

Release of Census data on 19 September 2012

Census Day Population estimates for NUTS III areas

The on-line publication of Census Day population estimates for the three NUTS III areas of Outer Belfast, East of Northern Ireland and North of Northern Ireland had the population estimates and the NUTS area names in different orders. Subsequently, the population figures displayed online for the three named NUTS areas were incorrect. The Census Day population estimates for the 26 Local Government Districts, on which the NUTS areas are based, were published correctly.

NISRA seeks to minimise the need for corrections in its statistical publications. However, where material errors are detected, it undertakes to issue corrections promptly, to alert key stakeholders and to provide an explanation.

The on-line data have now been corrected.

NISRA apologises for any inconvenience caused.
