

Northern Ireland Quarterly Index of Services

Quarter 2 (April – June) 2021

Theme: Economy

Frequency: Quarterly

Geographical Area: Northern Ireland

Date: 16 September 2021

Introduction

The quarterly Index of Services (IOS) provides a timely indicator of change in output within the private sector services industries in Northern Ireland (NI). IOS indices, along with published quarterly data and unpublished agricultural output data, are used to generate the [Northern Ireland Composite Economic Index \(NICEI\)](#). The NICEI is an experimental quarterly measure of economic activity in NI.

Key Points

Output estimates are calculated from the IOS aspect of the Quarterly Business Survey (QBS). The IOS has a sample size of approximately 3,500 businesses, covering all private service sector businesses with 100 or more employees and a representative sample of smaller businesses. The latest quarterly estimates are compared to revised Quarter 1 2021 and Quarter 2 2020 estimates. Note that Quarter 2 2020 was the height of the coronavirus restrictions and, as a result, most IOS series were at a series low.

- Services output in NI saw a quarterly increase of 5.5% in Quarter 2 2021 and an increase of 29.2% over the year.
- UK IOS output experienced an increase of 5.8% over the quarter and 21.0% over the year.
- NI and UK Service outputs remain 1.2% and 3.6% respectively below their pre Coronavirus pandemic levels seen in Q4 2019.
- When the most recent four quarters are compared to the previous four quarters the NI services sector increased by 2.9% while the UK services sector decreased by 1.0%.
- NI services output is 1.5% lower than the highest point (Quarter 1 2019) in the past ten years, and 4.3% lower than the highest point (Quarter 4 2006) since the series began.
- NI services output is 29.2% higher than the lowest point (Quarter 2 2020) since the series began.
- The annual increase to Quarter 2 2021 is the first increase following six consecutive quarters of annual decline in the NI index between Quarter 4 2019 and Quarter 1 2021.

NATIONAL STATISTICS STATUS

National Statistics status means that our statistics meet the highest standards of trustworthiness, quality and public value, and it is our responsibility to maintain compliance with these standards.

These statistics were designated as National Statistics on 5th August 2011 following a full [Index of Services assessment](#) against the UK [Code of Practice for Statistics](#).

Since the assessment by the UK Statistics Authority we have continued to comply with the Code of Practice for Statistics and have made the following improvements:

- Removed pre-release access to enhance trustworthiness and also brought the publication date forward as a result;
- Reduced [business burden](#) by offering the option of online data returns.

1 Summary of Index of Services

1.1 Changes in Index of Services

The seasonally adjusted estimate for the NI IOS for Quarter 2 2021 output increased:

- by 5.5% over the quarter from the Quarter 1 2021 estimate;
- by 29.2 over the year from the Quarter 2 2020 estimate; and
- by 2.9% when the most recent four quarters are compared to the previous four quarters.

Figure 1.1 IOS, NI & UK, Q1 2005 – Q2 2021

[Download Q2-21 Data](#)

1.2 Commentary

The coronavirus (COVID-19) pandemic and subsequent measures taken to reduce the transmission of the virus impacted on the economy in 2020 and 2021. Throughout Quarter 2 2021, businesses in Northern Ireland were subject to a number of restrictions which impacted on their ability to operate. Further information can be found on [NI Direct: Coronavirus guidance documents](#). Quarter 2 2021 output remains 1.2% below the pre-pandemic level seen in Q4 2019 in comparison to the 3.6% decrease seen in the UK IOS output over the same period.

Users should note that many of the annual changes in the report are based on a comparison of current data against data relating to the earliest full quarter of the pandemic and the height of lockdown restrictions. This led to many of the estimates for Quarter 2 2020 being series lows. Where possible a comparison with one year ago as well as a comparison against the pre-pandemic value is provided for context.

Output in the services sector increased by 5.5% over the second quarter of 2021 but is 29.2% higher than the series low (Quarter 2 2020). NI services sector output is now 1.5% lower than the highest point in the past ten years (Quarter 1 2019) and 4.3% lower than the series high (Quarter 4 2006).

The quarterly increase seen to Quarter 2 2021 in NI (5.5%) is only the second quarterly increase since the start of 2020. The UK index has seen three quarterly increases and three quarterly decreases during the same period. The annual increase to Quarter 2 2021 (29.2%) follows a period of six successive annual decreases in the NI series. Prior to this, the NI index saw eighteen consecutive quarters of annual growth between Quarter 2 2015 and Quarter 3 2019.

Figure 1.2 NI IOS Quarterly, Annual and Rolling Four Quarter Changes at Sector Level¹

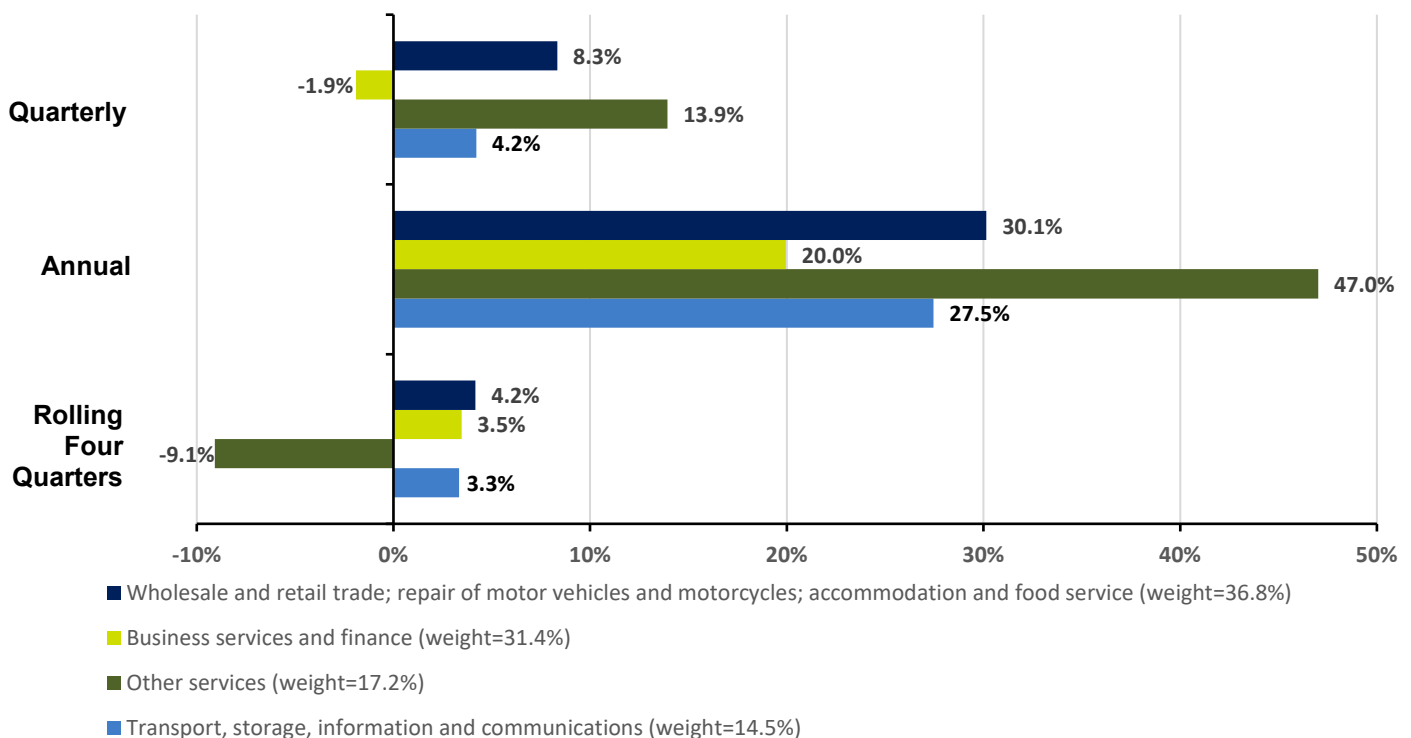

Figure 1.3 NI IOS Quarterly, Annual and Rolling Four Quarter Changes at Sector Level¹

Broad Sector	Change		
	Quarter on quarter	Year on year	Rolling four quarter
Wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food service	8.3%	30.1%	4.2%
Business services and finance	-1.9%	20.0%	3.5%
Other services	13.9%	47.0%	-9.1%
Transport, storage, information and communications	4.2%	27.5%	3.3%

¹ For further information on weights see Regional GVA information on page 14

1.3 Context

The IOS is an important short-term measure of change in the output of the production sector of the economy. The contents of this report will be of interest to government policymakers, Members of the Legislative Assembly, the business community, economic commentators, academics and members of the general public with an interest in the NI economy. A [summary of usage of the NI IOS](#) is available on the NISRA website.

The Department for the Economy (DfE) [Economic Commentary](#) provides an overview of the NI economy, setting it in context with the UK and Republic of Ireland.

The most up-to-date official statistics on the economy and labour market are available on the [Economic Overview](#) dashboard on the [Economic and Labour Market Statistics \(ELMS\) section](#) of the NISRA website.

The IOS is published on a Standard Industrial Classification 2007 (SIC07) basis. IOS data prior to Quarter 2 2011 were collected on a SIC 2003 (SIC03) basis and have been converted to approximate the SIC07 coverage. Volatility can arise when businesses inform NISRA of SIC code changes via business surveys, the Office of National Statistics (ONS) or HM Revenue & Customs (HMRC). This new information helps to improve the industry estimates of services output but can add volatility to quarterly and annual changes.

The [Background notes](#) section of this document provides information on the methodology used to produce these statistics as well as information on the quality and accuracy of the data.

This bulletin contains results for the service sector as a whole and the following four sectors:

- wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food service;
- transport, storage, information and communication;
- business services and finance; and
- other services.

All services sector series are seasonally adjusted on a 2018=100 basis using X-13 ARIMA SEATS.

Comparative UK data, produced by the ONS, are presented where these are available. The [latest UK IOS results](#) published on the ONS website. Note that processing of data can result in very small rounding differences between percentage change estimates reported by ONS and this report

This publication provides three measures of growth for all indices.

1. **Quarter-on-quarter change** provides the most recent measure of how the sector is changing. It is appropriate to compare consecutive quarters as the indices are seasonally adjusted to remove the effects of changes in output as a result of the time of the year;
2. **Year-on-year change** compares the current quarter with the same quarter one year ago; and
3. **Rolling four quarter change** compares the most recent twelve months with the twelve months before. This comparison is useful for identifying changes in output over a longer time period than the other two approaches.

Users should note that many of the annual changes in the report are based on a comparison of current data against data relating to the earliest full quarter of the pandemic and the height of lockdown restrictions. This led to many of the estimates for Quarter 2 2020 being series lows. Where possible a comparison with one year ago as well as a comparison against the pre-pandemic value is provided for context.

1.4 Revisions

Results are provisional and subject to revision which can be made for a variety of reasons. The most common include late responses to surveys, estimates being replaced by actual data, revisions to seasonal adjustment factors, methodological changes and changes to business classifications. Volatility also arises when businesses inform NISRA of SIC code changes via business surveys, ONS or HMRC. This new information helps to improve the estimates of growth each quarter but also adds volatility to quarterly and annual changes. Only rarely are there avoidable 'errors', such as human or system failures, and such mistakes are made quite clear when they do occur.

The coronavirus (COVID-19) pandemic impacted on the data collection and the validation of business data, which are collected on the Quarterly Business Survey. As a result estimates for Quarter 2 2021 may be subject to higher revisions than normal over the coming quarters.

2 Services output by sector

Output: turnover, the value of total sales generated from all NI based activity, excluding VAT. Turnover is rounded to the nearest thousand and is then grossed, deflated and seasonally adjusted.

2.1 Key Findings:

- The NI IOS increased by:
 - 5.5% over the quarter;
 - 29.2% over the year; and,
 - 2.9% on a rolling four quarters basis.
- The NI IOS is 1.5% lower than the highest point in the past ten years (Quarter 1 2019) and is 4.3% lower than the series high (Quarter 4 2006).
- The 5.5% quarterly increase in NI services output reflected increases in three of the four subsectors, with increases in the Other services sector (13.9%); Wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food service sector (8.3%); and the Transport, storage, information and communications sector (4.2%). These increases were partially offset by a decrease in the Business services and finance sector (1.9%).
- The 29.2% annual increase in NI services output was caused by increases in all four subsectors, with an increase of 47.0% in the Other services sector; an increase of 30.1% in the Wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food service sector; an increase of 27.5% in the Transport, storage, information and communications sector; and an annual increase of 20.0% was seen in the Business services and finance sector.

The private service sector is comprised of four sectors but is dominated by the:

- (i) wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food services; and,
- (ii) business services and finance sectors.

Together these two sectors account for 68.3% of total private services Gross Value Added (GVA) at 2019 prices. The sectors are listed in order of importance of their contribution made to the overall IOS.

Figure 2.1

IOS private sector split (based on 2019 GVA)²

² May not add to 100% due to rounding

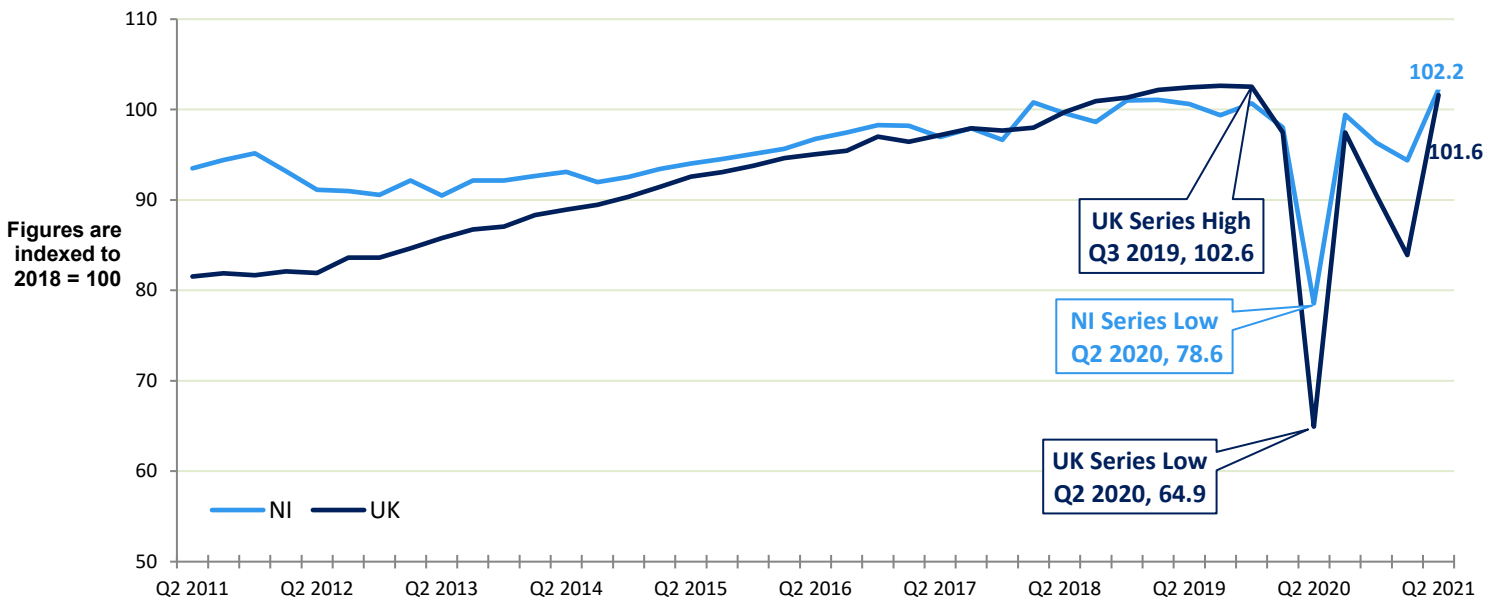

2.2 Wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food service sector

(SIC 07 Section GI) – (weight = 36.8% of IOS): includes the wholesale and retail sale and the supply of services incidental to the sale of merchandise as well as the repair of motor vehicles and motorcycles. This sector also includes the provision of short-stay accommodation for visitors and the provision of complete meals and drinks fit for immediate consumption.

Key Findings:

- The NI seasonally adjusted figures increased by:
 - 8.3% over the quarter
 - 30.1% over the year; and,
 - 4.2% on a rolling four quarter basis.
- The UK seasonally adjusted figures increased by:
 - 21.1% over the quarter;
 - 56.5% over the year; and,
 - 1.6% on a rolling four quarter basis.
- NI output in Quarter 2 2021 is 30.1% higher than the lowest point recorded since the series began (Quarter 2 2020).
- NI output this quarter is 1.5% below the series high (Quarter 1 2007) but is the highest quarter over the last ten years.
- The GI level is 1.6% above the pre-pandemic level seen in Q4 2019.

Figure 2.2 Wholesale and retail trade; repair of motor vehicles and motorcycles; accommodation and food service sector, NI & UK, Q2 2011 – Q2 2021

[Download Q2-21 Data](#)

2.3 Business services and finance sector

(SIC 07 Section KLMN) - (weight = 31.4% of IOS): includes financial service activities, real estate activities, specialised professional, scientific and technical activities and a variety of activities that support general business operations.

Key Findings:

- The NI seasonally adjusted figures:
 - decreased by 1.9% over the quarter;
 - increased by 20.0% over the year; and,
 - increased by 3.5% on a rolling four quarter basis.
- The UK seasonally adjusted figures:
 - increased by 0.4% over the quarter;
 - increased by 8.0% over the year; and,
 - decreased by 1.8% on a rolling four quarter basis.
- NI output in Quarter 2 2021 is 3.4% below the highest point (Quarter 2 2019) recorded over the past ten years and is 26.1% below the highest point since the series began (Quarter 3 2006).
- NI output in Quarter 2 2021 is 20.0% above the lowest point since the series began (Quarter 2 2020).
- The KLMN level remains 1.9% below the pre-pandemic level seen in Q4 2019.

Figure 2.3 Business services and finance sector, NI & UK, Q2 2011 – Q2 2021

[Download Q2-21 Data](#)

2.4 Other services sector³

(SIC 07 Section PQRS) - (weight 17.2% of IOS): includes other activities not covered elsewhere - education, health & social work, arts, entertainment and recreation and other services.

Key Findings:

- The NI seasonally adjusted figures:
 - increased by 13.9% over the quarter;
 - increased by 47.0% over the year; and,
 - decreased by 9.1% on a rolling four quarter basis.
- NI output in Quarter 2 2021 is 26.2% below the highest point (Quarter 3 2013) recorded over the past ten years and is 26.3% below the highest point since the series began (Quarter 1 2009).
- NI output in Quarter 2 2021 is 47.0% above the lowest point since the series began (Quarter 2 2020).
- The PQRS level remains 19.5% below the pre-pandemic level seen in Q4 2019.

Figure 2.4 Other services sector, NI, Q2 2011 – Q2 2021

[Download Q2-21 Data](#)

³ The UK does not publish results on the same basis as NI so there are no UK results to compare against.

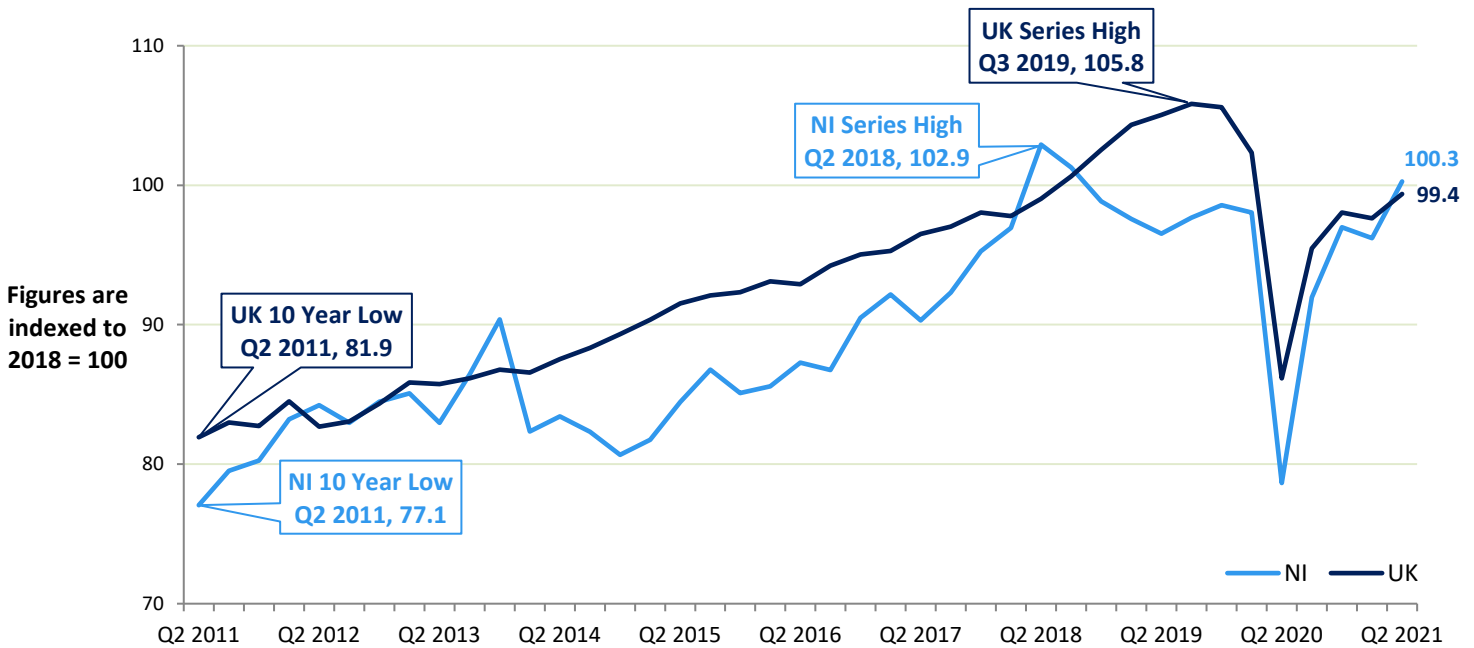

2.5 Transport, storage, information and communications sector

(SIC 07 Section HJ) - (weight 14.5% of IOS) : includes the provision of passenger or freight transport and associated activities, postal and courier activities, the production and distribution of information and cultural products, as well as data or communications, information technology activities and the processing of data and other information service activities.

Key Findings:

- The NI seasonally adjusted figures increased by :
 - 4.2% over the quarter;
 - 27.5% over the year; and,
 - 3.3% on a rolling four quarter basis.
- The UK seasonally adjusted figures:
 - increased by 1.8% over the quarter;
 - increased by 15.3% over the year; and,
 - decreased by 2.4% on a rolling four quarter basis.
- NI output in Quarter 2 2021 is 2.6% below the highest point (Quarter 2 2018) since the series began.
- NI output in Quarter 2 2021 is 30.1% above the lowest point (Quarter 2 2011) recorded over the past ten years and is 55.7% above the lowest point (Quarter 1 2005) recorded since the series began.
- The HJ level is now 1.7% above the pre-pandemic level seen in Q4 2019.

Figure 2.5 Transport, storage, information and communications, NI & UK, Q2 2011 – Q2 2021

[Download Q2-21 Data](#)

3 Background notes

Background

The quarterly IOS provides a measure of changes in the output of the private sector service industries in NI (this is defined as SIC07 sections G to S). Based on 2019 employee jobs figures these private sector service industries accounted for 62.3% of all service sector Regional GVA. For further information please see the [Methodology for the NI Index of Services \(IOS\)](#).

Impact of coronavirus (COVID-19) on data collection and estimates

Coronavirus impacted on the data collection and the validation of turnover data, which are collected on the Quarterly Business Survey.

The following provides an overview of the coverage response rates for Quarter 2 2021, compared to the medians rates in 2019 and 2020:

	Quarter 2 2021	2020 (median)*	2019 (median)*
Coverage response rate (<i>returned turnover</i>)	63%	60%	79%

*median value achieved at IOS database closure of quarters 1 to 4 for 2019 and 2020.

Coronavirus has resulted in a decrease in coverage response rates in 2020 and 2021 when compared to 2019 figures, primarily due to the restrictions placed on businesses. As a result the estimates for Quarter 2 2021 may be subject to higher revisions than normal over the coming quarters. Comparisons of provisional estimates at lower industry levels in particular should be treated with caution.

Gross Value Added (GVA)

Weighting is carried out using the balanced GVA approach which balances the income and production approaches to measuring the economy into a single estimate. For more information please refer to [Regional GVA information](#).

Deflation

All series are measured at a constant market price (2018 = 100). Deflators adjust the value series, taking out the effect of price change, to create the volume series. The deflators used in this bulletin were provided by ONS on 6 September 2021. Details on [deflation improvements in the UK national accounts](#) can be found on the ONS website.

Seasonal Adjustment Review

Following the seasonal adjustment review conducted in March 2021 changes have been made to some regressors and models used to seasonally adjust (where applicable) time series using X13 ARIMA SEATS. This improves the reliability of results. Further details on [this review and other methodological changes](#) implemented in June 2021 are available on the NISRA website.

Changes to recent releases

Quarter	Change	Detail
Quarter 2 2018	NI Index Rebased to 2016	Figures rebased to 2016 = 100 in line with ONS.
Quarter 1 2019	Seasonal Adjustment Review	Following the seasonal adjustment review conducted in November 2018 changes have been made to some regressors and models used to seasonally adjust (where applicable) time series using X13 ARIMA SEATS.
Quarter 4 2019	2018 GVA	Figures in this publication are weighted using 2018 GVA which became available on 19 December 2019.
Quarter 3 2020	ONS Deflation Methodology Change	As recommended by Eurostat, previous method of rebasing for price statistics was changed to an annual chain-linked business price methodology .
Quarter 3 2020	NI Index Rebased to 2018	Figures rebased to 2018 = 100 in line with ONS. For further information on this please see the Quarter 3 2020 Rebasing Notice .
Quarter 1 2021	Seasonal Adjustment Review	Following the seasonal adjustment review conducted in March 2021 changes have been made to some regressors and models used to seasonally adjust (where applicable) time series using X13 ARIMA SEATS.
Quarter 1 2021	2019 GVA	Figures in this publication are weighted using 2019 GVA which became available on 26 March 2021.
Quarter 1 2021	Housing Association businesses added to IOS sample and universe.	Following passage of the Housing (Amendment) Act (Northern Ireland) 2020 the Office for National Statistics (ONS) completed an assessment of registered housing associations (RHAs) in Northern Ireland. This assessment concluded that RHAs in Northern Ireland are private, market producers and as such they were reclassified from the public sector to the private sector, with effect from 28 August 2020. The reclassification was communicated in a letter to the Northern Ireland Executive on 30 October 2020. RHAs are reclassified to the Business Services and Finance Sector (KLMN) for the purpose of national accounts and other economic statistics.

Publications policy

All ELMS publications are available to download free of charge from the [ELMS section of the NISRA website](#). The IOS bulletin and tables from the current publication, which includes all the data from the start of the series in 2005, are available in Excel and Open Document format to download free of charge from the [IOS section of the NISRA website](#).

Future IOS publications are due to be published on the same day as the [Index of Production](#) in March, June, September and December of each year. The [ELMS Publication Schedule](#) is available on the NISRA website.

Next publication

The next bulletin is due to be published on 16 December 2021.

Labour Market Statistics User Group

The next Labour Market Statistics User Group will take place on 30th September 2021. To register for this event, please follow this link: [Labour Market Statistics User Group Meeting 2021 Invitation](#).

The presentation from the Labour Market Statistics User Group 2020 is available from the [Labour Market Statistics User Engagement webpage](#).

In response to feedback from last year's event, a [Labour Market Statistics Newsletter](#) was published in June 2021 providing a summary of recent developments and upcoming plans.
