can be found in [Microdata Teaching File - Product Overview](#) document.

[Secure Files](#)

An anonymised sample of individuals and an anonymised sample of households - the maximum size of these samples is 10%. These samples are the most detailed available.

Accordingly, in Northern Ireland, they will only be available in the safe-setting within NISRA Headquarters, McAuley House. Other arrangements have been made across the rest of the UK. To get access to the secure file you will need to submit a project proposal, become an approved researcher, complete safe researcher training and obtain BPSS security clearance. We have a dedicated team of Research Support Officers who can guide you through the process.

[Safeguarded File](#)

This will be a random anonymised sample of up to 5 per cent of individuals, which will be available to registered users via specific end-user licence arrangements. This sample will be drawn from, and hence overlap with, the proposed secure sample (maximum of 10%) of individuals mentioned above. The level of detail included for each record in the sample will however be adjusted (i.e. it will be less detailed) to reflect the associated access arrangements and the need to preserve the confidentiality of the information, which is paramount.

For further information on how to access safeguarded samples and register as a user go to the [UK Data Service Website](#).

[Back to the top](#)

Flow Data

Origin-destination statistics (also known as flow data) is available for the UK, comprising the travel to work or place of study and migration patterns of individuals cross-tabulated by variables of interest (for example occupation).

The UK Statistical Disclosure Control working group agreed that the protection of the most detailed flow data tables will come from the licensing/access conditions. This is a change from the 2001 Census, where the protection for similar outputs came from the post-tabular small cell adjustment which still allowed wide and easy access, but also adversely affected the utility of the outputs. Therefore, some cross tabulations (for small geographies) will only be available under special agreement.

The public tables were released in four batches, which are listed below:

1. [Workplace tables](#) – originally released 25 July 2014, revised 25 November 2014 and included 3 tables.
2. [Migration and Student Tables](#) - originally published 25 July 2014, revised 25 November 2014 and included 4 tables.
3. [Origin-destination Statistics on Migration, Workplace and Students for Local Authorities in the United Kingdom](#) - originally published 25 July 2014, revised 25 November 2014 and included 11 tables.
4. [Further origin-destination Statistics on Migration for Local Authorities in the United Kingdom](#) - published 25 March 2015 and included 5 tables.

All the tables are available to download from the [NOMIS](#) website.

Combined Grid Square Product

Combined Grid Square Product from the 2011 Census is available on our [NINIS website](#)

The [Combined Grid Square product](#) was released on 15 October 2015 at 9.30am.

This product provides basic 2011 Census statistics for a combination of 1 kilometre and 100 metre grid squares in Northern Ireland.

This information is available to download from the [Northern Ireland Neighbourhood Information Service \(NINIS\)](#) website and is accompanied a code book and guidance note.

[Back to the top](#)

Alternative population bases

After due consideration it has been determined that statistics will be provided, from the Northern Ireland 2011 Census, for three alternative populations. Details of these populations are provided below. [Table layouts](#) for these tables are now available.

Non-UK born Short-term residents

Short-term Resident Population Statistics from the 2011 Census are available on our [NINIS website](#)

Univariate outputs provide population estimates for non-UK born short-term residents. A short-term resident is someone born outside of the UK who, on 27 March 2011, had stayed or intended to stay in the UK for a period of three months or more but less than 12 months. Most outputs are at the Northern Ireland level only.

[Short-term resident population statistics](#) were published on the NINIS website at 9.30am on 24 September 2014.

Workplace population

Workplace Population Statistics from the 2011 Census are available on our [NINIS website](#)

Outputs for this alternative population provide population estimates for a given geography during standard working hours therefore taking account of the number of people who, for example, travel into a city to work. Effectively, this is a geographic redistribution of the usually resident population who are in employment and currently working, allocated to their place of work.

[Workplace population statistics](#) were published at 9.30am on 19 November 2014.

Daytime population

Daytime Population Statistics from the 2011 Census are available on our [NINIS website](#)

The daytime population provides estimates for an area's population during a workday. The population includes all usual residents who are working or studying in the area along with those who are not working or studying in the week before Census and are usually resident in the area. This base has been produced for the usually resident population (those who are resident or intending to be resident in the UK for 12 months or more).

[Daytime population statistics](#) were published at 9.30am on 18 December 2014. The outputs are mostly univariate on a number of topics for example, approximated social grade, industry, occupation and qualifications.

[Back to the top](#)

Travel to Work or Place of Study

Detailed Characteristics Statistics from the 2011 Census are available on our [NINIS website](#)

Local Characteristics Statistics from the 2011 Census are available on our [NINIS website](#)

On the 26 February 2015 at 9.30am a number of tables were published that covered the topic of travel to work or place of study.

The tables in this release present data on method and distance of travel to work and place of study. Layouts for these tables are now available: [DC table layouts](#) and [LC table layouts](#). The release included both Detailed and Local Characteristics (DC and LC) tables. There is 22 DC and 16 LC tables covering travel to work and 9 DC tables covering travel to place of study.

The Detailed Characteristics tables are available for Northern Ireland, Local Government Districts (LGDs), Health and Social Care Trusts (HSCTs), Education and Library Boards (ELBs) and NUTS level III (European Union Nomenclature of Units for Territorial Statistics).

[Back to the top](#)

UK Census Releases

What is happening in England, Wales and Scotland?

Simultaneous but separate 2011 censuses took place in England and Wales, run by the [Office for National Statistics](#) (ONS), and Scotland, run by [National Records Scotland](#) (NRS).

The Office for National Statistics (ONS) is responsible for disseminating Census 2011 statistics for England and Wales.

National Records of Scotland (NRS) is responsible for disseminating Census 2011 statistics for Scotland.

Northern Ireland Statistics and Research Agency (NISRA) is responsible for disseminating Census 2011 statistics for Northern Ireland.

ONS is also responsible for the publication of UK statistics (compiling comparable statistics from the UK statistical agencies). The [ONS prospectus](#) covers the publication, analysis and dissemination of UK statistics.

UK Releases

The [first release](#) of census results for the UK took place at 9.30am on 17 December 2012. This release included population estimates of the usually resident population of the UK and its constituent countries, by age and sex. This combined rounded Scottish data with data already published for England, Wales and Northern Ireland.

[Release 1.2](#) of UK census population estimates took place at 9.30am on 21 March 2013. This release included population estimates by five-year age bands and sex, as well as household estimates for all UK local authorities (or equivalent). This combined rounded Scottish data with data already published for England, Wales and Northern Ireland.

[Release 1.3](#) of UK census population estimates was published at 9.30am on 31 July 2013 and contained population estimates by single year of age and sex for Local Authorities in the United Kingdom. These figures are unrounded.

[Release 2.1](#) took place at 9.30am on 11 October 2013. This release comprised of 8 Key statistics and 15 Quick Statistics tables. These tables covered topics such as Ethnic Group, Country of Birth, Health and Housing. The release was accompanied by a statistics bulletin.

[Release 2.2](#) took place at 9.30am on 4 December 2013. This release comprised 22 tables in total, both Key and Quick Statistics, and covered the topics of Qualifications and Labour Market.

Northern Ireland Census 2011 Output Prospectus

Release plans for Northern Ireland Census 2011 Statistics

[Release 2.3](#) took place at 9.30am on 23 January 2014. This release comprised 27 tables in total, both Key and Quick Statistics, and covered the topics of Demography, Housing and Labour Market.

[Back to the top](#)

2011 Census reporting and analysis

All key releases of statistical data by NISRA will be accompanied by explanatory reporting and analysis to supplement the tables. The simultaneous release of information on NINIS will give immediate access to charting and mapping facilities, as well as metadata. The content of the Northern Ireland Census 2011 was agreed in advance with the other government departments and census statistics will be used in statistical outputs across government.

Further census analysis is now available in the form of short stories presented through infographics. At present these cover the topics, Religion, No Religion, older people, national identity and Northern Ireland as 100 people. There is also general census information available for the 19 Northern Ireland Parliamentary Constituencies and the 11 new Local Government Districts. A Census 2011 timeline is also available. The short stories can be accessed on the [NINIS](#) website, the links have been provided below:

- [Older People \(Northern Ireland\)](#)
- [National Identity \(Northern Ireland\)](#)
- [Census 2011 Timeline](#)
- [Religion \(Northern Ireland\)](#)
- [No Religion \(Northern Ireland\)](#)
- [Northern Ireland as 100 People](#)
- [Parliamentary Constituencies/Assembly Areas](#)
- [Local Government Districts 2014 - Key Statistics](#)
- [Settlements \(Bands A – D\) as 100 people and 100 households](#)
- [Local Government Districts 2014 as 100 people and 100 households](#)

[Back to the top](#)

Commissioned tables

Commissioned Tables from the 2011 Census are available on our [NINIS website](#)

Northern Ireland

NISRA will continue to provide a commissioned table service for Northern Ireland census statistics.

Commissioned tables (from the Census 2011) will be available on demand from Census Customer Services. Commissioned tables will be constrained by the data that are available at each stage, by the similarity to what NISRA plans to release, and by statistical disclosure control.

In addition to the tables prepared for the standard outputs from the Northern Ireland Census 2011, tables may be independently commissioned when customer requirements are not met by data available in the published tables.

Commissioned tables service was opened in three stages:

1. Requests for Northern Ireland level data will be considered after all Detailed Characteristics tables are published at the Northern Ireland level (opened in September 2013);
2. Requests for Local Government District/Super Output Area level data will be considered after Detailed Characteristics tables are published at outstanding geographic levels (opened in November 2013); and
3. Requests for Small Area level data will be considered after the publication of the Local Characteristics tables (opened in March 2014).

Commissioned tables will be issued to the requesting customer under an [Open Government Licence \(OGL\)](#) by the provision of a link to a URL on the NISRA website and are then available free to all other users.

A full list of commissioned tables from the 2011 Census can be accessed:

http://www.nisra.gov.uk/archive/census/2011/commission/c_table_lookup_2011.xlsx

The cost of the commissioned output reflects the amount of time taken to develop the tables together with statistical disclosure check (pre and post production) and associated processes. The charges reflect the Full Economic Costs associated with the delivery of the service. If the customer requires delivery via portable media (CD/DVD) an additional charge will be made to cover the costs of administration, production and delivery.

All charges are subject to VAT at the standard rate.

The table below gives customers a guide to how much their commissioned table will cost. However the customer services team will consider each request on a case-by-case basis, and will agree the final cost with the customer prior to any work commencing.

Pricing is effective from 1 February 2016.

Description	Indicative Cost
A table which takes under half a day to produce	Up to £150
A table which takes between half a day and a day & a half to produce	£150 - £350
A table which takes between a day & a half and two & a half days to produce	£350 - £600
A table which takes longer than two & a half days to produce	Price on Application

In summary, information will be free at the point of delivery (for example, through the web), for other output media a charge may be made for the production of the media (for example, published reports) and for ad-hoc requests Full Economic Cost recovery will apply subject to a de minimis.

One of the strengths of the Census is its ability to quantify the number, distribution and characteristics of small population groups. NISRA is willing to consider requests for such statistical outputs. Users should appreciate that decisions on such outputs will depend on consideration of statistical disclosure control and population thresholds.

UK

Office for National Statistics (ONS) will also be the provider for UK commissioned tables. UK tables can be ordered after all the census offices have released their 2011 statistics.

National Records of Scotland (NRS) is responsible for disseminating Census 2011 statistics for Scotland.

ONS is also responsible for disseminating Census 2011 statistics for England and Wales.

Additional information

Read about [copyright](#) and reproduction.

Keeping informed

For general information about the Census 2011 statistics and developments visit the Census pages on the NISRA website: <http://www.nisra.gov.uk/census>

[Back to the top](#)
