Northern Ireland Broad Economy Sales and Exports Statistics: Goods and Services Results 2016

NISRA published its Broad Economy Sales and Exports Statistics (BESES) results relating to local businesses’ sales in 2016 to markets outside Northern Ireland in December 2017. The latest publication provides further disaggregation of these results into the value of goods and services sold. The December 2017 estimates remain designated as ‘experimental’ to reflect the fact that they are under development.

Key points

- Total sales by companies in Northern Ireland (NI) were estimated to be worth £68.9 billion in 2016, an increase of 2.7% (£1.8 billion) over the year.

- Total sales of goods were estimated to be worth £49.4 billion in 2016, an increase of 2.4% (£1.2 billion) over the year.

- Sales of services represented 28.3% of total sales in 2016 and were estimated to be worth £19.5 billion. Sales of services increased by 3.4% over the year (£0.6 billion).

- External sales to markets outside of NI rose by £1.0 billion (4.2%) to £24.1 billion in 2016.

- External sales of goods by NI companies were estimated to be worth £18.8 billion in 2016, 78.0% of all external sales. This represents an increase of 2.9% over the year (£0.5 billion).

- External sales of services were estimated to be worth £5.3 billion or 22.0% of all external sales in 2016. This represents an increase of 9.1% (£0.4 billion) over the year.

- Exports were estimated to be worth £10.1 billion in 2016, an increase of 7.3% (£0.7 billion) over the year.

- Exports of goods were estimated to be worth £8.3 billion in 2016, an increase of 5.7% (£0.4 billion). Exports of goods represented 81.9% of all exports sales.

- Exports of services represented 18.1% of total export sales in 2016 and were estimated to be worth £1.8 billion. Exports of services increased by 15.1% (£0.2 billion) over the year.

1 Introduction and Context

Experimental Status

The Broad Economy Sales and Exports Statistics (BESES) is an experimental annual measure of local businesses' sales to markets outside Northern Ireland (NI). The BESES was first published in 2015 (referring to survey years 2011 and 2012) to provide a more comprehensive measure of such sales than had previously been available. This publication includes estimates of the value of both goods and services sold by NI businesses in 2016, as well as their point of destination. The results provide further disaggregation of 2016 BESES estimates first published in December 2017.

Ongoing development of the methodology (as outlined in the associated published methodology paper (March 2015)) will be informed by user feedback, both in terms of the usefulness and reliability of the estimates and their comparability with other sources and the statistics will remain experimental until user feedback indicates that they are useful and credible. Any comments should be sent to economicstats@nisra.gov.uk

NISRA has engaged extensively throughout the evolution of this output with expert users of NI economic statistics whose views have already helped to inform the current approach. Users include DfE, DoF, and DAERA economists, the Ulster University Economic Policy Centre and a number of NI economic commentators and ONS methodologists. NISRA will continue to consult on any further methodological changes which may improve the quality and value of the statistics.

Background

The Northern Ireland Executive’s Economic Strategy referred to the need to improve the measurement of Northern Ireland’s exports beyond that of the manufacturing sector. NISRA subsequently published initial estimates of ‘broad economy’ sales and exports by industry sector in March 2015.

This release provides a further breakdown of the revised estimates for 2015 and provisional estimates for 2016 first published in December 2017 by splitting the sales into its goods and services elements.

To support this release a set of reference tables with further sectoral breakdowns are available on the NISRA website.

The contents of this report will be of interest to government policy makers, Members of the Legislative Assembly (MLAs), the business community, economic commentators, academics and members of the general public with an interest in the NI economy. Previous uses and users of the old Manufacturing Sales and Exports Survey, which was superseded by the BESES, are documented separately.

The latest Department for the Economy Economic Commentary provides an overview of the state of the Northern Ireland economy, setting it in a global context.
Other sources

The International Trade in Services (ITIS) survey is a UK wide survey which collects information on overseas transactions of consultants and companies offering business services. Information collected from the survey is fed into the UK balance of payments and published at the UK level. The full bulletin can be accessed here.

While directly comparable UK data for the BESES do not exist (the BESES covers goods and services produced in Northern Ireland), HM Revenue & Customs (HMRC) are responsible for collecting the UK’s international trade in goods data, which are published as two National Statistics series - the 'Overseas Trade Statistics (OTS) of the UK' and the 'UK Regional Trade Statistics (RTS)'. These UK regional statistics can be accessed at: https://www.uktradeinfo.com/Statistics/RTS/Pages/default.aspx.

A joint NISRA/HMRC statement referencing the differences between the methodologies and ongoing collaborative working is available in Appendix A. Users should also refer to Appendix C of the 2015 BESES publication where the differences in estimates produced by NISRA and HMRC are further explored.

NISRA’s exports statistics are considered as “Partially Comparable at Level D” with the ONS’s statistics on importers and exporters in GB (most recent publication).

Level D comparability is described as:

“Figures which are produced from separate sources of data. Methods and standards are broadly comparable, but users should be made aware of the limitations.”
Status of figures in current bulletin

The most recent figures relate to survey year 2016. These figures are provisional and are subject to revision in the next reporting period.

It is normal practice to revise the data from the previous year based on ongoing data validation and clarification of responses from individual businesses. In line with this, previously published provisional BESES estimates for 2015 have been revised throughout this publication.

Sales and exports values are reported in £ million unless otherwise specified.

Percentage changes are reported to one decimal place.

The Broad Economy Sales and Exports Statistics series is classified as experimental (see above).

Definitions used in this publication

Broad Economy: The information needed to produce BESES is collected via the NI Annual Business Inquiry (NIABI). Like NIABI, the BESES results are classified according to the Standard Industrial Classification of Economic Activities (SIC) system. The SIC 2007 sections covered by the NIABI defines the term ‘Broad Economy’ and are as follows:

A. Agriculture (support activities), forestry and fishing
B. Mining and quarrying
C. MANUFACTURING
D. Electricity, gas, steam and air conditioning supply
E. Water supply, sewerage, waste management and remediation activities
F. Construction
G. Wholesale and retail trade; repair of motor vehicles and motor cycles (Distribution industries)
H. Transport and storage
I. Accommodation and food service activities
J. Information and communication
L. Real estate activities
M. Professional, scientific and technical activities
N. Administrative and support service activities
P. Education (excludes local authority and central government bodies)
Q. Human health and social work activities (excludes local authority and central government, and medical and dental practice activities (group 86.2))
R. Arts, entertainment and recreation
S. Other service activities

Coverage: Following a decision in 2013 by the Office for National Statistics to discontinue the publication of figures covering Insurance & Re-insurance industries (within Sector K) due to ongoing volatility of the estimates, the NIABI and BESES publications also exclude estimates for this sector.

The other main areas that are excluded are: Public Administration and Defence (section O) while Agriculture, Forestry and Fishing (section A) excludes farming (groups 01.1, 01.2, 01.3, 01.4 and 01.5). Local authority and central Government bodies in Education (section
P) and Human Health and Social Work Activities (section Q) have also been excluded from this publication, as has 86.2 (Medical and Dental Practice Activities) within section Q.

**Total sales** are defined as the sum of all sales to Northern Ireland (NI), Great Britain (GB), the Republic of Ireland (ROI), the Rest of the European Union (REU) and the Rest of the World (ROW). Total sales include all taxes and duties on goods invoiced with the exception of VAT which is excluded from total sales.

**External sales** are comprised of those sales made outside Northern Ireland, that is, sales to Great Britain, the Republic of Ireland, the Rest of the European Union and the Rest of the World.

**Exports** consist of all sales made outside the United Kingdom.

All values are in current prices.

**Further Information**

Further information on the BESES can be accessed on the NISRA website.
2 Summary and Commentary

2.1 Sales and Exports Performance

Total sales by companies in Northern Ireland were estimated to be worth £68.9 billion in 2016. This represents an increase of 2.7% (£1.8 billion) over the year and compares to an increase of 1.3% from 2014 to 2015.

In 2016, 35.0% of total sales were made to customers outside NI (external sales). This equated to £24.1 billion, representing an increase of 4.2% (£967 million) over the year. This figure exceeds the previously recorded peak in 2015 (£23.2 billion), and external sales are therefore at their highest on survey record.

Sales outside the UK (exports) were estimated to be worth £10.1 billion in 2016. This represented an increase of 7.3% over the year, and follows a decrease in the previous period (2014 – 2015) of 1.6%.

Figure 1 shows the values of total sales, and their broad destinations over the 6 year period (2011 to 2016). Total exports increased in 2016 driven by increase in sales to each export destination (ROI, REU and ROW). This comes after total exports decreased in both 2014 and 2015.

Figure 1: Total Sales and their broad destinations: 2011 – 2016 (£ billions)

2.2 Sale of Goods and Services over Time

Total Sales
Total sales of goods were estimated to be worth £49.4 billion in 2016. Sales of goods increased by 2.4% over the year (£1.2 billion), compared to a decrease of 0.6% the previous year. Total sales of goods represented almost three quarters (71.7%) of total sales in 2016.
Sales of services represented 28.3% of total sales in 2016 and were estimated to be worth £19.5 billion. Sales of services increased by 3.4% over the year (£0.6 billion), compared to an increase of 6.3% the previous year. Figures 2 – 4 show the values of total sales, external sales and export sales of goods and services over the 6 year period (2011 – 2016).

**Figure 2: Total Sales of Goods and Services: 2011 – 2016 (£ billions)**

External Sales
The total value of external sales of goods by Northern Ireland companies was estimated to be worth £18.8 billion in 2016. This represents an increase of 2.9% over the year (£0.5 billion) compared to a fall the previous year of 0.3%. External sales of goods represented 78.0% of all external sales in 2016.

External sales of services were estimated to be worth £5.3 billion in 2016. This represents an increase of 9.1% (£0.4 billion) over the year and compares to an increase of 13.2% in 2015. External sales of services represented 22.0% of all external sales over the year.

**Figure 3: External Sales of Goods and Services: 2011 – 2016 (£ billions)**
Exports

Total exports of goods were estimated to be worth £8.3 billion in 2016. This represents an increase of 5.7% (£0.4 billion) over the year and compares to a decrease of 1.9% in 2015. The export of goods represented 81.9% of all exports in 2016.

Exports of services represented 18.1% of total export sales in 2016 and were estimated to be worth £1.8 billion. Exports of services increased by 15.1% (£240 million) over the year compared to an increase of 0.2% (£4 million) the previous year.

Figure 4: Exports of Goods and Services: 2011 – 2016 (£ billions)

2.3 Analysis by Destination

Figure 5 shows the proportion of broad destination sales accounted for by goods and services. Sales of goods account for the largest proportion of sales within each broad destination in 2016. It is evident that the more distant the export market, the greater the proportion of sales are attributed to goods, e.g. goods account for 68.4% of total Northern Ireland sales, and 84.1% of all Rest of World sales. Sales of goods account for 81.9% of export sales and 78.0% of all external sales.

For sales of services it is apparent that the closer the market the greater the proportion of service sales occur, with 31.6% of total sales in Northern Ireland and just 15.9% of all Rest of World sales. Service sales make up 18.1% of export sales and 22.0% of external sales.
Figure 5: Goods and Services, as a proportion of sales, to each destination: 2016

Figure 6 shows the proportion of total sales, sales of goods and sales of services sold to Northern Ireland, Great Britain and those sold as Exports. It is apparent that the highest proportion of service sales occurs internally, with 72.7% of all service sales made within Northern Ireland. The more distant the market, the smaller the proportion of sales of services becomes, with 17.9% of sales in GB and 9.4% of sales exported.

61.9% of all sales of goods occur within Northern Ireland. While the proportion again drops with increasing market distance, the share of goods sold in Great Britain and those exported (21.3% and 16.8%) is greater than the corresponding proportion of services in these regions (17.9% and 9.4% respectively).

Figure 6: Proportion of the sale of Goods and Services to each destination: 2016
2.4 Analysis by Industry Section

External sales to markets outside Northern Ireland are comprised of sales to GB plus the value of exports combined. Figures 7–9 show the value, trends and proportion of external sales of goods and services over the year. In 2016, the largest proportion of external sales of goods was from the Manufacturing sector (Section C) which made up 74.7% (£14.1 billion) of all external sales of goods. External sales of goods by businesses in the manufacturing sector increased by £156 million over the year.

The next largest sector for external sales of goods was the Services sector\(^1\), with 21.2% (£4.0 billion) of external sales of goods. External sales of goods in this sector saw the largest actual increase over the year, up £313 million (8.5%).

The Construction sector (Section F) saw the next largest proportion of external sales of goods (2.7% or £506 million) while the Other Production & Agriculture\(^2\) section represented just 1.3% (or £254 million) of external sales of goods.

**Figure 7: External sales of goods and services by industry section: 2016 (£ millions)**

The largest proportion of external sales of services was, not surprisingly, from the Services sector which made up 60.5% (£3.2 billion) of all external sales of services. Such activity saw an increase of £147 million (4.8%) between 2015 and 2016.

The next largest sector for external sales of services was the Construction sector, with 32.3% (£1.7 billion) of external sales of services. The Construction sector also saw the second largest percentage increase in external sales of services over the year, increasing by £312 million over the year (22.2%).

Manufacturing saw the next largest proportion of the external sale of services with 6.2% (£329 million) of such sales in 2016. The Manufacturing sector was the only sector to see a decrease in external sales of services over the year, falling by 10.0% (£37 million). The Other Production & Agriculture section represented just 1.0% (£55 million) of external sales of services in 2016, and saw an increase (£21 million or 62.3%) over the year. While, in percentage terms, this was the sector with the largest annual increase, this change is based on a relatively low level of sales.

---

\(^1\) The Services section comprises sectors G – J, L – N and sectors P – S

\(^2\) The Other Production & Agriculture section comprises sectors A, B, D & E
Figure 8: Trends in external sales of goods and services: change by industry section 2015 – 2016 (£ millions)

- Manufacturing: £156 (increase) - £37 (decrease)
- Services: £147 (increase) - £313 (increase)
- Construction: £109 (increase) - £312 (increase)
- Other Production & Agriculture: £21 (increase) - £56 (decrease)

Figure 9: Proportion of external sales of goods and services by industry section: 2016

- Manufacturing: Total External Sales 60%, External Sale of Goods 8%, External Sale of Services 9%
- Services: Total External Sales 60%, External Sale of Goods 30%, External Sale of Services 6%
- Construction: Total External Sales 32%, External Sale of Goods 3%, External Sale of Services 1%
- Other Production & Agriculture: Total External Sales 1%, External Sale of Goods 1%, External Sale of Services 1%

Appendix A: NISRA/HMRC joint statement referencing the differences in methodological approaches between BESES and HMRC RTS

Due to methodological differences, the BESES (NISRA’s Broad Economy Sales and Exports Statistics) and HMRC Regional Trade Statistics (RTS) are not directly comparable.

HMRC’s primary source data is collected from the EU-wide Intrastat survey and from Customs import and export entries, both administered by HMRC. These record the movement - for trade purposes - of goods only between the UK and both EU and non-EU countries. There is a legal requirement for all VAT-registered businesses to supply this data, although for trade with the EU this only applies to businesses trading above the Intrastat threshold.

The RTS methodology allocates trade to a region based on the location of the business exporting or importing the goods. For multi-branch businesses, it allocates trade to a region, based on the proportional distribution of employees of that business across the regions of the UK. HMRC consider this to be a good proportionate reflection of trade at a regional basis. This methodology is in harmony with other regional statistical products from across the GSS, including the Annual Business Survey and the recently launched Regional Trade in Services from the ONS.

This main allocation method is used for all trade except for specific goods, the treatment of which are outlined in the published RTS methodology.

The BESES is an experimental measure, based on an annual survey of local businesses’ sales to markets outside Northern Ireland (NI). BESES data is gathered through the Northern Ireland Annual Business Inquiry and has been running since 2011. The ABI surveys all businesses with 50 or more employees; all multi-site businesses with 20-49 employees; all manufacturing businesses with more than 5 employees; and a representative sample of other smaller businesses. In all, the ABI samples about 20% of the eligible business population each year.

Users should refer to Appendix C of the 2015 publication for estimates of the size of the difference between HMRC and NISRA measures of trade.

Statisticians in NISRA and HMRC are working together to understand the differences. This will lead to the documentation of the differences which will assist users. In the long term it may lead to future methodological enhancements of the products.
