NICEI in Context

Definition

The **NICEI** is a quarterly measure of the performance (Economic Output) of the NI economy based on available official statistics.

This release covers the period 1st October to 30th December 2021 (Q4 2021) and is the eighth NICEI release to cover the COVID-19 shock to the economy. It is important to acknowledge since Q1 2020 lockdown measures to mitigate the spread of COVID-19 have been implemented and eased on a number of occasions. The NICEI (and Private Sector Component Index) increased to a 13 year high in Q4 2021, returning to levels of economic output previously exceeded in Q2 2008. This was largely driven by the Services Sector (which accounts for 53% of NI GVA) as the Index of Services, reached its series high in Q4 2021.

NICEI estimates for Quarter 4 2021 are subject to more uncertainty than usual due to the impact of the COVID-19 pandemic and subsequent periods of business closure affecting data availability for the input datasets. Further information is available in the [Quality and methodology](#) section of the [statistical bulletin](#).
